### The Mind Map Level 3 Lower-intermediate American English

Cambridge University Press The graded readers series of original fiction, adapted fiction and factbooks especially written for teenagers. Lucho and Eva are paired together for a History project. The first stage is to draw a 'Mind Map' of all their ideas. But Lucho's mind map has a mind of its own and starts to grow. The map leads Lucho and Eva on an adventure involving the ancient theft of gold in a lost city in the Colombian jungle. This paperback is in American English. Audio recordings of the text are available on our website at: [www.cambridge.org/elt/discoveryreaders/ame](http://www.cambridge.org/elt/discoveryreaders/ame) Cambridge Experience Readers, previously called Cambridge Discovery Readers, get your students hooked on reading.

### Think 3B Student's Book and Workbook Quick

Cambridge University Press Challenge and inspire your teenage learners to think beyond language. Think is a fresh, vibrant and upbeat course designed to engage teenage learners and make them think. As well as building students' language skills, it offers a holistic approach to learning: developing their thinking skills, encouraging them to reflect on values and building self-confidence. Topics are chosen to appeal to and challenge teenagers, firing their imagination and ensuring effective learning. This split combo edition includes 4 Students' Book and Workbook units combined plus access to the online learning management platform with extra resources interactive activities. Teachers can use the platform to track students' progress and ensure more effective learning.

### The Atlas of North American English

### Phonetics, Phonology and Sound Change

Walter de Gruyter The Atlas of North American English provides the first overall view of the pronunciation and vowel systems of the dialects of the U.S. and Canada. The Atlas re-defines the regional dialects of American English on the basis of sound changes active in the 1990s and draws new boundaries reflecting those changes. It is based on a telephone survey of 762 local speakers, representing all the urbanized areas of North America. It has been developed by Bill Labov, one of the leading sociolinguists of the world, together with his colleagues Sharon Ash and Charles Boberg. The Atlas consists of a printed volume accompanied by an interactive CD-ROM. The print and multimedia content is also available online. Combined Edition: Book and Multimedia CD-ROM The book contains 23 chapters that re-define the geographic boundaries of North American dialects and trace the influence of gender, age, education, and city size on the progress of sound change; findings that show a dramatic and increasing divergence of English in North America; 139 four color maps that illustrate the regional distribution of phonological and phonetic variables across the North American continent; 120 four color vowel charts

of individual speakers. The multimedia CD-ROM supplements the articles and maps by providing a data base with measurements of more than 100,000 vowels and mean values for 439 speakers; the Plotnik program for mapping each of the individual vowel systems; extended sound samples of all North American dialects; multimedia applications to enhance classroom presentations. Online Version: Book and CD-ROM content plus additional data The online version comprises the contents of the book and the multimedia CD-ROM along with additional data. It presents a wider selection of data, maps, and audio samples that will be recurrently updated; proffers simultaneous access to the information contained in the book and on the multimedia CD-ROM to all users in the university/library network; provides students with easy access to research material for classroom assignments. For more information, please contact Mouton de Gruyter: [customerservice@degruyter.com](mailto:customerservice@degruyter.com) System Requirements for CD-ROM and Online Version Windows PC: Pentium PC, Windows 9x, NT, or XP, at least 16MB RAM, CD-ROM Drive, 16 Bit Soundcard, SVGA (600 x 800 resolution) Apple MAC: OS 6 or higher, 16 Bit Soundcard, at least 16MB RAM Supported Browsers: Internet Explorer, 5.5 or 6 (Mac OS: Internet Explorer 5.1)/Netscape 7.x or higher/Mozilla 1.0 or higher/Mozilla Firefox 1.0 or higher Plugins: Macromedia Flash Player 6/Adobe Reader

## A Survey of Modern English

Routledge Fully revised and updated, the second edition of this authoritative guide is a comprehensive, scholarly and systematic review of modern English. In one volume the book presents a description of both the linguistic structure of present-day English and its geographical, social, gender, and ethnic variations. Covering new developments such as the impact of email on language and corpus-based grammars, this accessible text has been extensively rewritten and brings the survey of modern English right up to date. It also offers new examples and suggestions for further reading.

