A Critical Analysis of Crowdfunding as an Alternative Form of Financing for Startups in Europe

GRIN Verlag Bachelorarbeit aus dem Jahr 2016 im Fachbereich BWL - Investition und Finanzierung, Note: 2,0, FOM Essen, Hochschule für Oekonomie & Management gemeinnützige GmbH, Hochschulleitung Essen früher Fachhochschule (FOM Hochschule für Oekonomie & Management), Sprache: Deutsch, Abstract: The aim of this paper is to evaluate whether crowdfunding is a realistic form of financing for startups in Europe. Therefore, theoretical principals of startup financing, as well as crowdfunding and its different dimensions, have to be scrutinized further. Moreover, a general overview of the European startup and crowdfunding market has to be provided. This paper focuses on commercial startups located in the member states of the European Union. This paper begins with an introduction of the theoretical principles of startup financing. After a brief definition of startups, the occasions for obtaining financing are pointed out in the context of the life cycle model of a venture. In this regard, traditional forms of startup financing and the related issues are analysed. A more detailed look is also taken on the issue of information asymmetry. Chapter 3 deals with crowdfunding as a source of financing. After an overview of the evolution of crowdfunding, this concept is examined in greater detail. Specifically, the definition and basics of crowdfunding, the main actors and the different forms of crowdfunding are presented. Next, this chapter deals with a typical process of establishing and running a crowdfunding campaign. The end of this chapter deals with the determinants of success of a crowdfunding campaign. In Chapter 4, the European startup and crowdfunding markets are evaluated. Besides facts on these markets, this chapter also deals with insights into the European legal framework in the field of crowdfunding. Moreover, relevant platforms in Europe are presented. The chapter ends with a practical example of a crowdfunding campaign in Europe. In Chapter 5, traditional forms of financing are compared to the relevant types of crowdfunding in Europe. After equity-based crowdfunding is compared to BAs and VCs, lending-based crowdfunding is compared to bank financing. The end of the chapter deals with the comparison of reward-based crowdfunding to financial bootstrapping. In the last chapter, the investigative results are summarized and the achievement of the objective is evaluated. The paper concludes with a prospect of the development of crowdfunding in Europe.

International Production Beyond the Pandemic

[United Nations](#) **The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.**

The Impact of Societal and Social Innovation

A Case-Based Approach

Springer **This book elaborates on the distinction between societal innovation and social innovation. It provides eight case studies to illustrate the scope, process, outcome, and impact of societal innovation and social innovation. In addition, the book proposes a model for interested parties to maximize their contribution for the common social good in a systematic and effective way. Case studies are used to illustrate concepts for readers to grasp the real essence of the relatively abstract notions of societal innovation and social innovation. In doing so, the book shows how small efforts can bring big benefits for the under privileged and to society as a whole. This book serves as a helpful resource for government officials, social innovation practitioners, social entrepreneurs, Non Profit Organizations, as well as students who would like to contribute to the common social good.**
