Médecin, alors que la médecine est encore un discours plutôt qu'une science, il tire de sa formation un regard aiguisé et le sens de l'observation qui lui permettent d'occuper une place de choix parmi les savants qui ont contribué à la naissance de l'archéologie, terme qu'il est le premier à employer et à définir dans la préface de son ouvrage : Miscellanae eruditae antiquitatis (1679). Il révèle les antiquités de sa ville, et écrit la première histoire imprimée de Genève. Bravant la peste et les corsaires, le mauvais temps et les brigands, il voyage de 1674 à 1676 et fait découvrir à ses contemporains l'Italie, la côte Dalmate, la Grèce et le Levant, dans une relation qui fut traduite en plusieurs langues, et qui devint le guide des voyageurs instruits jusqu'à l'époque romantique. Protestant convaincu, il préfère s'exiler plutôt que d'abjurer, et meurt à Vevey, en décembre 1685, deux mois après la révocation de l'Edit de Nantes.**

Here leadership scholar Jean Lipman-Blumen explains what makes the followers tick, exploring why people will tolerate--and remain loyal to--leaders who are destructive to their organizations, their employees, or their nations. Why do we knowingly follow, seldom unseat, frequently prefer, and sometimes even create toxic leaders? Lipman-Blumen argues that these leaders appeal to our deepest needs, playing on our anxieties and fears, on our yearnings for security, high self-esteem, and significance, and on our desire for noble enterprises and immortality. She also explores how followers inadvertently keep themselves in line by a set of insidious control myths that they internalize. For example, the belief that the leader must necessarily be in a position to "know more" than the followers often stills their objections. In addition, outside forces--such as economic depressions, political upheavals, or a crisis in a company--can increase our anxiety and our longing for charismatic leaders. Lipman-Blumen shows how followers can learn critical lessons for the future and survive in the meantime. She discusses how to confront, reform, undermine, blow the whistle on, or oust a toxic leader. And she suggests how we can diminish our need for strong leaders, identify "reluctant leaders" among competent followers, and even nurture the leader within ourselves. Toxic leaders charm, manipulate, mistreat, weaken, and ultimately devastate their followers. The Allure of Toxic Leaders tells us how to recognize these leaders before it's too late.
