U.S. NAVY PROGRAM GUIDE - 2017

Independently Published The U.S. Navy is ready to execute the Nation's tasks at sea, from prompt and sustained combat operations to every-day forward-presence, diplomacy and relief efforts. We operate worldwide, in space, cyberspace, and throughout the maritime domain. The United States is and will remain a maritime nation, and our security and prosperity are inextricably linked to our ability to operate naval forces on, under and above the seas and oceans of the world. To that end, the Navy executes programs that enable our Sailors, Marines, civilians, and forces to meet existing and emerging challenges at sea with confidence. Six priorities guide today's planning, programming, and budgeting decisions: (1) maintain a credible, modern, and survivable sea based strategic deterrent; (2) sustain forward presence, distributed globally in places that matter; (3) develop the capability and capacity to win decisively; (4) focus on critical afloat and ashore readiness to ensure the Navy is adequately funded and ready; (5) enhance the Navy's asymmetric capabilities in the physical domains as well as in cyberspace and the electromagnetic spectrum; and (6) sustain a relevant industrial base, particularly in shipbuilding.

CARBON NANOTUBES

Elsevier Carbon nanotubes have been studied extensively in relation to fullerenes, and together with fullerenes have opened a new science and technology field on nano scale materials. A whole range of issues from the preparation, structure, properties and observation of quantum effects in carbon nanotubes in comparison with 0-D fullerenes are discussed. In addition, complementary reviews on carbon nanoparticles such as carbon nano-capsules, onion-like graphite particles and metal-coated fullerenes are covered. This book aims to cover recent research and development in this area, and so provide a convenient reference tool for all researchers in this field. It is also hoped that this book can serve

to stimulate future work on carbon nanotubes.

CURRENT PERSPECTIVES ON ASIAN WOMEN IN LEADERSHIP

A CROSS-CULTURAL ANALYSIS

Springer This book explores the unique socioeconomic challenges encountered by female leaders in China, India, Japan, Korea, and other Asian countries where traditional cultural expectations and modernized values coexist. It provides insight into gender inequality and underutilization of female talent as well as ways to develop highly qualified women in organizations. Chapters from expert contributors analyze the similarities and differences between each Asian country, the organizational and institutional challenges for women in the workplace, and how they balance work-family relationships. It will appeal to researchers and students in human resource development, management, leadership, Asia studies, women's studies, and political science, among others.

HOW I MET MYSELF LEVEL 3

Cambridge University Press "One icy winter's evening in Budapest, a man runs straight into John Taylor as he walks home through the narrow streets. John falls over into the snow and looks up at the man's face. 'I felt very afraid. Because what I saw was me. My face looking down at me. My mouth saying sorry.' Who is the man, and how will John's life change?"

THE CHARACTER CLOCK

The Character Clock is prescriptive knowledge for all parents - a must read for professionals in behavioral sciences and family medicine. This book will turn mental health theory on its head.

SMARTER FASTER BETTER

THE SECRETS OF BEING PRODUCTIVE IN LIFE AND BUSINESS

Random House In the international bestseller The Power of Habit, Pulitzer Prize-winning journalist Charles Duhigg explained why we do what we do. In Smarter Faster Better, he

applies the same relentless curiosity, rigorous reporting and rich storytelling to explain how we can get better at the things we do. The result is a groundbreaking exploration of the science of productivity. A group of data scientists at Google embark on a four-year study of how the best teams function, and find that how a group interacts is much more important than who is in the group. A Marine Corps general, faced with low morale among recruits, reimagines boot camp - and discovers that instilling a 'bias toward action' can turn even the most directionless teenagers into self-motivating achievers. The filmmakers behind Disney's Frozen are on the brink of catastrophe - until they shake up their team in just the right way, spurring a creative breakthrough that leads to one of the highest-grossing movies of all time. What do these people have in common? They know that productivity relies on making certain choices. The way we frame our daily decisions; the big ambitions we embrace and the easy goals we ignore; the cultures we establish as leaders to drive innovation: these are the things that separate the merely busy from the genuinely productive. At the core of Smarter Faster Better are eight key concepts - from motivation and goal-setting to focus and decision-making - that explain why some people and companies get so much done. Drawing on the latest findings in neuroscience, psychology and behavioural economics - as well as the experiences of CEOs, educational reformers, four-star generals, airplane pilots and Broadway songwriters - this painstakingly researched book explains that the most productive people, companies and organizations don't merely act differently. They view the world, and their choices, in profoundly different ways.

