## A Bridge to Quality

**National Academies Press** The Institute of Medicine study *Crossing the Quality Chasm* (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. *Health Professions Education: A Bridge to Quality* is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

## Concepts of Rehabilitation for the Management of Common Health Problems

**The Stationery Office** Although there is broad agreement on the importance of rehabilitation and the need to improve occupational health and vocational rehabilitation in the UK, there is considerable uncertainty about what 'rehabilitation' is, and about its cost-effectiveness, particularly for the common health problems that cause most long-term disability and incapacity. This paper seeks to develop a theoretical and conceptual basis for the rehabilitation of common health problems. Chapters include: traditional rehabilitation and the need for a different approach; illness, disability and incapacity for work; the biopsychosocial model and framework of disability; obstacles to recovery and return to work; clinical and occupational management of common health problems; personal responsibility and motivation; and rehabilitation in a social security context.
