TECHNOLOGY FOR ADAPTIVE AGING

National Academies Press *Emerging and currently available technologies offer great promise for helping older adults, even those without serious disabilities, to live healthy, comfortable, and productive lives. What technologies offer the most potential benefit? What challenges must be overcome, what problems must be solved, for this promise to be fulfilled? How can federal agencies like the National Institute on Aging best use their resources to support the translation from laboratory findings to useful, marketable products and services? Technology for Adaptive Aging is the product of a workshop that brought together distinguished experts in aging research and in technology to discuss applications of technology to communication, education and learning, employment, health, living environments, and transportation for older adults. It includes all of the workshop papers and the report of the committee that organized the workshop. The committee report synthesizes and evaluates the points made in the workshop papers and recommends priorities for federal support of translational research in technology for older adults.*

FROM INFANCY TO THE ELDERLY

COMMUNICATION THROUGHOUT THE AGES

UNDERSTANDING COMMUNICATION AND AGING

DEVELOPING KNOWLEDGE AND AWARENESS

SAGE *The book examines key topics such as interpersonal and family relationships in old age, media portrayals of aging, cultural variations in intergenerational communication, and health communication in old age.*

COMMUNICATION AND THE AGING PROCESS

INTERACTION THROUGHOUT THE LIFE CYCLE

Elsevier *Communication and the Aging Process: Interaction throughout the Life Cycle focuses on the process of development from infancy through old age, particularly noting the value of communication, social interaction, and social networks. The manuscript first offers information on development throughout the life cycle, as well as models of development, crisis and change, and methodology. The text then discusses communicative interaction and origins of communication, including interpersonal cognition, social interaction, caretaker-child interaction, communication between children, and language development. The book surveys adolescence and adulthood, psychological characteristics of the aged, and social world of the aged. Personality and morale, retirement and widowhood, attitudes toward the aged, and norms and rules are discussed. The manuscript also takes a look at the social networks of the aged and communicative interaction and the aged. Concerns include family, neighbors, friends, misperceptions between generations, and thought process and communication. The text is a vital source of data for readers interested in the study of life cycle.*

HANDBOOK OF COMMUNICATION AND AGING RESEARCH

Routledge *This work shows that aging is not only an individual process but an interactive one. The study of communication can lead to an understanding of what it means to grow old. Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a different view of aging.*

COMMUNICATION AND AGING

Routledge *This text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging. It continues the groundbreaking work of the first edition, emphasizing a life-span approach toward understanding the social interaction that occurs during later life. The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging, positive and negative stereotypes toward older adults, and health communication issues. It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people's lives. The impact of nonrelational processes, such as hearing loss, are considered as they impact relationships with others and affect the ability to age successfully. The book is organized into 14 chapters. Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences. As in the first edition, when the literature is empirically based, the communicative ramifications are then discussed. Readers of this volume will gain greater understanding of the importance of their communicative relationships and*

how significant they remain across the life span. Developed for students in communication, psychology, nursing, social gerontology, sociology, and related areas, *Communication and Aging* provides important insights on communication to all who are affected by the aging process.

HANDBOOK OF COMMUNICATION AND AGING RESEARCH

Routledge This second edition of the *Handbook of Communication and Aging Research* captures the ever-changing and expanding domain of aging research. Since it was first recognized that there is more to social aging than demography, gerontology has needed a communication perspective. Like the first edition, this handbook sets out to demonstrate that aging is not only an individual process but an interactive one. The study of communication can lead to an understanding of what it means to grow old. We may age physiologically and chronologically, but our social aging--how we behave as social actors toward others, and even how we align ourselves with or come to understand the signs of difference or change as we age--are phenomena achieved primarily through communication experiences. Synthesizing the vast amount of research that has been published on communication and aging in numerous international outlets over the last three decades, the book's contributors include scholars from North America and the United Kingdom who are active researchers in the perspectives covered in their particular chapter. Many of the chapters work to deny earlier images of aging as involving normative decrement to provide a picture of aging as a process of development involving positive choices and providing new opportunities. A recurring theme in many chapters is that of the heterogeneity of the group of people who are variously categorized as older, aged, elderly, or over 65. The contributors review the literature analytically, in a way that reveals not only current theoretical and methodological approaches to communication and aging research but also sets the future agenda. This handbook will be of great interest to scholars and researchers in gerontology, developmental psychology, and communication, and, in this updated edition, will continue to play a key role in the study of communication and aging.

