The Nordic Constitutions A Comparative and Contextual Study "This book analyses the Nordic constitutional systems of Denmark, Finland, Iceland, Norway and Sweden in a comparative context. It has two main aims: first to fill a gap in the literature by providing an accessible English language account of the Nordic constitutions, and second to provide a comparative analysis of them, revealing their similarities and differences within their political, historical and cultural contexts. In this respect, the book challenges the assumption that the Nordic countries form a homogeneous constitutional system due to their cultural and historical affinities, a view not necessarily supported by a close comparative examination. A key issue is EU membership - where the Nordic countries have made different choices at different times - and the book will show how this has affected the individual countries and whether a divide between EU member states (Denmark, Finland and Sweden) and non-members (Iceland and Norway) has appeared. Another key issue is how the ECHR has impacted the Nordic constitutional systems and whether the convention draws the Nordic systems closer to each other. The book represents a first of its kind in the English language, and will provide constitutional scholars with a valuable comparative resource on the Nordic region."-- **Comparative Methods in Law, Humanities and Social Sciences** *Edward Elgar Publishing* This cutting-edge book facilitates debate amongst scholars in law, humanities and social sciences, where comparative methodology is far less well anchored in most areas compared to other research methods. It posits that these are disciplines in which comparative research is not simply a bonus, but is of the essence. **Mentoring Comparative Lawyers: Methods, Times, and Places Liber Discipulorum Mauro Bussani** *Springer Nature* This volume features papers written in honor of Mauro Bussani, and celebrates the work and contributions of this renowned scholar of comparative law. The content reflects the various theoretical and practical areas in which he has already left a lasting mark. The essays explore the theory and practice of comparative law in different areas and contexts, and highlight innovative approaches to a large variety of hot-topic private and public law subjects. The authors include young scholars, lawyers, legal consultants, human rights activists, and practitioners, all of whom Professor Bussani has trained, supervised, and supported throughout their careers. The contributions emphasize the many ways in which Professor Bussani's teaching and scientific output have enriched, revolutionized, and challenged both theory and practice. They cover e.g. the law of secured transactions, Western law and legal pluralism, fashion law, contract law in China and in the Arab World, contract and tort in the West, scientific evidence, risk regulation, global finance, human rights indicators, anti-discrimination laws, democracy and climate change law. **Integral Human Development Challenges to Sustainability and Democracy** *Wipf and Stock Publishers* Pope Paul VI's notion of "integral human development," which was endorsed by his successors including Pope Francis, broke with the modern project of purely economic and technological development, resulting in an original understanding of development. Like a conventional notion of development, this theoretical construct favors economic growth, technological innovation, and the implementation of social programs. However, development is not just a socioeconomic and political issue, let alone a technical one; it raises, fundamentally, theological questions and points to important ethical challenges. Hence, integral human development is a vocation at which all personal, social, and political activity must be directed. As such, it is not a social but an anthropological program. Far from being a secular development theory, the notion of "integral human development" emphasizes the religious goal of reconciling humanity and God through the creation of a human family over and above material social and economic issues. Sustained by global principle and shaped by different cultural views, this book brings forth the uniqueness of this approach to development, examines its contribution to human welfare, and anticipates the resistances it may face. **Autonomous Public Bodies and the Law A European Perspective** *Edward Elgar Publishing* This insightful book discusses the impact of EU law on the creation and empowerment of autonomous public bodies (APBs) at Member State level and analyzes recent attempts of European states to rationalize delegation to APBs. It examines the tensions between these trends: under what conditions can APBs be considered legitimate forms of government in the light of modern conceptions of constitutionalism, the rule of law and democracy - values that are deeply rooted in European constitutions? And to what extent do EU obligations on the independence of national regulators, data protection authorities and the like conflict with those conceptions? **The Impact of eConveyancing on Title Registration A Risk Assessment** *Springer* This work is an assessment of how to manage risk in property transactions in the context of the move from