**HISTORIES AND POLITICS OF COMMUNITY-BASED NATURAL RESOURCE MANAGEMENT**

---

Rowman Altamira A group of distinguished environmentalists analyze and advocate for community-based natural resource management (CBNRM). They offer an overview of this transnational movement and its links between environmental management and social justice agendas. This book will be valuable to instructors, practitioners, and activists in environmental anthropology, justice, and policy, in cultural geography, political ecology, indigenous rights, conservation biology, and community-based cultural resource management.

**AFRICA'S GEOGRAPHY**

---

**DYNAMICS OF PLACE, CULTURES, AND ECONOMIES**

---

Wiley Africa's Geography presents a comprehensive exploration of the world's second largest and most culturally diverse continent. Author Benjamin Ofori-Amoah challenges common misconceptions and misrepresentations of Africa from a geographical perspective, harnessing the power of modern geographic mapping technology to explore this unique continent. This text provides thorough coverage of the historical, cultural, economic, and political forces that continue to shape Africa, applying geographic context to relevant past

and contemporary issues. Coverage of economic development, climate and biogeography, transportation and communication, manufacturing and commerce, and mining and agriculture provides foundational knowledge of this vast and complex continent. Ideally suited for multiple areas of classroom study, this text offers an effective and flexible pedagogical framework. Coverage of the entirety of Africa enables students to develop a cohesive portrait of the continent as a whole and identify the dynamism of its nations, cultures, and economies. Engaging and accessible narrative strengthens comprehension, while examples of historical and contemporary events increase student interest. Innovative and unique, Africa's Geography is an essential resource for cross-disciplinary investigation of this fascinating part of the world.

#### **A PRELIMINARY SURVEY OF ENVIRONMENTAL AWARENESS IN SOME SECONDARY SCHOOL PUPILS IN ZIMBABWE**

---

#### **WHY NATIONS FAIL**

---

#### **THE ORIGINS OF POWER, PROSPERITY AND POVERTY**

---

Profile Books Shortlisted for the Financial Times and Goldman Sachs Business Book of the Year Award 2012. Why are some nations more prosperous than others? Why Nations Fail sets out to answer this question, with a compelling and elegantly argued new theory: that it is not down to climate, geography or culture, but because of institutions. Drawing on an extraordinary range of contemporary and historical examples, from ancient Rome through the Tudors to modern-day China, leading academics Daron Acemoglu and James A. Robinson show that to invest and prosper, people need to know that if they work hard, they can make money and actually keep it - and this means sound institutions that allow virtuous circles of innovation, expansion and peace. Based on fifteen years of research, and answering the competing arguments of authors ranging from Max Weber to Jeffrey Sachs and Jared Diamond, Acemoglu and Robinson step boldly into the territory of Francis Fukuyama and Ian Morris. They blend economics, politics, history and current affairs to provide a new, powerful and persuasive way of understanding wealth and poverty.

#### **DAILY LANGUAGE REVIEW GRADE 5**

---

Evan Moor Educational Publishers This book includes Monday to Friday lessons for each day of a 36-week school year and short daily lessons. The Monday to Thursday lessons include two sentences to edit, including corrections in punctuation, capitalization, spelling, grammar, and vocabulary and three items practicing a variety of language and reading skills. Friday practice cycles through five formats: language usage, identifying and correcting mistakes, combining sentences, choosing reference materials and figurative speech (similes, metaphors). The pages are reproducible and the book includes a skills list and answer keys.

#### **THE UNCERTAIN PROMISE OF SOUTHERN AFRICA**

---

Indiana University Press In the 1970s and 1980s Indiana University Press published a series of books edited by Gwendolen Carter and others on economic and political conditions in Southern Africa during the apartheid era. The Uncertain Promise of Southern Africa is a return to that successful format in the post-apartheid era. Leading scholars analyze the economic, political, social, and cultural conditions in Southern Africa and the prospects for the region. The first part of the book examines the current political and development situation in six countries—South Africa, Namibia, Botswana, Zimbabwe, Angola, and Mozambique. The second part focuses on issues of enduring importance in the region—education, health, gender, the law, intra- and inter-regional power relations, international commerce, and popular culture.