OXFORD TEXTBOOK OF COMMUNICATION IN ONCOLOGY AND PALLIATIVE CARE

Oxford University Press Written by an international team of authors the *Oxford Textbook of Communication in Oncology and Palliative Care* integrates clinical wisdom with empirical findings. It draws upon the history of communication science, providing the reader with a comprehensive curriculum for applied communication skills training. An essential resource, the *Oxford Textbook of Communication in Oncology and Palliative Care* is filled with tips and strategies for effective communication about difficult and challenging communication. In focusing on cancer and the end-of-life, it deals with the existential and spiritual challenges found across all of medicine, providing deep insights into what is at stake and how clinicians might optimally respond. This authoritative and wide-ranging book provides clinicians with state-of-the-art and evidence-based guidelines to achieve effective, patient-centred communication in the clinical settings of oncology and palliative care. Thoroughly revised and updated, this new edition includes sections on the curriculum for nurses, the core curriculum, and an introductory section on communication science. The chapters embrace specialty issues across the clinical disciplines, from enrolling in clinical trials, working in teams, and discussing genetic risk, to talking about sexuality, infertility, and intercultural issues. An educational perspective is also provided, with chapters covering communication skills training, how to evaluate courses, and international models of training.

INTERPERSONAL COMMUNICATION IN OLDER ADULTHOOD

INTERDISCIPLINARY THEORY AND RESEARCH

SAGE Publications By highlighting the commonalities across a range of disciplines, this volume provides a unique and broad-based perspective on communication and ageing. This integrative approach brings together the best of current research and theory from communication, cognitive psychology, psycholinguistics and medical sociology. Centring on three topics - cognition, language and relationships - the book explores the individual areas as well as the ways in which they intersect. It brings to light the implications of individual differences among members of the elderly population as they affect communication, and illustrates the positive as well as the negative effects of the ageing process on language production, relational satisfaction and

COMMUNICATION FOR SUCCESSFUL AGING

EMPOWERING INDIVIDUALS ACROSS THE LIFESPAN

Routledge This essential volume explores the vital role of communication in the aging process and how this varies for different social groups and cultural communities. It reveals how communication can empower people in the process of aging, and that how we communicate about age is critically important to - and is at the heart of - aging successfully. Giles et al. confront the uncertainty and negativity surrounding "aging" - a process with which we all have to cope - by expertly placing communication at the core of the process. They address the need to avoid negative language, discuss the lifespan as an evolving adventure, and introduce a new theory of successful aging - the communication ecology model of successful aging (CEMSA). They explore the research on key topics including: age stereotypes, age identities, and messages of ageism; the role of culture, gender, ethnicity, and being a member of marginalized groups; the ingredients of intergenerational communication; depiction of aging and youth in the media; and how and

why talk about death and dying can be instrumental in promoting control over life's demands. *Communication for Successful Aging* is essential reading for graduate students of psychology, human development, gerontology, and communication, scholars in the social sciences, and all of us concerned with this complex academic and highly personal topic.

WORKING WITH COMMUNICATION AND SWALLOWING DIFFICULTIES IN OLDER ADULTS

Taylor & Francis This accessible resource offers valuable guidance for all student and practising speech and language therapists (SLTs) who are working with older people with communication and swallowing difficulties. Chapters provide up-to-date theory on age-related changes alongside practical strategies for clinicians to use in their daily work, from help with mental capacity decisions to supporting older people with good palliative care. Promoting a holistic approach for ageing well, this resource dispels myths that surround the ageing process while detailing the normal physiological and psychological effects of ageing on communication and swallowing, as well as diseases and conditions associated with older age, such as frailty. Illustrated throughout with clinical case studies and helpful photocopiable resources to use in practice, this book is a key part of the tool kit for any speech and language therapist working with older adults.