paper-based to electronic conveyancing (eConveyancing). In particular the focus is on risks that impact on title registration, and the security, protection or lack thereof that this registration offers to land owners, third parties and property claimants. The impact is the extent to which a change in the transactional process may unintentionally affect risk (being the consequence of change and the likelihood of that consequence having a negative effect). The risks are identified, analysed and evaluated against the backdrop of title registration and the development of eConveyancing through a comparative analysis of the systems in Ireland and Ontario, while also referencing other developing electronic systems around the globe. **Comparative Law Law in Context** The most up-to-date and contextualised offering for comparative law students and scholars, referencing the newest research in the field. **Comparative Federalism Constitutional Arrangements and Case Law** *Hart Publishing* This is the first comprehensive book that explores the subject of federalism from the perspective of comparative constitutional law, whilst simultaneously placing a strong emphasis on how federal systems work in practice. This focus is reflected in the book's two most innovative elements. First, it analyses from a comparative point of view how government levels exercise their powers and interact in several highly topical policy areas like social welfare, environmental protection or migrant integration. Second, the book incorporates case law boxes discussing seminal judgments from federal systems worldwide and thus demonstrates the practical impact of constitutional jurisprudence on policymakers and citizens alike."This is simply the best analysis of contemporary federalism currently available. It is comprehensive in its coverage, thorough in its analysis, and persuasive in its conclusions. Every student of federalism, from novice to expert, will find benefit from this volume." Professor G Alan Tarr, Rutgers University"Wading through the thicket of the multiple forms that the federal idea has taken in the contemporary world, this remarkably comprehensive treatise backed by case law fills a long-awaited gap in the literature on comparative federalism. It combines a mastery of the literature on federal theory with a critical understanding of how it plays out in practice. Outstanding in the breadth of its scope, this magisterial survey will serve as a work of reference for generations of scholars who seek to understand how federalism works in developed as well as developing countries." Professor Balveer Arora, Jawaharlal Nehru University New Delhi"This book is an extraordinarily handy work of reference on the diverse federal-type systems of the world. It handles both shared principles and differences of perspective, structure or practice with confidence and ease. It will become a standard work for scholars and practitioners working in the field." Professor Cheryl Saunders, The University of Melbourne"This is a remarkable book - for its sheer breadth of scope, combining detail of practice with analysis of federal principles, and for its fresh look at federalism. With great erudition, drawing on world scholarship and the practice of federalism across the globe, Palermo and Kössler magnificently traverse from the ancient roots of federalism to the contemporary debates on ethno-cultural dimensions and participatory democracy. The book sets a new benchmark for the study of comparative federalism, providing new insights that are bound to influence practice in an era where federal arrangements are expected to deliver answers to key governance and societal challenges." Professor Nico Steytler, University of the Western Cape **A Research Agenda for Federalism Studies** *Edward Elgar Publishing* In this forward-thinking book, fifteen leading scholars set forth cutting-edge agendas for research on significant facets of federalism, including basic theory, comparative studies, national and subnational constitutionalism, courts, self-rule and shared rule, centralization and decentralization, nationalism and diversity, conflict resolution, gender equity, and federalism challenges in Africa, Asia, and the European Union. More than 40 percent of the world's population lives under federal arrangements, making federalism not only a major research subject but also a vital political issue worldwide. **The Concept of Proportionality in Public Law** *City University of HK Press* Proportionality is a German, and thus continental European, concept in public law that is applied by both the Court of Justice of the European Union (CJEU) and the European Court of Human Rights (ECtHR). The principle specifies that measures adopted by executive authorities should not exceed the limits of what is appropriate and necessary in order to achieve legitimate objectives in the interest of the public. Using a functional comparative approach, this book evaluates the extent to which proportionality has been integrated into the English and Hong Kong judicial systems by comparing case law in these courts with that of the CJEU and the ECtHR. The text also reviews the development of proportionality and presents a topical understanding of why its adoption and application