Exploring Islamic Fundamentalist Ideologies in Africa Memorial Books of Eastern European Jewry Essays on the History and Meanings of Yizker Volumes McFarland From the Russian civil wars through the Nazi years, the Jews of Eastern Europe were targets of violence during the first half of the twentieth century. During the Holocaust especially, entire communities were wiped out. In response, survivors sometimes compiled memorial books, or Yizker books, in an attempt to preserve historical, biographical, and cultural information about their shtetls. This multipart collection provides a concise history of the memorial books and their cultural contexts; eight analytical essays on or using Yizker books; key reviews, in some cases translated from the Yiddish, from the 1950s and later; and a bibliographic overview of secondary sources and collections. Library & Information Science Abstracts Index to Legal Periodicals & Books Statebuilding John Wiley & Sons After civil wars end, what can sustain peace in the long-term? In particular, how can outsiders facilitate durable conflict-managing institutions through statebuilding - a process that historically has been the outcome of bloody struggles to establish the state's authority over warlords, traditional authorities, and lawless territories? In this book, Timothy Sisk explores international efforts to help the world's most fragile post-civil war countries today build viable states that can provide for security and deliver the basic services essential for development. Tracing the historical roots of statebuilding to the present day, he demonstrates how the United Nations, leading powers, and well-meaning donors have engaged in statebuilding as a strategic approach to peacebuilding after war. Their efforts are informed by three key objectives: to enhance security by preventing war recurrence and fostering community and human security; to promote development through state provision of essential services such as water, sanitation, and education; to enhance human rights and democracy, reflecting the liberal international order that reaffirms the principles of democracy and human rights, . Improving governance, alongside the state's ability to integrate social differences and manage conflicts over resources, identity, and national priorities, is essential for long-term peace. Whether the global statebuilding enterprise can succeed in creating a world of peaceful, well-governed, development-focused states is unclear. But the book concludes with a road map toward a better global regime to enable peacebuilding and development-oriented statebuilding into the 21st century. Understanding New Media Augmented Knowledge & Culture University of Calgary Press This book outlines the development currently underway in the technology of new media and looks further to examine the unforeseen effects of this phenomenon on our culture, our philosophies, and our spiritual outlook. The digital revolution is something fundamentally different from simply the introduction of yet another medium to our culture: it marks a paradigm shift in our relation to all media, to all our senses, all our expressions. The new media are transforming our definitions of culture and knowledge and transcending barriers in ways that will have

lasting implications for generations to come. **The Europa World Year Book 2007** First published in 2007. Why haven't the parties lived up to the initial promise and enthusiasm of the early 1990s? Beginning with the immediate aftermath of the dissolution of the Soviet Union, this book provides a practical answer to these questions whilst linking the issues to International Relations theorizing. Taking into account both the role of ideas and power, the book links the topic with three variants of mainstream theorizing: the English School, (neoliberal) institutionalism and constructivism. In the process a multi-causal framework that looks for points of convergence between different paradigms in the study of IR is developed. Providing an overview, history and explanation of the problems of institutionalization in EU-Russia relations during the post-Cold War era, this book is vital reading for students and scholars of the EU and Russia, European studies, European security and Russian foreign policy. It will also be of major interest to scholars of International Relations theory. **Murray and Nadel's Textbook of Respiratory Medicine E-Book 2-Volume Set** Elsevier Health Sciences Murray and Nadel's Textbook of Respiratory Medicine has long been the definitive and comprehensive pulmonary disease reference. Breathtakingly suspenseful and beautifully written, *The Historian* is the story of a young woman plunged into a labyrinth where the secrets of her family's past connect to an inconceivable evil: the dark fifteenth-century reign of Vlad the Impaler and a time-defying pact that may have kept his awful work alive through the ages. The search for the truth becomes an adventure of monumental proportions, taking us from monasteries and dusty libraries to the capitals of Eastern Europe—in a feat of storytelling so rich, so hypnotic, so exciting that it has enthralled readers around the world. "Part thriller, part history, part romance...Kostova has a keen sense of storytelling and she has a marvelous tale to tell." —Baltimore Sun **CRB Commodity Year Book** The Global Architect Firms, Fame and Urban Form Routledge The Global Architect explores the increasing significance of globalization processes on urban change, architectural practice and the built environment. In addition, they have exposed the inadequacies of mainstream economics in providing answers to these challenges. This volume gathers over 50 leading scholars from around the world to offer a forward-looking perspective of economic geography to understanding the various building blocks, relationships, and trajectories in the world economy. The perspective is at the same time grounded in theory and in the experiences of particular places. Reviewing state-of-the-art of economic geography, setting agendas, and with illustrations and empirical evidence from all over the world, the book should be an essential reference for students, researchers, as well as strategists and policy makers. Building on

the success of the first edition, this volume offers a radically revised, updated, and broader approach to economic geography. With the backdrop of the global financial crisis, finance is investigated in chapters on financial stability, financial innovation, global financial networks, the global map of savings and investments, and financialization. Environmental challenges are addressed in chapters on resource economies, vulnerability of regions to climate change, carbon markets, and energy transitions. Distribution and consumption feature alongside more established topics on the firm, innovation, and work. The handbook also captures the theoretical and conceptual innovations of the last fifteen years, including evolutionary economic geography and the global production networks approach. Addressing the dangers of inequality, instability, and environmental crisis head-on, the volume concludes with strategies for growth and new ways of envisioning the spatiality of economy for the future.

