#### **AIRPORT PASSENGER TERMINAL PLANNING AND DESIGN: SPREADSHEET MODELS AND USER'S GUIDE**

---

Transportation Research Board TRB's Airport Cooperative Research Program (ACRP) Report 25, Airport Passenger Terminal Planning and Design comprises a guidebook, spreadsheet models, and a user's guide in two volumes and a CD-ROM intended to provide guidance in planning and developing airport passenger terminals and to assist users in analyzing common issues related to airport terminal planning and design. Volume 1 of ACRP Report 25 explores the passenger terminal planning process and provides, in a single reference document, the important criteria and requirements needed to help address emerging trends and develop potential solutions for airport passenger terminals. Volume 1 addresses the airside, terminal building, and landside components of the terminal complex. Volume 2 of ACRP Report 25 consists of a CD-ROM containing 11 spreadsheet models, which include practical learning exercises and several airport-specific sample data sets to assist users in determining appropriate model inputs for their situations, and a user's guide to assist the user in the correct use of each model. The models on the CD-ROM include such aspects of terminal planning as design hour determination, gate demand, check-in and passenger and baggage screening, which require complex analyses to support planning decisions. The CD-ROM is also available for download from TRB's website as an ISO image.

### **TEACHER PROFESSIONAL DEVELOPMENT IN SCHOOLS AND COLLEGES**

---

Routledge Written for staff in schools and colleges, this book offers the challenge and support necessary to understand, analyze and adopt coaching, mentoring and peer-networking mechanisms as an essential part of the development of professional learning within an organisation. Drawing on the new national strategy for professional development, it emphasises the importance of learning with and from other colleagues, helping your organisation to become a professional learning community and supporting the drive to raise standards and attainment. Organised into nine distinct but interrelated chapters, this is an invaluable sourcebook of practical information for in-service training. It contains a range of stimulating activities which engage the reader and encourages reflection on: \* the nature and importance of professional development in schools and colleges \* the potential benefits and difficulties associated with coaching, mentoring and peer-networking \* factors essential to the successful establishment and management of coaching and mentoring programmes \* team leadership and leadership coaching \* the role of the coach, mentor and networker with respect to the creation of professional learning communities.

## **PUBLIC ADMINISTRATION**

---

---

---

### **AN INTRODUCTION**

---

Routledge Marc Holzer and Richard W. Schwester have written a fresh and highly engaging textbook for the introductory course in Public Administration. Their coverage is both comprehensive and cutting-edge, including not only all the basic topics (OT, budgeting, HRM), but also reflecting new realities in public administration: innovations in e-government, the importance of new technology, changes in intergovernmental relations, especially the emphasis on inter-local and shared regional resources, and public performance and accountability initiatives. Public Administration has been crafted with student appeal in mind. Each of the book's chapters is generously illustrated with cartoons, quotes, and artwork—all reinforcing the book's theme that the field of public administration is rooted in the cultural and political world. Each chapter is also supported with a listing of key terms, exercises, and additional resources. The textbook is supported by one of the most comprehensive and easy-to-use instructors' manuals of any introductory text on the market today. It contains full lesson plans with activities to accommodate a broad range of teaching and learning styles for each chapter, PowerPoint decks for each chapter (with visuals and links embedded), 8 new long-term project / student presentation ideas, an updated 'Quotes and Notables' section with biographical information and media links for each chapter, updated test questions with answer keys, and updated terms and definitions for each chapter.

**RESOURCE GUIDE TO AIRPORT PERFORMANCE INDICATORS**

---

Transportation Research Board "Explores airport performance indicators (APIs) for use in benchmarking and performance measurement. These APIs are sorted by functional type and their criticality to the airport strategic plan. More than 800 performance indicators are presented in three main categories: Core, Key, and Other APIs. "Core" or fundamental indicators are important for overall operation of the airport and of interest to the Chief Executive Officer or governing board. "Key" or departmental indicators are important for the operations of key airport functions and departments. The remaining "Other" indicators are considered useful as secondary departmental unit performance indicators but not critical to the airport's overall function. The printed versions of ACRP Report 19A include a bound in CD (CRP-CD-94) of the Interactive Resource Guide that is identical to the pdf that is posted online."--Provided by publisher.

