Handbook of Computational Social Science, Volume 1 Theory, Case Studies and Ethics [Routledge](#) *The Handbook of Computational Social Science is a comprehensive reference source for scholars across multiple disciplines. It outlines key debates in the field, showcasing novel statistical modeling and machine learning methods, and draws from specific case studies to demonstrate the opportunities and challenges in CSS approaches. The Handbook is divided into two volumes written by outstanding, internationally renowned scholars in the field. This first volume focuses on the scope of computational social science, ethics, and case studies. It covers a range of key issues, including open science, formal modeling, and the social and behavioral sciences. This volume explores major debates, introduces digital trace data, reviews the changing survey landscape, and presents novel examples of computational social science research on sensing social interaction, social robots, bots, sentiment, manipulation, and extremism in social media. The volume not only makes major contributions to the consolidation of this growing research field but also encourages growth in new directions. With its broad coverage of perspectives (theoretical, methodological, computational), international scope, and interdisciplinary approach, this important resource is integral reading for advanced undergraduates, postgraduates, and researchers engaging with computational methods across the social sciences, as well as those within the scientific and engineering sectors.* **The SAGE Dictionary of Social Research Methods** [Pine Forge Press](#) *Bringing together the work of over eighty leading academics and researchers worldwide to produce the definitive reference and research tool for the social sciences, The SAGE Dictionary of Social Research Methods contains more than 230 entries providing the widest coverage of the all the main terms in the research process. The theoretical and methodological ideas behind the book, inspired by Aristotelian phronesis, represent an original perspective within the social sciences, and for the first time this volume gives readers a set of studies exemplifying what applied phronesis looks like in practice. The reflexive analysis of values and power gives new meaning to the impact of research on policy and practice. Real Social Science is a major step forward in a novel and thriving field of research. This book will benefit scholars, researchers, and students who want to make a difference in practice, not just in the academy. Its message will make it essential reading for students and academics across the social sciences"-- **InTraders 2019: Academic studies in social, human and administrative sciences** [Hiperlink eġit.ilet.yay.san.tic.ve ltd.sti](#). The present study is an analysis of the connections established between the intercultural phenomenon and trade. Both intercultural contacts and commerce appeared and developed due to humans' mobility and their basis was exchange (either spiritual or material). Since the dawn of history people travelled a lot and exchanged knowledge and goods (for instance, silk was brought to Europe by two Byzantine monks from China, in 550 C.E.), so, travel generated interculturality and trade. Intercultural contacts can be positive (trade, for example) or negative (wars). One can say that interculturality is a trait of the human species. Many innovations in different fields spread due to intercultural exchange, globalisation is also based on cross-cultural or intercultural contacts. The Industrial Revolution and colonialism represented the main causes of the intensification of intercultural contacts which generated an increase in international trade. In contemporary human society, this kind of relationships is essential for development in any activity field. The globalised trade in nowadays world was generated by interculturality and World Trade Organization was founded to facilitate it and to create an international network; the technological evolution and the modern means of transport enhanced the relations between different cultures. Interculturality is an umbrella concept covering a diversity of domains: communication, religion, education, anthropology, literature etc. In this paper, we try to answer to the following question: "How can interculturality influence trade or vice versa?" by pointing out the main aspects of the analysed phenomena and their links. To accomplish this task we shall make use of the historical method and imagology. **Research in Teaching of Social Studies** [APH Publishing](#) **Research in the Social Scientific Study of Religion, Volume 17** [BRILL](#) This volume of R^{SSSR} contains articles on conversion narratives of Jehovah's witnesses, belief in an active Satan, afterlife beliefs, religiosity and parenting and spirituality as coping resource. **Research in the Social Scientific Study of Religion** [BRILL](#) Various articles are presented covering psychological, sociological and cross-cultural topics or relevance to religious/spiritual researchers and academics. **Computer Applications in the Social Sciences** [Temple University Press](#) Presenting an introduction to computing and advice on computer applications, this book examines hardware and software with respect to the needs of the social scientist. It offers a framework for the use of computers, with focus on the 'work station', the center of which is a personal computer connected to networks by a telephone-based modem. **Virtue Ethics in the Conduct and Governance of Social**

Science Research Emerald Group Publishing *This edited collection focuses on the virtue theory and the ethics of social science research.* **Ethics and Values in Applied Social Research** SAGE Publications, Incorporated *With the primary objective of raising ethical sensibility, this volume details the ethical problems and dilemmas faced by applied social science researchers. Issues such as the use of deception, the participant's right to privacy and informed consent, and the potential harm of public disclosure are confronted. The author discusses the need to review ethical problems and their implications in the context of current ethical standards in both society and the scientific community. Case studies illustrate unanticipated ethical dilemmas which might emerge during a research project. Issues are presented and interpreted clearly so that their complexity can be penetrated and potential solutions envisioned. The volume also includes specific methodolo*