COMMUNICATION, TECHNOLOGY AND AGING

OPPORTUNITIES AND CHALLENGES FOR THE FUTURE

Springer Publishing Company In this volume, acknowledged experts present state of the art reviews and empirical data on how aging affects personal communication, and how technology can contribute to improving communication efficacy. Chapters are divided into three sections. The first section provides a basic overview of issues in this field. The second section deals with socio-cultural issues. The final section addresses issues around training and compensation. The volume contains new research on heretofore unexplored areas within the field of aging, such as: computer use and design, internet use, and computer literacy. For gerontologists, psychologists, and other professionals interested in aging.

PERSON-CENTERED COMMUNICATION WITH OLDER ADULTS

THE PROFESSIONAL PROVIDER'S GUIDE

Academic Press Providers serving older adults face a growing problem. Older adults are becoming increasingly dissatisfied with service quality citing deficits in provider communication and relationship skills. The author argues this dissatisfaction is largely related to three widespread issues: ageism, use of professional jargon, and age-related changes in the older adult. To address these concerns, Dr. Storlie advocates adoption of an evidence-based, person-centered approach to communication. The benefits of person-centered communication are many. They can increase older adult satisfaction with provider services, enhance mutual respect and understanding, improve accuracy of information exchanged, positively impact service outcomes, increase compliance with provider recommendations, and reduce the frustration and stress often experienced by both provider and older adult. Rare to this genre, readers are introduced to several under-explored topics within the field of communication, along with methods for applying concepts from research findings into these topics to enhance the quality of interpersonal communication. Topics include the role of mental imagery in the communication process, the influence of neurocardiology on relationships, and controversial findings from research into quantum physics. The book concludes by highlighting progress made in narrowing the interpersonal communication gap and forecasts how communications-oriented technological advances might improve quality of life for 21st century older adults and the providers who serve them. Utilizing interdisciplinary case studies to illustrate common problematic situations, this book provides detailed exercises that explain how providers can integrate person-centered communication into their practices to improve provider-older adult interactions. Written in a style designed to maximize learning, it helps providers find the information they need, understand what they read, and apply what they've learned to improve professional communication. *Person-Centered Communication with Older Adults* is an essential guide for today's healthcare professionals and other aging-services providers, and also for the educators who help to prepare the providers of tomorrow. Presents a conceptual framework for understanding respect-based, person-centered communication Teaches specific communication skills to aging services providers and educators to assist in effectively communicating with older adults Includes numerous case studies to help in identifying common problematic situations and describing practical ways to integrate positive communication One of the first books to integrate scientific, evidence-based findings with a personal approach that includes important new information on neurocardiology

BUILDING DESIGN FOR HANDICAPPED AND AGED PERSONS

McGraw-Hill Companies Reviews issues in the design, construction, and management of tall buildings that meet the special needs of the disabled and the elderly. Also considers legislative aspects. Cites case studies from a number of countries, and discusses nonevacuative designs, guidance systems, smart technology, and other topics. Of interest to people in design, construction, and social and behavioral sciences. Annotation copyrighted by Book News, Inc., Portland, OR

COMMUNICATION, HEALTH, AND THE ELDERLY

Manchester University Press

INTERGENERATIONAL COMMUNICATION ACROSS THE LIFE SPAN

Routledge Individuals of all ages interact with one another, and their interactions have significance throughout their lives. This distinctive volume acknowledges the importance of these interactions and provides a life-span developmental view of communication and aging, attempting to capture the many similarities and changes that occur in people's lives as they age. The authors move the study of intergenerational contact closer to the actual participants, examining what happens within intergenerational interactions and

how people evaluate their intergenerational experiences. The volume concentrates on the micro-context of the intergenerational interaction and the cognitions, language, and relationship behaviors related to intergenerational communication across the life span. The volume employs the perspective that the understanding of human behavior across the life span is enhanced by studying communicative behavior in intergenerational interaction. The authors integrate research from multiple disciplines concerned with intergenerational communication, which is framed by several unique theoretical perspectives drawn from the communication discipline. As a resource for the study of intergenerational communication across the life span, this monograph offers important insights to scholars, students, and all who are involved in intergenerational communication.