THE PRACTICE OF QUALITY MANAGEMENT

Springer Science & Business Media The Practice of Quality Management presents the results of eleven ground-breaking research projects in quality management. It is the first collection of research papers by academics in this area. The projects are empirical studies on total quality management that suggest new ways to think about quality. The objective of the research found in this book is to develop theory and to assist practice. Thus, this volume is of interest to both academic researchers and practising managers. The chapters fall into four categories: 'Performance', 'Understanding TQM', 'Organizations', and 'Using TQM'. All of the chapters show that there are many different applications and research issues associated with quality. The chapters on 'Understanding TQM' suggest that it is possible to develop and test theories of quality. The chapters on 'Performance' demonstrate that studies of the operational and financial effect of quality can yield positive results. Many thinkers on quality consider that organizational impacts of quality are the most important drivers of the quality process. The chapters on 'Organizations' present evidence on how quality programs affect human resource management, and organizational structure. Finally, the chapters on 'Using TQM' present several studies of applications of quality management.

A GRAMMAR OF DUMI

Walter de Gruyter The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality.

PROPERTY RIGHTS IN MONEY

Oxford University Press, USA Property Rights in Money is a systematic study of how proprietary interests in the ownership of and transactions in money are transferred and enforced as part of a payment transaction. The book begins by considering the different kinds of property recognised by the law which perform the economic functions of money. It describes how the nature of an owner's proprietary interest differs depending on the kind of property that is treated as money. The main body of the work provides a detailed account of how property rights in money are transferred from one person to another, and the proprietary consequences when a transfer of money is ineffective. For example, the work considers the consequences for the passing of property in money when a person pays the money by mistake, through the fraud of another or through a breach of his or her duties as a trustee or a company director. The author provides a coherent explanation of the proprietary effect of money transfers whether made via a transfer of coins or banknotes or, as is now more common, through a bank payment system. The final section of the book considers how a person can enforce his property rights in money, and the legal remedies open to him to recover his money once it is in the hands of a person who is not entitled to it.

100 DAYS OF SUNLIGHT

When 16-year-old poetry blogger Tessa Dickinson is involved in a car accident and loses her eyesight for 100 days, she feels like her whole world has been turned upside-down. Terrified that her vision might never return, Tessa feels like she has nothing left to be happy about. But when her grandparents place an ad in the local newspaper looking for a typist to help Tessa continue writing and blogging, an unlikely answer knocks at their door: Weston Ludovico, a boy her age with bright eyes, an optimistic smile...and no legs. Knowing how angry and afraid Tessa is feeling, Weston thinks he can help her. But he has one condition -- no one can tell Tessa about his disability. And because she can't see him, she treats him with contempt: screaming at him to get out of her house and never come back. But for Weston, it's the most amazing feeling: to be treated like a normal person, not just a sob story. So he comes back. Again and again and again. Tessa spurns Weston's "obnoxious optimism", convinced that he has no idea what she's going through. But Weston knows exactly how she feels and reaches into her darkness to show her that there is more than one way to experience the world. As Tessa grows closer to Weston, she finds it harder and harder to imagine life without him -- and Weston can't imagine life without her. But he still hasn't told her the truth, and when Tessa's sight returns he'll have to make the hardest decision of his life: vanish from Tessa's world...or overcome his fear of being seen. 100 Days of Sunlight is a poignant and heartfelt novel by author Abbie Emmons. If you like sweet contemporary romance and strong family themes then you'll love this touching story of hope, healing, and getting back up when life knocks you down.

THE GROOMER

Independently Published Andrew McCarthy grows concerned for his family after he catches a young man, Zachary Denton, photographing his daughter, Grace McCarthy, and other children at a park. To his dismay, Zachary talks his way out of trouble when he's confronted by the police. He hopes that's the end of it. Then he finds Zachary at a diner and then at a grocery store. He knows their encounters aren't coincidences. And just as Andrew prepares to defend his family, Grace vanishes. As the police search stalls and the leads dry up, Andrew decides to take matters into his own hands. He starts by searching for sex offenders in the area and researching enhanced interrogation techniques... He convinces himself he'll do anything to rescue his daughter, unaware of the pure evil he'll face in his journey. He's willing to hurt-to torture-anyone to save his family. Jon Athan, the author of Into the Wolves' Den and The Abuse of Ashley Collins, delves into the underworld of internet predators in this disturbing horror novel. Are your children safe? **WARNING:** This book contains graphic content. Reader discretion is advised.
