FLY, FIREFLY

Sleeping Bear Press One evening at dusk a wind current carries a lone firefly out over the sea. Glancing down into the water, the insect is mesmerized by the glowing bioluminescence, mistaking it for other fireflies. Seeking company, the firefly plunges into the waves. Luckily, there are human bystanders who can lend a hand. Based on an event witnessed by nature writer and ecologist Rachel Carson (The Sea Around Us and Silent Spring) where a firefly attempts to join its "family" in the ocean, this lyrical story written in verse perfectly illustrates the wonder and delight the natural world offers those who pay close enough attention. Back matter includes science facts about fireflies and bioluminescence, as well as information about Carson's life.

MOLECULAR IMAGING WITH REPORTER GENES

Cambridge University Press Reporter genes have been used for several decades to study regulation of gene expression in vivo. However, it was little more than a decade ago that a new class of reporter genes was developed for imaging molecular events within living subjects. By following the interactions of protein molecules, researchers can resolve the complex chemical pathways that living cells utilise. This book focuses on this group of imaging reporter genes, starting with detailed descriptions of all reporter genes from different imaging modalities, including optical, MRI, and radionuclide-based imaging. Key scientists in the field explain how to enhance reporter gene imaging utility through instrumentation and the various applications of this technology. This is the first comprehensive book on all aspects of reporter gene imaging, detailing what is known in the field and future goals for research. Investigators in biomedical sciences, physicians, and the biotechnology and pharmaceutical industries will benefit from topics covered.

FIREFLY SUMMER

Kensington Books The New York Times bestselling author of *Nantucket* reunites four sisters on Cape Cod—where they uncover the truth about a past tragedy . . . The close-knit Quinn siblings enjoyed the kind of idyllic childhood that seems made for greeting cards, spending each summer at Whit's End, the family's home on Cape Cod. Then comes the summer of 1964, warm and lush after a rainy spring—perfect firefly weather. Sisters Birdie, Remy, Sailor, Piper, and their brother, Easton, delight in catching the insects in mason jars to make blinking lanterns. Until, one terrible night, tragedy strikes. Decades later, the sisters have carved out separate lives on the Cape. Through love and heartbreak, health issues, raising children, and caring for their aging parents, they have supported each other, rarely mentioning their deep childhood loss. But one evening, as they sit together at Whit's End to watch the sun set, the gathering fireflies elicit memories of that long-ago night, and a tumult of regrets, guilt, and secrets tumble out. Poignant yet hopeful, *Firefly Summer* is an uplifting story of the resilience of sisterhood and the bright glimpses of joy and solace that, like fireflies after rain, can follow even the deepest heartaches. Praise for the novels of Nan Rossiter "A gripping story of three sisters, of love lost and found and a family's journey from grief to triumph."—Debbie Macomber, #1 New York Times bestselling author on *More Than You Know* "Eloquent and surprising . . . I love this story of faith, love, and the lasting bonds of family."—Ann Leary, New York Times bestselling author on *The Gin & Chowder Club*

that their minds are open to so many possibilities. They naturally problem solve, and discover solutions where adults often get stuck. This is the principle behind the series Little Mind Books. We explore problems and find creative solutions. Our goal is to inspire children to explore for themselves, not only in seeing themselves in the characters, but to feel like they are part of the adventures. In the Night of the Lights we join Sam on an adventure with Grandma "Gigi" to discover what the lights are in her garden. What Sam discovers is better than magic, it is real. Sam learns a lesson in problem solving, and also learns the importance of respecting the natural habitat of earth's creatures. Join us with your children in discovering this real magic, it may spark adventure in your own backyard!
