READING AND WRITING PATHWAYS THROUGH CHILDREN'S AND YOUNG ADULT LITERATURE

EXPLORING LITERACY, IDENTITY AND STORY WITH AUTHORS AND READERS

Taylor & Francis *This thought-provoking book will provide masters students, teachers and researchers with a toolkit and theoretical framework for teaching literacy through children's literature. It features innovative ideas for developing student and teacher experiences with literature and popular culture texts in the classroom, providing practical examples and teaching aids throughout. Taking a collaborative approach, Curtin explores how teachers and learners can engage with literature and its authors for the development of literacy in classroom practice. Connecting reader and writer identities and worlds through interviews with and suggested classroom activities from authors themselves, this text combines author, teacher and learner perspectives in the development of creative pedagogies that extend understandings of literacy beyond reading, writing and text. Exploring fairy-tales, comic books and graphic novels, children living in literature (i.e., texts which portray children, their lives and experiences), popular culture, young adult fiction, and non-fiction and digital texts such as blogs etc, this text develops a sociocultural understanding of*

literacy as a lived and contextually dependent practice where meaning is derived through relationships between people, settings and culture. Different contexts for literacy are explored, including reading and writing strategically (to learn about literacy and literature), widely (for personal purposes) and deeply (to transform understanding) (Short, 2011). This text will be an invaluable resource for teachers, researchers or anyone interested in reading and writing stories. The author interviews will also be of particular interest to older learners themselves as a way to develop their understanding of their own reading and writing practices. Pedagogies can be adapted to any age group, ranging from the early years to young adult.

STRENGTHENING FORENSIC SCIENCE IN THE UNITED STATES

A PATH FORWARD

National Academies Press *Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.*

CASES ON EMOTIONALLY RESPONSIVE TEACHING AND MENTORING

IGI Global *Educators who work with pre-service teachers understand the significant role they play in mentoring the next generation of teachers. Those who have "walked the talk" and been classroom teachers themselves, working with students daily over the course of a school year, can share powerful stories on transformative teaching. To fully prepare tomorrow's teachers, educators need to mix theory about best practice with the reality of teaching in classrooms. Cases on Emotionally Responsive Teaching and Mentoring provides a collection of case studies from former classroom teachers who now work with pre-service teachers to provide an understanding of the expectations and outcomes of teaching through actual K-12 teaching experiences. Featuring coverage on a broad range of topics such as cultural identity, teacher development, and learner diversity, this book is ideally designed for pre-service teachers, mentors, educators, administrators, professors, academicians, and students seeking current research on the diverse nature of schools, children, and learning and applying concepts to best suit the profession.*

READING COMPREHENSION DIFFICULTIES

PROCESSES AND INTERVENTION

Routledge *Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world. Although some disorders are fairly easily recognizable (e.g., mental retardation) or very specific to single components of performance and quite rare (e.g., developmental dyscalculia), schools must consider much larger populations of children with learning difficulties who cannot always be readily classified. These children present high-level learning difficulties that affect their performance on a variety of school tasks, but the underlying problem is often their difficulty in understanding written text. In many instances, despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately, some children do not seem to grasp the most important elements, or cannot find the pieces of information they are looking for. Sometimes these difficulties are not immediately detected by the teacher in the early school years. They may be hidden because the most obvious early indicators of reading progress in the teacher's eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages (sentences, short stories, etc.) with which the child is already familiar. However, as years go by and texts get more complex, comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning. In turn, studying, assimilating new information, and many other situations requiring text comprehension -- from problem solving to reasoning with linguistic contents -- could be affected. Problems with decoding, dyslexia, and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals. Normal reading comprehension has also been a favorite with researchers. However, scarce interest has been paid to subjects who have comprehension difficulties. This book is an attempt to remedy this situation. In so doing, this volume answers the following questions: * Does a reading comprehension problem exist in schools? * How important and widespread is the problem? * Is the problem specific? * How can a reading comprehension difficulty be defined and identified? * Does the "syndrome" have a single pattern or can different subtypes be identified? * What are the main characteristics associated with a reading comprehension difficulty? * When can other well-identified problems add to our understanding of reading comprehension difficulties? * Which educational strategies are effective in preventing and treating reading comprehension difficulties? * What supplementary information can we get from an international perspective?*

PARENTING MATTERS

SUPPORTING PARENTS OF CHILDREN AGES 0-8

National Academies Press *Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.*
