HEALTH CARE IN CANADA

A CITIZEN'S GUIDE TO POLICY AND POLITICS

[University of Toronto Press](#) **Health Care in Canada** examines the challenges faced by the Canadian health care system, a subject of much public debate. In this book Katherine Fierlbeck provides an in-depth discussion of how health care decisions are shaped by politics and why there is so much disagreement over how to fix the system. Many Canadians point to health care as a source of national pride; others are highly critical of the system's shortcomings and call for major reform. Yet meaningful debate cannot occur without an understanding of how the system actually operates. In

this overview, Fierlbeck outlines the basic framework of the health care system with reference to specific areas such as administration and governance, public health, human resources, drugs and drug policy, and mental health. She also discusses alternative models in other countries such as Britain, the United States, and France. As health care becomes increasingly complex, it is crucial that Canadians have a solid grasp of the main issues within both the policy and political environments. With its balanced and accessible assessment of the main political and theoretical debates, *Health Care in Canada* is an essential guide for anyone with a stake in Canada's health system.

SECURITY INTERESTS IN INTELLECTUAL PROPERTY

[Springer](#) Economic development increasingly depends to a large extent on innovation. Innovation is generally covered by intellectual property (IP) rights and usually requires extensive funding. This book focuses on IP and debt financing

as a tool to meet this demand. This book clarifies the situation of the use of IP as collateral in practice through a survey conducted in Japan on IP and debt financing. Various obstacles in the proper use IP and debt financing are identified, and some projects to facilitate its use are illustrated. IP and debt on a global scale, either by attracting foreign lenders or by collateralizing foreign IP rights, needs appropriate private international laws. This book analyzes such regulations in which the United Nations Commission on International Trade Law (UNCITRAL) has worked, paying due attention to the law of finance and insolvency law, as well as IP laws. However, further analysis is needed to identify under what conditions such solutions would show optimal effects. This book offers comprehensive analysis from an economic point of view.
