### The Social Fabric Matrix Approach

**Springer Science & Business Media** *There has never been a better time for the social fabric matrix. As this book is being published, the idea that unregulated market capitalism leads to the best of all possible worlds has been thoroughly discredited. A series of economic and social problems have come to the forefront of national discussion and policy debates. There is now widespread acceptance that human activity, particularly the consumption of nonrenewable energy resources, has contributed to global warming. The lack of oversight of the financial industry encouraged reckless practices that endangered the stability of the entire financial system, prompting bailout efforts based on the fragile interdependence of the financial and economic systems. The shortcomings of our health care system are increasingly evident, including the growing number of uninsured citizens, the difficulties for businesses in offering health insurance, and the effects of health and health care on the ability of individuals and families to maintain a decent standard of living. Perhaps the best illustration of a complex system that cries out for coordinated policy-making is in the critical area of energy, where public and private decisions on energy policy not only have direct effects on consumer costs, but also have effects on global warming, local ecosystems, international relations, the health of our citizens, and the sustainability of companies and communities. In short, there is growing recognition of the interdependence of the economic system with the environment and the broader institutions of society.*

## The Four Laws of Love Discussion

# Guide

## For Couples & Groups

*The Four Laws of Love represents the culmination of Jimmy Evans' influential career. In this deeply personal book, Jimmy Evans outlines the foundational pillars upon which God designed marriage. Without holding back, he tells the story of his own marriage, which was hurtling toward divorce until this self-proclaimed "bad husband" came to recognize and put into practice these four laws. This book sounds a wake-up call for every kind of marriage, including those that are barely surviving and those that seem to operate on autopilot. Couples who follow these simple guidelines -- recognizing the original intent and purpose of marriage--will inject new life into their unions. They'll see hurting marriages find healing and watch good marriages become great. Each revitalized relationship will play a part in restoring marriage to its sacred role at the center of human civilization.*

## Approaches to Teaching the Works of Octavia E. Butler

**Modern Language Association** *Octavia E. Butler's works of science fiction invite readers to consider the structures of power in society and to ask what it means to be human. Butler addresses social justice issues such as poverty, racism, and violence against women and connects the history of slavery in the United States with speculation on a biologically altered future world. The first section of this volume, "Materials," lists secondary sources and interviews with Butler and suggests texts that instructors might pair with her works. Essays in the second section, "Approaches," situate Butler in science fiction, modernism, and Afrofuturism and provide interdisciplinary approaches from political science, philosophy, art, and digital humanities. The contributors present strategies for teaching Butler in literature courses as well as courses designed for adult learners, preservice teachers, and students at historically black colleges and universities.*

## Greenwashing Sport

**Taylor & Francis** *Professional sports promote their green credentials and yet remain complicit in our global environmental crisis Sports are responsible for significant carbon footprints through stadium construction and energy use, player and spectator travel, and media coverage. The impact of sports on climate change is further compounded by sponsorship deals with the gas and petroleum industries—imbuing those extractive corporations with a positive image by embedding them within the everyday pleasure of sport. Toby Miller argues that such activities amount to "greenwashing". Scrutinizing motor racing, association football, and the Olympics, Miller weighs up their environmental policies, their rhetoric of conservation and sustainability, and their green credentials. The book concludes with the role of green citizenship and organic fan activism in promoting pro-environmental sports. This is a must-read for students and researchers in media, communications, sociology, cultural studies, and environmental studies.*
