### The Economics of Quality, Grades and Brands (Routledge Revivals)

**Routledge** Virtually every decision to produce, buy or sell is influenced by quality, yet until this book was first published in 1992, there had been very little attempt to produce a comprehensive and practical theory for this. Here, Peter Bowbrick brings together different traditions of quality analysis from economics, marketing economics and marketing itself to identify the limitations of the different traditions of quality economics and some approaches to its analysis. Beginning with a definition of the subject and the concepts involved, this comprehensive title will be of particular value to students of Economics, Marketing and Business Studies.

## Handbook of Biofuels Production

**Woodhead Publishing** Handbook of Biofuels Production, Second Edition, discusses advanced chemical, biochemical, and thermochemical biofuels production routes that are fast being developed to address the global increase in energy usage. Research and development in this field is aimed at improving the quality and environmental impact of biofuels production, as well as the overall efficiency and output of biofuels production plants. The book provides a comprehensive and systematic reference on the range of biomass conversion processes and technology. Key changes for this second edition include increased coverage of emerging feedstocks, including microalgae, more emphasis on by-product valorization for biofuels' production, additional chapters on emerging biofuel production methods, and discussion of the emissions associated with biofuel use in engines. The editorial team is strengthened by the addition of two extra members, and a number of new contributors have been invited to work with authors from the first edition to revise existing chapters, thus offering fresh perspectives. Provides systematic and detailed coverage of the processes and technologies being used for biofuel production Discusses advanced chemical, biochemical, and thermochemical biofuels production routes that are fast being developed to address the global increase in energy usage Reviews the production of both first and second generation biofuels Addresses integrated biofuel production in biorefineries and the use of waste materials as feedstocks

## The World Bank Glossary

## English-Spanish, Spanish-English

**Washington, D.C. : World Bank** This edition of the World Bank has been revised and expanded by the Terminology Unit in the Languages Services Division of the World Bank in collaboration with the English, Spanish, and French Translation Sections. The Glossary is intended to assist the Bank's translators and interpreters, other Bank staff using French and Spanish in their work, and free-lance translator's and interpreters employed by the Bank. For this reason, the Glossary contains not only financial and economic terminology and terms relating to the Bank's procedures and practices, but also terms that frequently occur in Bank documents, and others for which the Bank has a preferred equivalent. Although many of these terms, relating to such fields as agriculture, education, energy, housing, law, technology, and transportation, could be found in other sources, they have been assembled here for ease of reference. A list of acronyms occurring frequently in Bank texts (the terms to which they refer being found in the Glossary) and a list of international, regional, and national organizations will be found at the end of the Glossary.

## Biogas Technology, Transfer and Diffusion

**Springer Science & Business Media** The International Conference on the State of the Art on Biogas Technology, Transfer and Diffusion was held in Cairo, Egypt, from 17 to 24 November 1984. The Conference was organized by the Egyptian Academy of Scientific Research and Technology (ASR T), the Egyptian National Research Centre (NRC), the Bioenergy Systems and Technology project (BST) of the US Agency for International Development (US/AID) Office of Energy, and the National Academy of Sciences (NAS). A number of international organizations and agencies co-sponsored the Conference. More than 100 participants from 40 countries attended. The purpose of the Conference was to assess the viability of biogas technology (BGT) and propose future courses of action for exploiting BGT prospects to the fullest extent. The Conference emphasized a balanced coverage of technical, environmental, social, economic and organizational aspects relevant to biogas systems design, operation and diffusion. It was organized to incorporate experiences that are pertinent, for the most part, to developing countries. In addition to the wide spectrum of presentations and country programs, structured and non-structured discussions among the participants were strongly encouraged in thematic sessions at round-table discussions, and through personal contacts during poster sessions and field trips. It was clear from the enthusiastic response of most participants that the Conference, in large measure, succeeded in fulfilling its mission. Although draft papers were distributed to all participants, it was felt that the results obtained were worthy of organized and refined documentation. And this is precisely what this book intends to do.

## Fatal Journeys

## Tracking Lives Lost During Migration

**UN** In October 2013, over 400 people lost their lives in two shipwrecks close to the Italian island of Lampedusa. While these two events were highly publicized, sadly they are not isolated incidents; the International Organization for Migration (IOM) estimates that in 2013 and 2014 nearly 6,500 migrants lost their lives in border regions around the world. Because many deaths occur in remote areas and are never reported, counts of deaths fail to capture the full number of lives lost. Despite recognition that actions must be taken to stop more unnecessary deaths, as yet there remains very little information on the scale of the problem. The vast majority of governments do not publish numbers of deaths, and counting lives lost is largely left to civil society and the media. Drawing upon data from a wide range of sources from different regions of the world, *Fatal Journeys: Tracking Lives Lost during Migration* investigates how border-related deaths are documented, who is documenting them, and what can be done to improve the evidence base to encourage informed accountability, policy and practice. Regionally focused chapters present most recent statistics and address a number of key questions regarding how migrant border-related deaths are enumerated
