Everyday Lifestyles and Sustainability

The Environmental Impact Of Doing The Same Things Differently

Routledge The impact of humanity on the earth overshoots the earth's bio-capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean. Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a 'bottom-up' approach by calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

Car and Driver

Brembo 60

1961-2021 the Beauty of Innovation

Giorgio NADA Editore Brembo, a leader in the development and production of high performance braking systems is turning 60. Over the decades, the principal mission of the Italian company has been to brake to best effect the greats on two and four wheels as well as daily users of private cars and motorcycles. The history, evolution and on-going success of this prestigious Italian company are the themes of this

official book, which opens with a preface by the Brembo chairman, Alberto Bombassei. The book reviews the diverse facets of the "Brembo universe": from its commitments in the automotive, motorcycling and motorsport fields to its attention to all aspects of design, always one of Brembo's strong suits, from the progressive internationalization of the company through to the particularly topical aspects of sustainable production. The contributions of the six principal authors - Vincenzo Borgomeo, Massimo Clarke, Gaetano Cocco, Patrizia Giangualano, Lorenzo Ramaciotti and Umberto Zapelloni - are complemented by a similar number of testimonies from figures from within the company and those who worked there at length. The Brembo "phenomenon" is also presented through a wealth of fascinating photographs, mostly drawn from the company archives, which document the unique story of a manufacturing company born in Italy and now a true icon of Italian excellence throughout the world.

Newsweek

Pininfarina

90 Anni / 90 Years

Giorgio NADA Editore On the occasion of the 90th anniversary of Pininfarina, a marque synonymous with style and elegance applied to car design, Pininfarina is a book that surveys, for the first time, the entire output of the Turin coachbuilder, model by model. Produced in close collaboration with the company, it draws on invaluable photographic material accompanying brief contextualising texts. Tracing the history of Pininfarina from its origins to the present day entails reviewing some of the most iconic models in automotive history: from the numerous Ferraris bodied by the historic partner of the Maranello firm to cars such as the Cisitalia 202, the Lancia Aurelia, the Alfa Romeo Duetto and 164, the Maserati GranTurismo through to the current models born under the aegis of the Indian firm Mahindra. The book also covers the numerous Pininfarina concept cars that have written glorious pages in the history of design, raising the bar every time in terms of the excellence of the car product.

A History of the United States in Five Crashes

Stock Market Meltdowns That Defined a Nation

HarperCollins In this absorbing, smart, and accessible blend of economic and cultural history, Scott Nations, a longtime trader, financial engineer, and CNBC contributor, takes us on a journey through the five significant stock market crashes in the past century to reveal how they defined the United States today The Panic of 1907: When the Knickerbocker Trust Company failed, after a brazen attempt to manipulate the stock market led to a disastrous run on the banks, the Dow lost nearly half its value in weeks. Only billionaire J.P. Morgan was able to save the stock market. Black Tuesday (1929): As the newly created Federal Reserve System repeatedly adjusted interest rates in all the wrong ways, investment trusts, the darlings of that decade, became the catalyst that caused the bubble to burst, and the Dow fell dramatically, leading swiftly to the Great Depression. Black Monday (1987): When "portfolio insurance," a new tool meant to protect investments, instead led to increased losses, and corporate raiders drove stock prices above their real values, the Dow dropped an astonishing 22.6 percent in one day. The Great Recession (2008): As homeowners began defaulting on mortgages, investment portfolios that contained them collapsed, bringing the nation's largest banks, much of the economy, and the stock market down with them. The Flash Crash (2010): When one investment manager, using a runaway computer algorithm that was dangerously unstable and poorly understood, reacted to the economic turmoil in Greece, the stock market took an unprecedentedly sudden plunge, with the Dow shedding 998.5 points (roughly a trillion dollars in valuation) in just minutes. The stories behind the great crashes are filled with drama, human foibles, and heroic rescues. Taken together they tell the

larger story of a nation reaching enormous heights of financial power while experiencing precipitous dips that alter and reset a market where millions of Americans invest their savings, and on which they depend for their futures. Scott Nations vividly shows how each of these major crashes played a role in America's political and cultural fabric, each providing painful lessons that have strengthened us and helped us to build the nation we know today. A History of the United States in Five Crashes clearly and compellingly illustrates the connections between these major financial collapses and examines the solid, clear-cut lessons they offer for preventing the next one.