have encountered difficulties, particularly regarding socio-economic rights, in some jurisdictions, such as the United Kingdom and Hong Kong. Written by a scholar with experience from both within the Hong Kong judicial system and from international research, this book is the first all-encompassing reference for legal practitioners worldwide. **EU Competition and State Aid Rules Public and Private Enforcement** *Springer* This book scrutinizes legislative novelties and case law in the area of EU competition and state aid rules, focusing on the interaction between public and private enforcement of those rules. It is intended for scholars, stakeholders and anyone involved in the process of law enforcement - judges, attorneys at law, corporate lawyers and market participants. The book features contributions by prominent competition law scholars offering an academic analysis of the topics covered, and by several EU General Court judges, including its President, Mr. Marc Jaeger, providing first-hand information on the application of the EU competition rules in the General Court. **The Oxford Handbook of Comparative Administrative Law** *Oxford University Press, USA* In this Handbook, distinguished experts in the field of administrative law discuss a wide range of issues from a comparative perspective. The book covers the historical beginnings of comparative administrative law scholarship, and discusses important methodological issues and basic concepts such as administrative power and accountability. **Comparative Law A Handbook** *Bloomsbury Publishing* This innovative, refreshing, and reader-friendly book is aimed at enabling students to familiarise themselves with the challenges and controversies found in comparative law. At present there is no book which clearly explains the contemporary debates and methodological innovations found in modern comparative law. This book fills that gap in teaching at undergraduate level, and for postgraduates will be a starting point for further reading and discussion. Among the topics covered are: globalisation, legal culture, comparative law and diversity, economic approaches, competition between legal systems, legal families and mixed systems, comparative law beyond Europe, convergence and a new ius commune, comparative commercial law, comparative family law, the 'common core' and the 'better law' approaches, comparative administrative law, comparative studies in constitutional contexts, comparative law for international criminal justice, judicial comparativism in human rights, comparative law in law reform, comparative law in courts and a comparative law research project. The individual chapters can also be read as stand-alone contributions and are written by experts such as Masha Antokolskaia, John Bell, Roger Cotterell, Sjeř

van Erp, Nicholas Foster, Patrick Glenn, Andrew Harding, Peter Leyland, Christopher McCrudden, Werner Menski, David Nelken, Anthony Ogus, Esin Özücü, Paul Roberts, Jan Smits and William Twining. Each chapter begins with a description of key concepts and includes questions for discussion and reading lists to aid further study. Traditional topics of private law, such as contracts, obligations and unjustified enrichment are omitted as they are amply covered in other comparative law books, but developments in other areas of private law, such as family law, are included as being of current interest. **The Emergence of EU Contract Law Exploring Europeanization** *Oxford University Press* The emergence of an EU contract law is one of the most significant legal developments in Europe today. Exploring the origins and evolution of the discipline, from the Sales Directive to the Common Frame of Reference, the book advances a framework for the further harmonization of contract law that embraces diversity and pluralism. **Privatising the Public University** *Routledge* First Published in 2011. Routledge is an imprint of Taylor & Francis, an informa company. **Alternative Dispute Resolution in European Administrative Law** *Springer* This book examines the role, the general framework and the empirical effectiveness of the main alternative dispute resolution tools (administrative appeals, mediation, and ombudsman) in administrative matters, within the broader context of the administrative justice system. The book uses approaches from the fields of law, public administration, public policy and political science to assess the importance of different instruments for alternative dispute resolution, with an emphasis on administrative appeals. **Dispute Resolution in China, Europe and World** *Springer Nature* This book brings together articles from leading experts in the field of international dispute resolution. The main focus is on the situation in Asia, though the European perspective also plays an important part. Accordingly, the focus on the Asian dispute resolution market with a distinctly American and European “touch” is one of the book’s most unique features. The dispute resolution market is rapidly transforming, and dispute resolution law is changing with it –especially in Asia. This book highlights recent advances and outlines future trends in this area. Emphasis is especially placed on International Commercial Arbitration Law on the one hand; and