The resulting field of**

cryptography, reviewed in this survey, is strongly linked to complexity theory (in contrast to 'classical' cryptography which is strongly related to information theory).

THE ALGEBRA OF SECONDARY COHOMOLOGY OPERATIONS

Springer Science & Business Media The algebra of primary cohomology operations computed by the well-known Steenrod algebra is one of the most powerful tools of algebraic topology. This book computes the algebra of secondary cohomology operations which enriches the structure of the Steenrod algebra in a new and unexpected way. The book solves a long-standing problem on the algebra of secondary cohomology operations by developing a new algebraic theory of such operations. The results have strong impact on the Adams spectral sequence and hence on the computation of homotopy groups of spheres.

JESUS THE HEALER

Whitaker House For years, this book has challenged and inspired readers to step out in faith and receive the healing that Christ purchased for us. Many people have been healed while reading these pages! Legendary Bible teacher Dr. E. W. Kenyon has a rare gift for presenting the deep and profound truths of God's Word in a simple and easily understood way. His teachings on expressing "positive confessions of faith" formed much of the foundation for Word of Faith Pentecostalism. In Jesus the Healer, Dr. Kenyon fully explores the powerful gift of healing that Jesus demonstrated throughout His ministry. Sickness and disease are not God's will for believers. So Kenyon unpacks God's methods of healing and how to live the abundant life that Jesus promised. God's healing promises are no good unless you act on them. Believing is acting on God's Word. Faith is the result of acting on God's Word. Healing miracles are available today for those who believe and step out in faith!

BRITAIN, FRANCE AND THE DECOLONIZATION OF AFRICA

FUTURE IMPERFECT?

UCL Press Looking at decolonization in the conditional tense, this volume teases out the complex and uncertain ends of British and French empire in Africa during the period of 'late colonial shift' after 1945. Rather than view decolonization as an inevitable process, the contributors together explore the crucial historical moments in which change was negotiated, compromises were made, and debates were staged. Three core themes guide the analysis: development, contingency and entanglement. The chapters consider the ways in which decolonization was governed and moderated by concerns about development and profit. A complementary focus on contingency allows deeper consideration of how colonial powers planned for 'colonial futures', and how divergent voices greeted the end of empire. Thinking about entanglements likewise stresses both the connections that existed between the British and French empires in Africa, and those that endured beyond the formal transfer of power.