The Lost Generation

The Brilliant but Tragic Lives of Rising British F1 Stars Roger Williamson, Tony Brise and Tom Pryce

Haynes Publishing UK The 1970s was a great decade for British racing drivers, but it was also the era in which the nation lost a generation of brilliant young drivers - Roger Williamson, Tony Brise and Tom Pryce - in tragic accidents. All had the potential to be World Champions. With access to their families, friends and race colleagues, David Tremayne tells their full stories in this superb book, now available in paperback. It makes for poignant but uplifting reading.

The Black H

Booklocker.Com Incorporated Set against the war in Iraq, this novel highlights the ugliness of religious hatred. A dark and disturbing tale of American soliders armed with the ultimate fighting weapon - the mysterious drug Black H - driven to commit unspeakable atrocities.

Jaguar XJ6

4x4 Suspension Handbook

CarTech Inc Author Trenton McGee, 4x4 suspension expert and host of Outdoor Channels Off-Road Adventures, explains 4x4 suspension systems in an easy-to-understand manner. He gets specific on types of suspensions available from all the major manufacturers including Jeep, Toyota, Ford, Chevy, and Dodge. He goes into a great level of detail on every different model, including early and modern model systems.

Jaguar Mark 1 & 2

A Celebration of Jaguar's classic sporting saloons

Veloce Publishing The compact Jaguar saloons of the 1950s and 1960s were some of the most popular performance cars of their day and now are considered one of the most collectable of classics. In this fascinating, extensively illustrated book, Nigel Thorley describes the year by year history and development of the Jaguar Mark 1 and Mark 2 models. From the original design concept in the early 1950s, through to the final variants produced at the end of the 1960s, it's all here. With a fabulous collection of period and specially commissioned photographs and curiosities and anecdotes uncovered along the way, Jaguar Mark 1 & 2 represents a feast for car lovers, and Jaguar owners.

The BMW Century

The Ultimate Performance Machines

Motorbooks International Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no

less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without.

Apex Legends: Pathfinder's Quest (Lore Book)

Dark Horse Comics Explore the world of the hit game through the eyes of the lovable robot, Pathfinder, as he chronicles his journey throughout the various environs of the Outlands to interview his fellow Legends -- all in the hope of finally locating his mysterious creator. The rich history of Apex Legends is explained by the characters that helped to shape it, as are their unique bonds of competition and camaraderie.

McFarland "This is a biography of Milt Schornack, one of Detroit's top mechanics in the 1960s, who pioneered the Ram Air system and, as a tuner and driver, became the face of Pontiac's legendary GTO"--Provided by publisher.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles

National Academies Press The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features,

and will be more expensive to purchase relative to current vehicles. Though the gasoline-powered spark ignition engine will continue to be the dominant powertrain configuration even through 2030, such vehicles will be equipped with advanced technologies, materials, electronics and controls, and aerodynamics. And by 2030, the deployment of alternative methods to propel and fuel vehicles and alternative modes of transportation, including autonomous vehicles, will be well underway. What are these new technologies - how will they work, and will some technologies be more effective than others? Written to inform The United States Department of Transportation's National Highway Traffic Safety Administration (NHTSA) and Environmental Protection Agency (EPA) Corporate Average Fuel Economy (CAFE) and greenhouse gas (GHG) emission standards, this new report from the National Research Council is a technical evaluation of costs, benefits, and implementation issues of fuel reduction technologies for next-generation light-duty vehicles. Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles estimates the cost, potential efficiency improvements, and barriers to commercial deployment of technologies that might be employed from 2020 to 2030. This report describes these promising technologies and makes recommendations for their inclusion on the list of technologies applicable for the 2017-2025 CAFE standards.

Cobra-Ferrari Wars 1963-1965

CFW Featured are the 289 and 427 Cobra roadsters and coupes, Ferrari GTOs, LM, and GTB, Aston 214 , Corvette Grand Sport, Jaguar Lightweight E-Type, Porsche 904 and Abarth Simca 2000 -- in 27 1963-1965 FIA world championship races, from Sebring, Florida to Le Mans, France. Personal recollections range from Shelby's greenest mechanic to Ferraris chief engineer, from forgotten privateers to world-class drivers. Acclaimed by Ferrari and Cobra enthusiasts alike, this is the definitive history of the epic struggle that changed sports car racing forever. The work is based on interviews of 53 of the original participants, conducted over 18 years. Over 530 archival photos, drawings, blueprints and documents, including 57 large-format color prints.

With features on ingredients, tools, cutting techniques, toppings and dressings, plus over 100 recipes, you'll be left feeling fully delighted and satisfied yet light, bright and energized too!