on International Investment Arbitration Law on the other. Two dedicated sections address these two topics, while another is dedicated to a quite new phenomenon in the field of international dispute resolution, the emergence of International Commercial Courts not only in Asia, but also in other regions of the world (e.g. in the Netherlands). This raises a host of interesting legal questions, which the book addresses. The book’s final section investigates general trends in dispute resolution (e.g. the rising cost problem in arbitration in general). **Public Services in EU Trade and Investment Agreements** *Springer Nature* This book examines the impact of EU trade and investment agreements on public services, a topic that continues to be the subject of heated political debate. It surveys a broad range of EU agreements and provides a comprehensive, up-to-date analysis of the rules and disciplines of such agreements that can affect the provision of public services. Going beyond the existing literature, it asks whether the treatment of public services in EU trade and investment agreements is coherent with the special status of public services in “internal” EU law, specifically internal market law, while also challenging the notion that trade and investment agreements automatically pose serious threats to public services. The book will be of keen interest to legal scholars and students specialising in EU and/or international economic law together with national and international policy-makers. Luigi F. Pedreschi is affiliated to the European University Institute in Florence, Italy, and currently works as a Research Associate at the Robert Schuman Centre for Advanced Studies, also located in Florence. **One Country, Two Systems, Three Legal Orders - Perspectives of Evolution Essays on Macau's Autonomy after the Resumption of Sovereignty by China** *Springer Science & Business Media* “One Country, Two Systems, Three Legal Orders” – Perspectives of Evolution – : Essays on Macau’s Autonomy after the Resumption of Sovereignty by China” can be said, in a short preamble-like manner, to be a book that provides a comprehensive look at several issues regarding public law that arise from, or correlate with, the Chinese apex motto for reunification – One Country, Two Systems – and its implementation in Macau and Hong Kong. Noble and contemporary themes such as autonomy models and fundamental rights are thoroughly approached, with a multilayered analysis encompassing both Western and Chinese views, and an extensive comparative law acquis is also brought forward. Furthermore, relevant issues on international law, criminal law, and historical and comparative evolutions and interactions of different legal systems are laid down in this panoramic, yet comprehensive book. One cannot but underline the presence, in the many approaches and comments, of a certain aura of a modern Kantian cosmopolitanism revisitation throughout the work, especially when dealing with the cardinal principle of «One Country, Two Systems», which enabled a peaceful and integral reunification ex vi international law – the Joint Declarations – that ended an external and distant control. **Consumer Involvement in Private EU Competition Law Enforcement** *Oxford University Press, USA* Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law. Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures, and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy-makers, and practitioners in the field. **Sentencing Policy and Social Justice** *Oxford University Press* Sentencing Policy and Social Justice argues that the promotion of social justice should become a key objective of sentencing policy, advancing the argument that the legitimacy of sentencing ultimately depends upon the strength of the relationship between social morality and penal ideology. It sheds light on how shared moral values can influence sentencing policy at a time when relationships of community appear increasingly fragmented, arguing that sentencing will be better placed to make a positive contribution to social justice if it becomes more sensitive to the commonly-accepted moral boundaries that underpin adherence to the 'rule of law'. The need to reflect public opinion in sentencing has received significant attention more recently, with renewed interest in jury sentencing, 'stakeholder sentencing', and the involvement of community views when regulating policy. The author, however, advocates a different approach, combining a new theoretical focus with practical suggestions for reform, and arguing that the contribution sentencing can make to social justice necessitates a fundamental change in the way shared values about the advantages of punishment are reflected in penal ideology and sentencing policy. Using examples from international, comparative and domestic contexts to advance the moral and ethical case for challenging the existing theories of sentencing, the book develops the author's previous theoretical ideas and outlines how these changes could be given practical shape within the context of sentencing in England and Wales. It assesses the consequences for penal governance due to increased state regulation of discretionary sentencing power and examines the prospects for achieving