HUMAN ASPECTS OF IT FOR THE AGED POPULATION. HEALTHY AND ACTIVE AGING

SECOND INTERNATIONAL CONFERENCE, ITAP 2016, HELD AS PART OF HCI INTERNATIONAL 2016 TORONTO, ON, CANADA, JULY 17-22, 2016, PROCEEDINGS, PART II

Springer The two LNCS volume set 9754-9755 constitutes the refereed proceedings of the Second International Conference on Human Aspects of IT for the Aged Population, ITAP 2016, held as part of the 18th International Conference on Human-Computer Interaction, HCI 2016, held in Toronto, ON, Canada, in July 2016, jointly with 14 other thematically conferences. The total of 1287 papers and 186 poster papers presented at the HCI 2016 conferences were carefully reviewed and selected from 4354 submissions. LNCS 9754, *Design for Aging (Part I)*, addresses the following major topics: designing for and with the elderly; technology use and acceptance by older users; psychological and cognitive aspects of interaction and aging; mobile and wearable technologies for the elderly. LNCS 9755, *Healthy and Active Aging (Part II)*, addresses these major topics: smart and assistive environments; aging and social media; aging, learning, training and games; and aging, mobility and driving.

CROSS-CULTURAL COMMUNICATION AND AGING IN THE UNITED STATES

Routledge Recently, the communication discipline has devoted increasing energy toward the study of aging, yet most of the research has insufficiently addressed a crucial factor in communicative relationships--culture. Meanwhile, cross-cultural/intercultural communication has not adequately addressed the aging process. Combining three powerful elements--communication, aging, and culture--all of which have an increasingly profound impact on today's multicultural society, this book focuses on older Americans in various communicative contexts within the framework of their cultures. Composed of original research by experts in their respective fields, the book combines communication, aging, and culture for a unique examination of those elements in American society. Section 1 deals with perspectives in cross-cultural communication and aging. These perspectives both illustrate the issues that greatly affect the lives of our elders and suggest ways to improve their status. Section 2 showcases three American co-cultures: Hawaiian, Arab, and Mormon illustrate how language, attitudes, and mentoring can serve as the links for maintaining cross-generational continuity in multicultural society. Section 3 demonstrates that many American organizations frequently contribute to the hardships that both internal elder customers (employees) and external elder customers (residents and patients) must endure. Section 4 incorporates popular culture and aging. It presents the role of selective popular media in portraying our elders. Because Americans rely heavily on the media, their mediated perceptions can have a profound impact on their attitudes toward the older population. Designed as a reader or supplementary text for college students in communication, gerontology, anthropology, sociology, and other related fields, this text can also be used by professionals in gerontological service areas, by libraries, and as a personal reference. It offers extensive appendices, figures, and tables for additional reference.

AGING AND SOCIAL COMMUNICATION

A COMPARISON OF ELDERLY AND MIDDLE-AGED ADULTS

AGING, COMMUNICATION, AND HEALTH

LINKING RESEARCH AND PRACTICE FOR SUCCESSFUL AGING

Routledge This collection highlights the current efforts by scholars and researchers to understand the aging process as it relates to the health of older adults. With contributions from international scholars in communication, psychology, public health, medicine, nursing, and other areas, this volume emphasizes communication as a critical research, education, policy, and practice issue for the design, provision, and evaluation of health and social services for older adults. Organized into sections addressing communication developments in the healthcare arena, issues in provider-patient communication, and the relationships between family communication and health. The chapters cover critical topics related to successful aging, such as Alzheimer's disease, managed care and older adults, communication issues of severe dementia, and healthcare decision-making within families. The editors have designed this volume to be accessible to a broad audience, including scholars and students of aging and communication, healthcare practitioners with older clients, and aging individuals and their families who are pursuing strategies for successful aging. The chapters represent the highest levels of current scholarship on communication, aging, and health, providing a strong foundation for future research. Each contribution also addresses the applied implications of this research, offering practical guidance to readers dealing with these issues in their own lives. As a whole, *Aging, Communication, and Health* represents a major advance toward understanding the importance and application of communication for successful aging.