## Current Geographical Publications

Current Geographical Publications (CGP) is a non-profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York. Beginning in 2006, the format changed to include the tables of contents of current geographical journals. The journal titles listed link to web pages or PDF scans of the current issue's contents.

# Lexical Tone Perception in Infants and Young Children: Empirical studies and theoretical perspectives

Frontiers Media SA In psycholinguistic research there has traditionally been a strong emphasis on understanding how particular language types of are processed and learned . In particular, Romance and Germanic languages (e.g. English, French, German) have, until recently, received more attention than other types, such as Chinese languages. This has led to selective emphasis on the phonological building blocks of European languages, consonants and vowels, to the exclusion of lexical tones which, like consonants and vowels, determine lexical meaning, but unlike consonants and vowels are based on pitch variations. Lexical tone is pervasive; it is used in at least half of the world' languages (Maddieson, 2013), e.g., most Asian and some African, Central American, and European languages. This Research Topic brings together a collection of recent empirical research on the processing and representation of lexical tones across the lifespan with an emphasis on advancing knowledge on how tone systems are acquired. The articles focus on various aspects of tone: early perception of tones, influences of tone on word learning, the acquisition of new tone systems, and production of tones. One set of articles report on tone perception at the earliest stage of development, in infants learning either tone or non-tone languages. Tsao and Chen et al. demonstrate that infants' sensitivity to Mandarin lexical tones, as well as pitch, improves over the first year of life in native and non-native learners in contrast to traditional accounts of perceptual narrowing for consonants and vowels. Götz et al. report a different pattern of perception for Cantonese tones and further demonstrate influences of methodological approaches on infants' tone sensitivity. Fan et al. demonstrate that sensitivity to less well-studied properties of tone languages, such as neutral tone, may develop after the first year of life. Cheng and Lee ask a similar question in an electrophysiological study and report effects of stimulus salience on infants' neural response to native tones. In a complementary set of studies focused on tone sensitivity in word learning, Burnham et al. demonstrate that infants bind tones to newly-learned words if they are learning a tone language, either monolingually or bilingually; although it was also found that object-word binding was influenced by the properties of individual tones. Liu and Kager chart a developmental trajectory over the second year of life in which infants narrow in their interpretation of non-native tones. Choi et al. investigate how learning a tone language can influence uptake of other suprasegmental properties of language, such as stress, and demonstrate that native tone sensitivity in children can facilitate stress sensitivity when learning a stress-based language. Finally, two studies focus on sensitivity to pitch in a sub-class tone languages: pitch accent languages. In a study on Japanese children's abilities to recognise words they know, Ota et al. demonstrate a limited sensitivity to native pitch contrasts in toddlers. In contrast, Ramachers et al. demonstrate comparatively strong sensitivity to pitch in native and non-native speakers of a different pitch accent system (Limburghian) when learning new words. Several studies focus on learning new tone systems. In a training study with school-aged children, Kasisopa et al. demonstrate that tone language experience increases children's abilities to learn new tone contrasts. Poltrock et al. demonstrate similar advantages of tone experience in learning new tone systems in adults. And in an electrophysiological study, Liu et al. demonstrate order effects in adults' neural responses to new tones, discussing implications for learning tone languages as an adult. Finally, Hannah et al. demonstrate that extralinguistic cues, such as facial expression, can support adults' learning of new tone systems. In three studies investigating tone production, Rattansone et al. report the results of a study demonstrating kindergartners' asynchronous mastery of tones - delayed acquisition of tone sandhi forms relative to base forms. In a study interrogating a corpus of adult tone production, Han et al. demonstrate that mothers produce tones in a distinct manner when speaking to infants; tone differences are emphasised more when speaking to infants than to adults. Combining perception and production of tones, Wong et al. report asynchronous development of tone perception and tone production in children. The Research Topic also includes a series of Opinion pieces and Commentaries addressing the broader relevance of tone and pitch to the study of language acquisition. Curtin and Werker discuss ways in which tone can be integrated into their model of infant language development (PRIMIR). Best discusses the phonological status of lexical tones and considers how recent empirical research on tone perception bears on this question. Kager focuses on how language learners distinguish lexical tones from other sources of pitch variation (e.g., affective and pragmatic) that also inform language comprehension. Finally, Antoniou and Chin unite evidence of tone sensitivity from children and adults and discuss how these areas of research can be mutually informative. Psycholinguistic studies of lexical tone acquisition have burgeoned over the past 13 years. This collection of empirical studies and opinion pieces provides a state-of-the-art panoply of the psycholinguistic study of lexical tones, and demonstrate its coming of age. The articles in this Research Topic will help address the hitherto Eurocentric non-tone language research emphasis, and will contribute to an expanding narrative of speech perception, speech production, and language acquisition that includes all of the world's languages. Importantly, these studies underline the scientific promise of drawing from tone languages in psycholinguistic research; the research questions raised by lexical tone are unique and distinct from those typically applied to more widely studied

