The exams are important for any single doctor-to-be and are compulsorily required. This book is written by students who took the USMLE and sharing their experiences. The questions are not as typical as the real test questions but the topics are brought up in more than one USMLE test. The questions are repeated because they contain important information and recalled by several students who took the test. They are not violating the rules by sharing important topics instead; they feel the duty to help other medical students and foreign doctors as they are helped before.
