Saab Celebration

Swedish Style Remembered

Pen and Sword Transport Saab has gone, but its cars and its loyal band of owners remain. In this photographic album, internationally known Saab author and commentator Lance Cole celebrates all things Saab. In a collection of over 200 photographic images accompanied by a detailed yet engaging commentary, the book delivers a record of Saab from its first car to its last. The engineering, design, and ethos of Saab's cars across the generations are captured in all their glory. The author of many Saab articles and several Saab books, this is Lance Cole's new view on Sweden's other car maker - one that really did build cars to a different standard. Saab Celebration is designed to be a memorial companion for the Saab fan. If you like Saabs, then enjoy this tribute to all things Saab.

Lemon-Aid Used Cars and Trucks 2011-2012

Dundurn As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 20112012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an expos of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers cant beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

Lemon-Aid Used Cars and Trucks 2009-2010

Dundurn For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

Journal of the House of Representatives of the United States

Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House".

Lemon-Aid Used Cars and Trucks 2010-2011

Dundurn "The automotive maven and former Member of Parliament might be the most trusted man in Canada, an inverse relationship to the people he writes about." - The Globe and Mail Lemon-Aid shows car and truck buyers how to pick the cheapest and most reliable vehicles from the past 30 years of auto production. This brand-new edition of the bestselling guide contains updated information on secret service bulletins that can save you money. Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

Designated Drivers

How China Plans to Dominate the Global Auto Industry

John Wiley & Sons An in-depth look at the Chinese car industry that sheds new light on the delicate nature of China's planned economy China's unprecedented growth over the last three decades, along with the recent financial crisis in the West, has raised questions about the superiority of state-led capitalism. In Designated Drivers: How China Plans to Dominate the Global Auto Industry, G.E. Anderson, a specialist in finance and Chinese political economics, uses the auto industry to examine how China's industrial planning works, and explores whether state involvement in the economy really is a winning formula for sustainable growth. Bringing to light the strengths and weaknesses that define the Chinese economy, Anderson finds that in some ways the government has become its own worst enemy, unable to choose between industrial competitiveness and social stability. While the economy is booming now, evidence suggests that long-term success is far from assured. Tracing the evolution of the post-Mao auto industry through thirteen case studies, Designated Drivers raises the difficult questions about the future of China that few people have dared to ask. Offers a unique insight into the

Chinese economy through the lens of the auto industry Explores how successful the central government has been in spurring economic growth and the long-terms costs of intervention Uses case studies to illustrate China's explosive growth over the last three decades A painstakingly researched analysis of the Chinese automobile industry, Designated Drivers explains the risks and rewards inherent in doing business in China that anyone interested in, or already working there need to understand.

Customer-Oriented Quality Management in the Automotive Industry

In Cooperation with Saab Automobile AB, Trollhättan

diplo.m.de Inhaltsangabe:Abstract: In times of severe competition, it is of crucial importance to create a competitive advantage to differentiate from the competitors and to sustain the business of the company. This thesis intends to show that a customer-focused quality management is one way to create a sustainable competitive advantage. Quality controls along the whole value chain -before, during and after production- leads to failure free products, which save costs on the one hand and have thus a positive influence on the company's revenue. On the other hand failure free products that meet the customers expectations lead to satisfied customers who build up a brand loyalty and conduct retention sales, which have a positive influence on the company's sales, market share as well as the overall image. Furthermore, this thesis points out that it is important to listen to the voice of the customers and get an insight in the customer's needs and wants. To fulfil or even exceed their expectations leads to customer satisfaction, which is a key to success in today's business world. In addition, the customer demands in regard of quality are growing continuously and new technologies are appearing on the markets on a regular basis. Therefore the producers are forced to keep to the latest technology developments and to get hold on the changing customer needs. But even without this external pressure, quality improvement is justified from a cost point of view. The applicability of a customer-oriented quality management is shown in the practical part of this thesis, when the quality of the Saab models is analyzed from the customer's perspective. Due to the arguments, outlined in this thesis, it can be summarized that a quality management with a focus on the needs of the customers in should become a core strategy of any company producing and selling products in order to create customer satisfaction and sustain the business. This thesis deals with the field of quality management in the context of customer satisfaction. To show the practical applicability of quality management, this thesis is looking at how quality management is conducted in the automotive industry, as we compare the Initial Quality Study (IQS) from the market research institute J. D. Power with a survey that was internally conducted at the Saab Automobile AB. Today's business environment creates a growing need for quality management. Tougher competition leads to the demand for cost savings and higher [...]

Auto Brand

Building Successful Car Brands for the Future

Kogan Page Publishers The car - once everybody's dream and a key status symbol in most countries and cultures - has been extensively questioned in the last decades and in the last few years particularly. Urbanisation, traffic congestion, pollution problems, heavy reliance on scarce oil supplies, safety issues and ever-growing competition, have all provided significant business challenges for the automotive industry. Many car manufacturers have had to fundamentally rethink their design, brand and marketing strategies to thrive in a savvy, consumer-led culture, and markets that are becoming increasingly restrictive in size and opportunity. Auto Brand provides a roadmap to branding and marketing success in the automotive industry from a leading industry expert and features:

- Case studies on major car brands personally conducted by the author including: Audi, BMW, Holden, Mercedes-Benz, Opel, Porsche, Saab, Seat, Skoda, Vauxhall, Volkswagen, and Volvo
- The findings from 100 interviews conducted with CEOs, marketing managers, sales managers, sales people, after sales managers at all levels from the manufacturer level to small rural dealers, as well as industry experts, policy makers, free-stranding repair shops and professional organizations
- The results of a new international study on car buyer behaviour based on 4,700 survey answers

Auto Brand is essential reading for marketing managers, sales managers, CEOs, development managers and dealers in all types of companies in the car industry including: manufacturers, national sales companies/importers, dealers, finance companies, insurance companies, free-standing repair shop channels and more. The first book to specifically address how to deal with the challenges facing the automotive industry it illustrates how companies can take advantage of new technologies, adapt to emerging trends in consumer behaviour, improve profitability and build even more successful brands in the future.