languages and populations. The comprehensive study of language acquisition can only benefit from this expanded focus.

Complete Latin American Spanish Beginner to Intermediate Course

Learn to read, write, speak and understand a new language

[Teach Yourself Do you want to develop a solid understanding of Latin American Spanish and communicate confidently with others? Through authentic conversations, vocabulary building, grammar explanations and extensive practice and review, Complete Latin American Spanish will equip you with the skills you need to use Latin American Spanish in a variety of settings and situations, developing your cultural awareness along the way. What will I achieve by the end of the course? By the end of Complete Latin American Spanish you will have a solid intermediate-level grounding in the four key skills - reading, writing, speaking and listening - and be able to communicate with confidence and accuracy. Is this course for me? If you want to move confidently from beginner to intermediate level, this is the course for you. It's perfect for the self-study learner, with a one-to-one tutor, or for the beginner classroom. It can also be used as a refresher course. What do I get? -13 learning units plus verbs reference and word glossary and revision section -Discovery Method - figure out rules and patterns to make the language stick -Teaches the key skills - reading, writing, listening, and speaking -Learn to learn - tips and skills on how to be a better language learner -Culture notes - learn about the people and places of Latin America -Outcomes-based learning - focus your studies with clear aims -Authentic listening activities - everyday conversations give you a flavor of real spoken Latin American Spanish -Test Yourself - see and track your own progress \\*Complete Latin American Spanish maps from Novice Low to Advanced Low level proficiency of ACTFL \(American Council on the Teaching of Foreign Languages\) and from A1 Beginner to B1/B2 Upper Intermediate level of the CEFR \(Common European Framework of Reference for Languages\) guidelines. Foundations for Population Health in Community/Public Health Nursing - E-Book

Elsevier Health Sciences Master the essentials of health promotion in community and public health nursing! Foundations for Population Health in Community/Public Health Nursing, 6th Edition provides clear, concise coverage of the nurse's role in preventing disease, promoting health, and providing health education in community settings. Case studies and critical thinking activities make it easier to apply concepts to community nursing practice. New to this edition are Healthy People 2030 guidelines and coverage of the latest issues, trends, and approaches. Written by well-known nursing educators Marcia Stanhope and Jeanette Lancaster, this streamlined text covers the fundamentals of designing effective nursing strategies for vulnerable and special populations. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, reinforcing the concept of prevention as it relates to community and public health care. Applying Content to Practice boxes highlight how chapter content is applied to nursing practice in the community. Practice Application scenarios present practice situations with questions and answers to help you apply concepts to community practice. Genomics coverage provides a history of genetics and genomics and how they impact public/community health nursing care. Coverage of ongoing health care reform issues includes the impact of the Patient Protection and Affordable Care Act of 2010 (ACA) on public health nursing. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. NEW! COVID-19 pandemic information has been added. NEW! Healthy People 2030 objectives are highlighted throughout the book, addressing the health priorities and emerging health issues expected in the next decade. NEW! Updated content and figures reflect the most current data, issues, trends, and practices. NEW! Expanded Check Your Practice boxes use Clinical Judgment (Next Generation NCLEX®) steps to guide your thinking about practice scenarios.