COMMUNICATION YEARBOOK 22

Routledge *Communication Yearbook 22* contains in-depth literature reviews focused on an important topic in specialized areas as well as syntheses that describe scholarship in other domains. Each chapter addresses an aspect of one of the most pressing issues currently facing individuals: how to communicate with people from different backgrounds or cultures. The first two chapters examine the ways sex differences and cross-cultural differences affect communication behavior. The following three chapters focus on harmful

speech, the effects of pornography on criminal sexual offenders and personalization of conflict. Further chapters focus on argumentation, organizational settings and government/media relations as well as styles of customer service, communication within families with aging parents and intercultural friendship.

UNDERSTANDING COMMUNICATION AND AGING

DEVELOPING KNOWLEDGE AND AWARENESS

SAGE Publications *"This interesting, easy-to-read book provides a comprehensive framework for considering communication and aging in the context of biology, sociology, and psychology. This thought provoking book is strongly anti-ageist. It could serve as a broad overview for anyone interested in the myriad of issues related to communication and aging." —CHOICE "Understanding Communication and Aging achieves a nice balance between the facts of growing old, the social forces that shape that process, and the communication factors that connect these two domains. With attention to both research and everyday applications, the text is thorough and inviting. I am delighted that a user-friendly, undergraduate text has finally been produced in the field of communication and aging. This book deserves to be an instant and sustained success." —Sandra Metts, Illinois State University "This book has so many strengths. I am especially pleased with the communication focus and the discussions on cultural issues, new technologies, and identities. I am impressed by Dr. Harwood's creativity and reaching out to learners via the use of info boxes, significant achievement profiles, literary/artistic descriptions, selected detailed summaries of research, and quotations about aging. All of these features auger very well for student learning and enthusiasm. I commend Dr. Harwood for his attention to detail, targeting multiple learning styles, and attending to instructors who value these kinds of features." —Jim L. Query, Jr., University of Houston "The way Professor Harwood ties together theory, research, and everyday experience into a text that is accessible, interesting, and fun to read is impressive. The focus is not merely psychological or interpersonal; the book spans multiple disciplines. This text is the total package!" —Jo Anna Grant, California State University, San Bernardino* *Understanding Communication and Aging is the most accessible introduction to the many ways aging in the 21st century is influenced by human communication processes, from face-to-face conversation to mass media representations. With a lively presentation, author Jake Harwood presents central research findings while engaging students with important questions concerning communication and aging. Key Features Covers the broad area of communication and older adulthood: The book examines key topics such as interpersonal and family relationships in old age, media portrayals of aging, cultural variations in intergenerational communication, and health communication in old age. Shatters the myths and stereotypes of aging: The book's orientation and perspective is on "healthy" living and aging. This anti-ageist approach encourages readers to reexamine their views on aging and become fluent at defending and promoting an anti-ageist ideology. Provides concrete examples: While taking a theoretical approach, the book includes coverage of applied issues such as health communication and age-related prejudice and discrimination.*

COMMUNICATION AND AGING

CREATIVE APPROACHES TO IMPROVING THE QUALITY OF LIFE

Plural Publishing

CONTEMPORARY PERSPECTIVES ON AGEISM

Springer *This open access book provides a comprehensive perspective on the concept of ageism, its origins, the manifestation and consequences of ageism, as well as ways to respond to and research ageism. The book represents a collaborative effort of researchers from over 20 countries and a variety of disciplines, including, psychology, sociology, gerontology, geriatrics, pharmacology, law, geography, design, engineering, policy and media studies. The contributors have collaborated to produce a truly stimulating and educating book on ageism which brings a clear overview of the state of the art in the field. The book serves as a catalyst to generate research, policy and public interest in the field of ageism and to reconstruct the image of old age and will be of interest to researchers and students in gerontology and geriatrics.*