---

### **EXPLORING SUSTAINABLE DEVELOPMENT**

---

---

### **GEOGRAPHICAL PERSPECTIVES**

---

---

Taylor & Francis Sustainable development is capturing the attention of planners, politicians and business leaders. Within the academic sphere its study is increasingly breaching disciplinary boundaries to become a focus of attention for natural and social scientists alike. But in studying such a key concept, it is vital that there is a clear definition of what it means, how it is applied on the ground, and the influence it exerts upon people's perceptions of change in the physical environment, economic activity and society. Exploring Sustainable Development is a major new text which provides a multifaceted introduction to key areas of study in this field, examining sustainability at the full range of spatial scales from the local to the global. Building on existing theory it demonstrates the unique contributions that thinking geographically about space, place and human-environment relationships can bring to the analysis of sustainable development. This book explores different interpretations of sustainable development in both theory and practice, in developed and developing countries, and in rural and urban areas. It pays particular attention to the local, national and international politics of implementation, the future of climate and energy, the role of business, and different conceptions of agricultural sustainability. This wide-ranging text is ideal for undergraduates and postgraduates in geography, environmental science, development studies, and related social and political sciences.

### **THE GEOGRAPHY OF TRANSPORT SYSTEMS**

---

---

Routledge Mobility is fundamental to economic and social activities such as commuting, manufacturing, or supplying energy. Each movement has an origin, a potential set of intermediate locations, a destination, and a nature which is linked with geographical attributes. Transport systems composed of infrastructures, modes and terminals are so embedded in the socio-economic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportation is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of this book. The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of transportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a specific conceptual dimension including networks, modes, terminals, freight transportation, urban transportation and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility, spatial interactions, graph theory and Geographic Information Systems for transportation (GIS-T). This book provides a comprehensive and accessible introduction to the field, with a broad overview of its concepts, methods, and areas of application. The accompanying website for this text contains a useful additional material, including digital maps, PowerPoint slides, databases, and links to further reading and websites. The website can be accessed at: <http://people.hofstra.edu/geotrans> This text is an essential resource for undergraduates studying transport geography, as well as those interest in economic and urban geography, transport planning and engineering.

### **NO LONGER AT EASE**

---

---

Penguin UK Obi Okonkwo is an idealistic young man who, thanks to the privileges of an education in Britain, has now returned to Nigeria for a job in the civil service. However in his

new role he finds that the way of government seems to be backhanders and corruption. Obi manages to resist the bribes that are offered to him, but when he falls in love with an unsuitable girl - to the disapproval of his parents - he sinks further into emotional and financial turmoil. The lure of easy money becomes harder to refuse, and Obi becomes caught in a trap he cannot escape. Showing a man lost in cultural limbo, and a Nigeria entering a new age of disillusionment, *No Longer at Ease* concludes Achebe's remarkable trilogy charting three generations of an African community under the impact of colonialism, the first two volumes of which are *Things Fall Apart* and *Arrow of God*.

#### **CLIMATE CHANGE 2014 - IMPACTS, ADAPTATION AND VULNERABILITY: REGIONAL ASPECTS**

---

Cambridge University Press This latest Fifth Assessment Report of the Intergovernmental Panel on Climate Change (IPCC) will again form the standard reference for all those concerned with climate change and its consequences, including students, researchers and policy makers in environmental science, meteorology, climatology, biology, ecology, atmospheric chemistry and environmental policy.

---

#### **RESILIENCE AND SUSTAINABILITY IN URBAN AFRICA**

---

---

#### **CONEXT, FACETS AND ALTERNATIVES IN ZIMBABWE**

---

Springer Nature Resilience has become a very topical issue transcending many spheres and sectors of sustainable urban development. This book presents a resilience framework for sustainable cities and towns in Africa. The rise in informal settlements is due to the urban planning practices in most African cities that rarely reflect the realities of urban life and environment for urban development. Aspects of places, people and process are central to the concept of urban resilience and sustainable urban growth. It stems from the observation that urban vulnerability is on the increase in Zimbabwe and beyond. In history, disasters have adversely affected nations across the world, inflicting wide ranging losses on one hand while on the other hand creating development opportunities for urban communities. Cooperation in disaster management is a strategy for minimising losses and uplifting the affected urban settlements. The significance of urban planning and design in the growth and development of sustainable urban centres is well documented. Urbanisation has brought with it challenges that most developing countries such as Zimbabwe are not equipped to handle. This has been accompanied by problems such as overpopulation, overcrowding, shortages of resources and the growth of slum settlements. There need is to seriously consider urban planning and design in order to come up with contemporary designs that are resilient to current urban challenges. There are major gaps in urban resilience building for instance in Harare and the local authority needs to prioritise investment in resilient urban infrastructure.

