### Women, Subalterns, and Ecologies in South and Southeast Asian Women's Fiction

University of Georgia Press In recent decades, East Asia has gained prominence and has become synonymous with Asia, while other Asian regions, such as South and Southeast Asia, have been subsumed under it. The resultant overgeneralization has meant that significant aspects of the global ecological crisis as they affect these two regions have been overlooked. Chitra Sankaran refocuses the global lens on these two rapidly developing regions of Asia. Combining South Asian and Southeast Asian philosophical views and folk perspectives with mainstream ecocritical and ecofeminist theories, she generates a localized critical idiom that qualifies and subverts some established theoretical assumptions. This pioneering study, introducing a corpus of more than thirty ecofictions by women writers from twelve countries in South and Southeast Asia, examines how recent global threats to ecosystems, in both nature and culture, impact subdominant groups, including women. This new corpus reveals how women and subalterns engage with various aspects of critical ecologies. Using ecofeminist theory augmented by postcolonial and risk theories as the main theoretical framework, Sankaran argues that these women writers present unique perspectives that review Asian women's relationships to human and nonhuman worlds.

## Milk Craze

### Body, Science, and Hope in China

[University of Hawaii Press](#) Why do the Chinese, who are mostly lactase non-persistent, suddenly thirst for milk today? Whether it is formula milk, fresh cow milk, or tea with condensed milk, the rocketing milk consumption and production in China are of increasing global food safety, health, and environmental concerns. Milk Craze examines and compares developments in China's dairy industry and dietary dairy consumption, cross-nationally and globally, and more specifically in two localities: Shunde and Hong Kong. Through an innovative analysis of medical texts and social media, as well as careful ethnographic studies, Veronica Mak ponders why the surge in demand for Western cow milk coincides with the plunge in sales of indigenous water-buffalo milk and cheese. She reveals the multiple ways in which global industries and Chinese dairy conglomerates sabotage and destroy local dairy farms. She shows that the rise of milk consumption is not just about the globalization of cow milk production and Westernization of the Chinese diet, but also due to the crossovers between the traditional Chinese diet and medicine and modern global diets. She uses these reference points to explore the multiple meanings of dairy foods in China, such as the class and cultural attributes associated with British "milk tea" and flavored yogurt products, water buffalo curds and cheese, and the lower class associations of labor in the water-buffalo dairying industries, and then discusses these developments in China through colonial and modern global perspectives. Milk Craze argues powerfully that the Westernization or dramatic change of diet in China too often obscures structural, educational, occupational, and social stresses and constraints, while naturalizing the dubious redefinition of health, cognitive performance, and ideal body shape as individual responsibility and imperative.

After a summary of critiques of CDA/CDS and responses by CDA/CDS scholars, the book provides an overview of its salient connections to other interdisciplinary areas of scholarship such as critical applied linguistics, education, anthropology/ ethnography, sociolinguistics, gender studies, queer linguistics, pragmatics and ecolinguistics. The final chapter describes how scholars use their knowledge of CDA/CDS to make a difference in the world.

## The Character of Evelyn Waugh. Catholicism Clashed with Atheism

**GRIN Verlag Academic Paper from the year 2019 in the subject English Language and Literature Studies - Literature, grade: 5.0, , language: English, abstract: The aim of the hereby paper is to present the character of Evelyn Waugh. His career as a journalist was truncated as a direct result of his literary success with his first novel, Decline and Fall. Although his racy novels of the 'Bright Young People' in 1920s England made his reputation, he was a profoundly conservative writer who also had great success with more sombre works like Brideshead Revisited. Waugh's attitudes towards the marriage, faith, Catholicism and the aristocracy were very complex, and they changed over the years. I have tried to demonstrate the shape of these changes by tracing references to these themes in Waugh's Brideshead Revisited. Brideshead Revisited, as he stated, is the account of the intervention of God's Grace in a family. When Brideshead was first published in 1945 it dismayed some critics and readers. It might be shocking that in fact so little they realised what the novel is really about. They thought it an excuse for aristocratic snobbery, suspected it to be sycophantic praise of a small Catholic clique, and condemned it for pandering to an unhealthy taste for miracles. Fifteen years after writing the novel, Waugh declared that he sees many faults in the book and he thought it necessary to excuse himself by the fact that he wrote it seduced by a consequent post-war nostalgia , nevertheless, at the time he wrote the novel, however, he had no doubt he was writing something of utmost importance. Better than anyone Waugh knew that it deals with far more than an age which witnessed a regrettable decline in splendid living. Its major theme - the need to place one's relationship with God at the very centre of one's life - is something very different. Moreover, the following paper intends to analyse the two approaches to the world of faith, namely - Catholicism and Atheism in order to find the reasons behind the common between 1890s and 1950s conversions to Catholicism, especially amongst the poets, artists and writers.**

## Female Doctors in Canada

### Experience and Culture

University of Toronto Press Female Doctors in Canada is an accessible collection of articles by experienced physicians and researchers exploring how systems, practices, and individuals must change as medicine becomes an increasingly female-dominated profession. As the ratio of practicing physicians' shifts from predominately male to predominately female, issues such as work hours, caregiving, and doctor-patient relationships will all be affected. Canada's medical education is based on a system that has always been designed by and

for men; this is also true of our healthcare systems, influencing how women practice, what type of medicine they choose to practice, and how they wish to balance their personal lives with their work. With the intent to open a larger conversation, *Female Doctors in Canada* reconsiders medical education, health systems, and expectations, in light of the changing face of medicine. Highlighting the particular experience of women working in the medical profession, editors trace the history of female practitioners, while also providing a perspective on the contemporary struggles women face as they navigate a system that was tailored to the male experience, and is yet to be modified.

Bloomsbury Publishing The Wittgenstein family was one of the richest, most talented and most eccentric in European history. The domineering paternal influence of Karl Wittgenstein left his eight children fraught by inner antagonisms and nervous tension. Three of his sons committed suicide; Paul, the fourth, became a world-famous concert pianist (using only his left hand), while Ludwig, the youngest, is now regarded as one of the greatest philosophers of the twentieth century. In this dramatic historical and psychological epic, Alexander Waugh traces the triumphs and vicissitudes of a family held together by a fanatical love of music yet torn apart by money, madness, conflicts of loyalty and the cataclysmic upheaval of two world wars.

# Saved to Save and Saved to Serve

## Perspectives on Salvation Army History

Wipf and Stock Publishers **The Salvation Army has now been around for more than one hundred and fifty years, having celebrated its sesquicentennial in 2015 with an International Congress in London. Over the years both the Army and the world in which it appeared have changed beyond recognition. This is a good time for the movement to stop and look back -not just to celebrate, but to see where it is today. The Army has not evolved in isolation from the world. Bringing its own history with it, it nevertheless belongs to the twenty-first century world as much as William Booth's little East End Mission belonged to nineteenth-century London. This book attempts to explore the interaction between mission and world as it has impacted the Army's beliefs and practices as well as the place it now occupies in the wider world. This critical and analytical study may also be of interest to those beyond the Army's ranks who would like to learn more about this remarkable organization.**