Spiritual Economies Islam, Globalization, and the Afterlife of Development Cornell University Press In Europe and North America Muslims are often represented in conflict with modernity—but what could be more modern than motivational programs that represent Islamic practice as conducive to business success and personal growth? Daromir Rudnyckj's innovative and surprising book challenges widespread assumptions about contemporary Islam by showing how moderate Muslims in Southeast Asia are reinterpreting Islam not to reject modernity but to create a "spiritual economy" consisting of practices conducive to globalization. Drawing on more than two years of research in Indonesia, most of which took place at state-owned Krakatau Steel, Rudnyckj shows how self-styled "spiritual reformers" seek to enhance the Islamic piety of workers across Southeast Asia and beyond. Deploying vivid description and a keen ethnographic sensibility, Rudnyckj depicts a program called Emotional and Spiritual Quotient (ESQ) training that reconfigures Islamic practice and history to make the religion compatible with principles for corporate success found in Euro-American management texts, self-help manuals, and life-coaching sessions. The prophet Muhammad is represented as a model for a corporate CEO and the five pillars of Islam as directives for self-discipline, personal responsibility, and achieving "win-win" solutions. **Spiritual Economies** reveals how capitalism and religion are converging in Indonesia and other parts of the developing and developed world. Rudnyckj offers an alternative to the commonly held view that religious practice serves as a refuge from or means of resistance against modernization and neoliberalism. Moreover, his innovative approach charts new avenues for future research on globalization, religion, and the predicaments of modern life.

The Books that Made the European Enlightenment A History in 12 Case Studies Bloomsbury Publishing In contrast to traditional Enlightenment studies that focus solely on authors and ideas, Gary Kates' employs a literary lens to offer a wholly original history of the period in Europe from 1699 to 1780. Each chapter is a biography of a book which tells the story of the text from its inception through to the revolutionary era, with wider aspects of the Enlightenment era being revealed through the narrative of the book's publication and reception. Here, Kates joins new approaches to book history with more traditional intellectual history by treating authors, publishers, and readers in a balanced fashion throughout. Using a unique database of 18th-century editions representing 5,000 titles, the book looks at the multifaceted significance of bestsellers from the time. It analyses key works by Voltaire, Adam Smith, Madame de Graffigny, Jean-Jacques Rousseau and David Hume and champions the importance of a crucial innovation of the age: the rise of the 'erudite blockbuster', which for the first time in European history, helped to popularize political theory among a large portion of the middling classes. Kates also highlights how, when, and why some of these books were read in the European colonies, as well as incorporating the responses of both ordinary men and women as part of the reception histories that are so integral to the volume. The Routledge Handbook of European Security Routledge This new Handbook brings together key experts on European security from the academic and policy worlds to examine the European Union (EU) as an international security actor. In the two decades since the end of the Cold War, the EU has gradually emerged as an autonomous actor in the field of security, aiming to safeguard European security by improving global security. However, the EU's development as a security actor has certainly not remained uncontested, either by academics or by policy-makers, some of whom see the rise of the EU as a threat to their national and/or transatlantic policy outlook. While the focus of this volume is on the politico-military dimension, security will also be put into the context of the holistic approach advocated by the EU. The book is organised into four key sections: Part I - The EU as an International Security Actor Part II - Institutions, Instruments and Means Part III - Policies Part IV - Partners This Handbook will be essential reading for all students of European Security, the EU, European Politics, security studies and IR in general. Blood on the Tracks The Life and Times of S. Brian Willson PM Press "We are not worth more, they are not worth less." This is the mantra of S. Brian Willson and the theme that runs throughout his compelling psycho-historical memoir. Willson's story begins in small-town, rural America, where he grew up as a "Commie-hating, baseball-loving Baptist," moves through life-changing experiences in Viet Nam, Nicaragua and elsewhere, and culminates with his commitment to a localized, sustainable lifestyle. In telling his story, Willson provides numerous examples of the types of personal, risk-taking, nonviolent actions he and others have taken in attempts to educate and effect political change: tax refusal—which requires simplification of one's lifestyle; fasting—done publicly in strategic political and/or therapeutic spiritual contexts; and obstruction tactics—strategically placing one's body in the way of "business as usual." It was such actions that thrust Brian Willson into the public eye in the mid-'80s, first as a participant in a high-profile, water-only "Veterans Fast for Life" against the Contra war being waged by his government in Nicaragua. Then, on a fateful day in September 1987, the world watched in horror as Willson was run over by a U.S. government munitions train during a nonviolent blocking action in which he expected to be removed from the tracks and arrested. Losing his legs only strengthened Willson's identity with millions of unnamed victims of U.S. policy around the world. He provides details of his travels to countries in Latin America and the Middle East and bears witness to the harm done to poor people as well as to the environment by the steamroller of U.S. imperialism. These heart-rending accounts are offered side by side with inspirational stories of nonviolent struggle and the survival of resilient communities Willson's expanding consciousness also uncovers injustices within his own country, including insights gained through his study and service within the U.S. criminal justice system and personal experiences addressing racial injustices. He discusses coming to terms with his identity as a Viet Nam veteran and the subsequent service he provides to others as director of a veterans outreach center in New England. He draws much inspiration from friends he encounters along the way as he finds himself continually drawn to the path leading to a simpler life that seeks to "do no harm." Throughout his personal journey Willson struggles with the question, "Why was it so easy for me, a 'good' man, to follow orders to travel 9,000 miles from home to participate in killing people who clearly were not a threat to me or any of my fellow citizens?" He eventually comes to the realization that the "American Way of Life" is AWOL from humanity, and that the only way to recover our humanity is by changing our consciousness, one individual at a time, while striving for collective cultural changes toward "less and local." Thus, Willson offers up his personal story as a metaphorical map for anyone who feels the need to be liberated from the American Way of Life—a guidebook for anyone called by conscience to question continued obedience to vertical power structures while longing to reconnect with the human archetypes of cooperation, equity, mutual respect and empathy.