---

#### **THE BRITISH NATIONAL BIBLIOGRAPHY**

---

---

#### **LIVING WITH TRANSITION IN LAOS**

---

---

#### **MARKET INTERGRATION IN SOUTHEAST ASIA**

---

Routledge Laos - the Lao People's Democratic Republic - is one of the least understood and studied countries of Asia. Its development trajectory is also one of the most interesting, as it moves from state, or perhaps more appropriately subsistence, to market. Based on extensive original research, this book assesses how economic transition and marketisation are being translated into progress (or not) at the local level, and at the resulting impact on poverty, inequality and livelihoods. It concludes that the process of transition in fact contributes to the growth of poverty for some people, and shows how people manage to cope in very unfavourable circumstances.

---

**INEQUALITY IN A RAPIDLY CHANGING WORLD**

---

United Nations This report examines the links between inequality and other major global trends (or megatrends), with a focus on technological change, climate change, urbanization and international migration. The analysis pays particular attention to poverty and labour market trends, as they mediate the distributional impacts of the major trends selected. It also provides policy recommendations to manage these megatrends in an equitable manner and considers the policy implications, so as to reduce inequalities and support their implementation.

**CAMBRIDGE IGCSE GEOGRAPHY**

---

Collins Educational An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching.

---

**TRADE INFRASTRUCTURE AND ECONOMIC DEVELOPMENT**

---

Routledge There is growing consensus in the literature that trade and trade policy matter for a pro-poor growth and development strategy. Therefore, policies that are consistent with this strategy feature increasingly in many African countries where poverty is endemic and rapid and where sustainable economic growth is viewed as the major vehicle for poverty reduction. Key elements of these policies include measures that promote the expansion and diversification of production and trade in Africa. This book is aimed at articulating appropriate structural and policy measures for eliminating the constraints that African countries face and thus ensuring that they can derive maximum benefits from all available market access opportunities. There is evidence that most African countries face external market access barriers in their major export destinations which are generally less constraining than those confronting countries in other developing country regions. Yet, they have generally not been able to take full advantage of the special (preferential) market access opportunities available to them. This suggests that improved external market access, whether reciprocal or preferential, would not, by itself, be sufficient for strengthening African export performance. In this collection, export supply response capacity takes external (beyond-the-border) factors as given and concentrates primarily on the internal (behind-the-border) factors that influence production and distribution costs and, thus, competitiveness. The central working hypothesis of this book is that the inability of domestic producers and exporters in Africa to respond quickly, effectively and efficiently to external market access opportunities is caused by various limitations of their internal supply capacity and that this, in turn, is largely responsible for the lacklustre export performance of many African countries. This comprehensive study should be of interest to students and researchers of international trade and development economics as well as African studies.

### **INVENTORY OF POPULATION PROJECTS IN DEVELOPING COUNTRIES AROUND THE WORLD**

---

#### **THE CHALLENGE OF SLUMS**

---

### **GLOBAL REPORT ON HUMAN SETTLEMENTS 2003**

---

Routledge The Challenge of Slums presents the first global assessment of slums, emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all level, from local to global, that underlie the formation of slums as well as their social, spatial and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. The Global Report on Human Settlements is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities and civil society organizations around the world.

---

### **MICROECONOMICS: PRIVATE & PUBLIC CHOICE**

---

Cengage Learning Learn to apply microeconomic concepts to the world around you as MICROECONOMICS: PRIVATE AND PUBLIC CHOICE, 17E highlights current economic conditions. Reader-friendly coverage analyzes and explains the latest consumer and firm behavior. You see how theories apply to issues in health care, earnings differences between genders, labor unions, environment and resource exhaustion and even the economic shutdown from the 2020 COVID-19 pandemic. This edition dispels common economic myths with microeconomic insights that clarify current issues. You see how topics apply to common issues, such as student grants and loans. This edition offers a unique public choice perspective on the political process and delves into why government actions sometimes fail to deliver desired outcomes. You also learn the importance of entrepreneurial discovery

---

and dynamic competition on economic growth. In addition, you study international trade as a source of economic growth and higher living standards. Most importantly, you learn to recognize microeconomic principles at work in your life.