REPORTS OF THE SPECIAL CONCERNS SESSIONS ON AGING AND BLINDNESS

PHYSICAL AND VOCATIONAL REHABILITATION OF OLDER PEOPLE AND REPORT ON AGING AND DEAFNESS

AGE AS AN EQUALITY ISSUE

LEGAL AND POLICY PERSPECTIVES

Hart Publishing *To what extent is age inevitably linked with declining capacity? What are the goals of a policy on age equality, and how can these be realized in law? How should law and policy address age discrimination in health, education and employment? Should young people be dealt with in the same way as older people? This book answers these questions in a series of chapters by experts from a wide range of disciplines. It examines the nature of the aging process and provides a detailed analysis of the concept of age equality.*

FAMILIES CARING FOR AN AGING AMERICA

National Academies Press *Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family*

caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

COMMUNICATION AND SWALLOWING CHANGES IN HEALTHY AGING ADULTS

Jones & Bartlett Publishers *Communication and Swallow Changes in Healthy Aging Adults* compiles and presents the available research on healthy aging adults performance and abilities in the following areas: auditory comprehension, reading comprehension, speaking, writing, voice and motor speech abilities, cognition, and swallowing. This text also presents principles from the World Health Organization's International Classification of Functioning, Disability and Health and its applications to aging adults. One of the first texts to cover these principles, this book will address the need for a comprehensive view of communication and swallow issues in aging for students of speech-language pathology. Speech-language pathologist students will learn how to fully compare what would be considered normal for their elderly patients rather than overestimating or underestimating what aging adults are capable of doing. Knowing what would be considered within the spectrum of normal, will help speech-language pathologists to address therapy as effectively as possible. Having this information at hand is particularly important as the nation's population is aging at a rapid rate and there is a need for evidence-based practice in speech-language pathology. Written in an easy to follow format, *Communication and Swallow Changes in Healthy Aging Adults* includes original research data, discussion questions and a list of Quick Facts at the end of each chapter to summarize key points. This text will serve as a useful resource as students see elderly clients in on-campus speech and hearing clinics and when they intern at hospitals and long-term care facilities. Instructor Resources: PowerPoint Slides and an Image Bank Testimonial: *Communication and Swallowing Changes in Healthy Aging Adults* is a handy text, portable, and logically organized. The information is easy to follow complimented by information presented in tables/charts. This text would be helpful to a practicing therapist when making a differential diagnosis between a normal vs. atypical aging process. *Communication and Swallowing Changes in Healthy Aging Adults* would be an appropriate text for courses in Communications Disorders Departments for graduate students in a neuro course or a neurogenic communication disorders course, and in lifespan development courses as in the field of Psychology and Gerontology. Susan Durnford, M.S., CCC-SLP, Clinical Assistant Professor, Department of Speech-Language Pathology & Audiology, Ithaca College"

HUMAN ASPECTS OF IT FOR THE AGED POPULATION. ACCEPTANCE, COMMUNICATION AND PARTICIPATION

4TH INTERNATIONAL CONFERENCE, ITAP 2018, HELD AS PART OF HCI INTERNATIONAL 2018, LAS VEGAS, NV, USA, JULY 15-20, 2018, PROCEEDINGS, PART I

Springer This book constitutes the proceedings of the 4th International Conference on Human Aspects of IT for the Aged Population, ITAP 2018, held as part of the 20th International Conference, HCI International 2018, which took place in Las Vegas, Nevada, in July 2018. The total of 1171 papers and 160 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4346 submissions. ITAP 2018 includes a total of 84 papers. They were organized in topical sections as follows: Part I: aging and technology acceptance; aging and interaction; intergenerational communication and social participation. Part II: health care technologies and services for the elderly; intelligent environments for aging; and games and entertainment for the elderly.