Edelbrock

Made in USA

Motorbooks Tom Madigan, with foreword by Benny Parson, NASCAR champion. The Edelbrock Corporation emerged from a young mechanic's dream in Southern California during the earliest years of the American love affair with the automobile. One of the central figures of the hot rod culture that began before World War II and blossomed after the war, Vic Edelbrock, Sr. built his company around a simple philosophy: never overextend yourself, and never put your name on a product that hasn't been tested and proven true. When Vic Edelbrock, Jr. took over after his father's death, he stayed true to the family philosophy while incorporating progressive marketing plans to grow the company into a corporate giant. It is the last family owned automobile aftermarket company in the industry. Edelbrock Made in USA is the story of the company's growth from a simple shop at the rear of a gas station to an American institution. It is at the heart of the history of the earliest drag racers and land speed racers, it is woven into the early days of NASCAR, and it flourishes today in the cars owned by enthusiasts and ordinary drivers across America who boast Edelbrock equipment. It is the story of a company whose influence not only helped shape automotive performance, but also led the automotive aftermarket industry in addressing and conforming to the clean air and safety regulations that have emerged over the past 35 years. And it is the story of an iconic family business that has preserved its values and its spirit of independence, creativity, philanthropy, and fun over three generations. 0-7603-2202-3 - 139600AP - \$40.00 - \$58.00 CAN '

Maserati

A Century of History The Official Book

Giorgio Nada Editore Meant to commemorate 100 years of Maserati, this work covers the history of the marque in all its aspects and is divided into three large sections. The first, signed by Luca Dal Monte, deals with the company history and the marque's industrial matters: from the early years, when production was concentrated on racing cars, to the advent of the first GT of the immediate post-war period through to the great classics of the Fifties, Sixties and Seventies. The "Road cars and design" section by Lorenzo Ramaciotti, is specifically devoted to the Trident's road cars: from the A6 1500 to current production models, including the extraordinary expressions of design offered by models like the 3500 and 5000 GT, the various Quattroportes, the Mistral, Ghibli, Indy to then approach the present day, touching on the 3200 GT and the current Quattroporte, Granturismo and GranCabrio. Historic and modern pictures illustrate each of these models in a long photographic treatise, preceded by an introductory section which focuses on the historic matters associated with this vein of Maserati production. The last section written by Cesare De Agostini and Gianni Cancellieri is about races: from the outset Maserati's history has mainly been one of racing, from the pioneering era to the glorious Fifties, as much in Formula 1 with the 1957 world championship won by Juan Manuel Fangio, as endurance races, Maserati has expressed itself with success at the top levels of the sport. But even before that, the glorious marque had written unforgettable pages in the annals of racing, including victories at Indianapolis in 1939 and 1940. The recent success of the MC12 is the latest chapter in this proud history of achievement. There are also specific boxes in this section devoted to particular competitive aspects, such as the great road speed records (1926-1952) and the company's long experience in speedboat racing. Royal Automobile Club shortlist of contenders for Motoring Book of the Year!

Lancia Hyena Zagato

Una Delta all'ennesima potenza/The Ultimate Delta

Giorgio Nada Editore "We have to recreate the enthusiasm that surrounded the SPORT models, ever a synonym for the Lancia Zagatos": in 1991 this was the brief the recent graduate Andrea Zagato gave to Marco Pedracini, a young designer who had not long been hired by prestigious coachbuilder. It was out of this fortuitous and fortunate coming together of this far-sighted idea and the enthusiasm of Paul Koot, a Dutch fan and a businessman in the automotive sector, that an icon was born, the HYENA. A beautiful car, but one practically unknown to the general public. A car that could have repeated and even surpassed the commercial and sporting success of the Lancia Delta Integrale from which it was derived. Unfortunately just 24 examples were produced due to the debateable decision taken by the Fiat/Lancia directors of the time. Following a rapid review of the evolution of the Lancia Delta over the year, this book, written by an enthusiastic collector, examines the difficult genesis of the Hyena, from the first steps with the publication of the very first (previously unpublished) sketches and numerous photos and then follows its development, engineering and production through to its presentation at the car shows and in brochures. The book is completed by a comprehensive technical section, with the project list and the spare parts catalogue as well as an extensive photographic portrait of one particular example, N. 20. Lastly, all 24 Lancia Hyenas are examined, with the intention of reconstructing their specifications, their destination and the country in which they are jealously conserved by the enthusiast and collectors who possess a precious example.