**GUIDE TO THE DECISION-MAKING TOOL FOR EVALUATING PASSENGER SELF-TAGGING**

---

Transportation Research Board TRB's Airport Cooperative Research Program (ACRP) Report 41: Guide to the Decision-Making Tool for Evaluating Passenger Self-Tagging provides the information and tools, included on and accompanying CD-ROM, necessary for an airport or airline to determine the appropriateness of pursuing passenger self-tagging should it be allowed in the United States in the future. The tools, in an Excel Spreadsheet format, allow for the input of airport-specific information, such as facility size and passenger flows, while also providing industry averages to assist those airports and airlines that haven't yet collected their individual information. The decision-making tools provide both qualitative and quantitative information that can then be used to assess if passenger self-tagging meets organizational needs or fits into their strategic plan. Appendix A to ACRP 41 was published online as ACRP Web-Only Document 10: Appendix A: Research Documentation for ACRP Report 41. The CD-ROM included as part of ACRP Report 41 is also available for

download from TRB's website as an ISO image.

#### **REFERENCE GUIDE ON UNDERSTANDING COMMON USE AT AIRPORTS**

---

Transportation Research Board The aviation industry has seen dramatic changes in the past two decades with significant growth during the 1990s; a significant industry disruptive event on September 11, 2001; and an economic decline resulting in a sharp rise in fuel prices that has substantially changed the economics of airline operations and a decline in growth. During this period, airlines have adapted to the changes in various ways, many of which have resulted in adaptability issues for airport operators, thus raising the question of "is there a better way" to be more flexible and responsive to airline service changes in good and bad times. From an airline perspective, cost reduction since September 11 has been a prominent focus. From an airport operator perspective, adapting to and accommodating changing flight services by incumbent carriers as well as new entrant services has been a key focus. In recent years, offering more cost-effective solutions to retain or encourage new services in the face of service reductions has become a key focus. Airport operator interests in common use have been heightened by the potential for achieving a reasonable balance between airline and airport operator interests. The implications of transitioning from a traditional model (of airline facility use and leasing focused on dedicated facilities) to common use has elicited varying and, often, conflicting perceptions of benefit and cost.

---

DIANE Publishing Provides users of transportation information with a comprehensive inventory of transportation acronyms and their referents. The acronyms were identified from the materials contained in the U.S. Bureau of Transportation Statistics' Directory of Transportation Data Sources, 1995. These data sources are transportation publications and databases existent within the federal government, private organizations, and Canada and Mexico. The acronyms are listed alphabetically, each followed by the data source where the information was obtained. Includes a chart of metric/English conversion factors.

**A GUIDE FOR THE NON-MILITARY MENTAL HEALTH CLINICIAN**

---

---

Oxford University Press The United States is in the midst of the largest military demobilization in its history. This is leading to an increase in the demand for mental health clinicians who can provide services to hundreds of thousands of military veterans and members of the military. Nearly two million Americans have been deployed to the wars in the Middle East, and thousands of them have been deeply affected, either psychologically, physically, or both. Projections suggest that 300,000 are returning with symptoms of PTSD or major Depression; 320,000 have been exposed to probable Traumatic Brain Injuries; and hundreds of thousands are dealing with psychological effects of physical injuries. Other veterans and members of the military without injuries will seek treatment to help them with the psychological impact of serving in the military, being deployed, or transitioning and reintegrating back into the civilian world. As an example, hundreds of thousands of service members are also leaving the armed forces earlier than they anticipated and will need to quickly adjust to life as civilians after assuming that they would have many more years in the military. Many will be leaving the military because of demobilizations and downsizing due to budget cuts. Current proposed cuts will shrink the military force to the same size it was in 1940. The Pew Center reports that 44% of veterans from the current wars are describing their readjustment to civilian life as "difficult," and many of them are and will be turning to civilian mental health and primary care clinicians for assistance. The Handbook of Psychosocial Interventions for Veterans and Service Members is a "one stop" handbook for non-military clinicians working with service members, veterans, and their families. It brings together experts from the Department of Defense, the Department of Veterans Affairs, veteran service organizations, and academia to create the first comprehensive guidebook for civilian clinicians. In addition to covering psychiatric disorders such as depression, anxiety, and PTSD, this book also offers information about psychosocial topics that impact military personnel and their loved ones and can become part of treatment (e.g., employment or education options, financial matters, and parenting concerns), providing the most recent and cutting-edge research on the topics. Chapters are concise and practical, delivering the key information necessary to orient clinicians to the special needs of veterans and their families. The Handbook of Psychosocial Interventions for Veterans and Service Members is an essential resource for private practice mental health clinicians and primary care physicians, as well as a useful adjunct for VA and DOD psychologists and staff.