the kind of moral transformation regarded as necessary to reverse such a move. To illustrate these issues each chapter focuses on a particularly problematic area for contemporary sentencing policy; namely, the sentencing of women; the sentencing of irregular migrants; sentencing for offences of serious public disorder; and sentencing for financial crime. **Public Services and the European Union Healthcare, Health Insurance and Education Services** *Springer Science & Business Media* Politically sensitive and economically important, welfare services such as health care, health insurance and education have opened up a heated debate in the EU. The application of EU law to welfare services raises discontent from the part of the Member States who perceive their systems to be under threat. Resisting to the application of the EU law is sometimes seen as part of protecting those values. This book suggests that this resistance is largely unjustified. EU law is not damaging to welfare systems, but it provides adequate balancing mechanisms to ensure that all interests are protected. The approach taken in analysing the impact of EU law on welfare services is to look at the negative integration process and answer the questions related to the extent to which EU law applies to welfare services and the kinds of safeguards the Court offers for these services. The proportionality principle distinguishes itself as the central element in balancing national and Community interests. Being part of the broader integration process, negative harmonization creates legislative lacunae, and therefore, this book also looks at alternative solutions to the negative harmonization process, namely positive and soft law. **Metaphor in Legal Discourse** *Cambridge Scholars Publishing* This book explores different aspects of metaphoricality in legal discourse, from court proceedings and written institutionalised texts to judges' argumentation and in spoken records, among others. It brings together linguists and law professionals from six different countries to investigate metaphor as a conceptual phenomenon accessible through language and, more specifically, through actual linguistic contexts of use. **Dialogues on Human Rights and Legal Pluralism** *Springer Science & Business Media* Human rights have transformed the way in which we conceive the place of the individual within the community and in relation to the state in a vast array of disciplines, including law, philosophy, politics, sociology, geography. The published output on human rights over the last five decades has been enormous, but has remained tightly bound to a notion of human rights as dialectically linking the individual and the state. Because of human rights' dogged focus on the state and its actions, they have very seldom attracted the attention of legal pluralists. Indeed, some may have viewed the two as simply incompatible or relating to wholly distinct phenomena. This collection of essays is the first to bring together authors with established track records in the fields of legal pluralism and human rights, to explore the ways in which these concepts can be mutually reinforcing, delegitimizing, or competing. The essays reveal that there is no facile conclusion to reach but that the question opens avenues which are likely to be mined for years to come by those interested in how human rights can affect the behaviour of individuals and institutions. **Fair Trial and Judicial Independence Hungarian Perspectives** *Springer Science & Business Media* This comprehensive publication analyzes numerous aspects of the relationship between judicature and the fair trial principle in a comparative perspective. In addition, it examines the manifestation of some of the most significant elements inherent to the fair trial concept in different legal systems. Along with expansion of judicial power during the past century and with the strengthening of judicial independence, the fair trial requirement has appeared more often, especially in different international agreements and national constitutions, as the summarizing principle of what were formerly constitutional principles pertaining to judicature. Despite its generality and supranational application, the methods of interpreting this clause vary significantly among particular legal systems. This book assumes that the substantive content of this term conveys relevance to the organizational independence of judicial power, the selection of judges, and the mutual relationship between the branches of power. The comparative studies included in this collection offer readers a widespread understanding of the aforementioned correlations and will ultimately contribute to their mastery of the concept of fair trial. **Criminal Misconduct in Office Law and Politics** *Oxford University Press* Should the criminal law be used to deter and punish corruption in politics: from employing family members at public expense to improper spending on elections, lobbying, and cronyism? How did so many MPs avoid facing charges after the 2009 government expenses scandal? In this book, Jeremy Horder tackles these questions and more. As well as offering the first treatment of the history, philosophy, and politics of the application of the offence of misconduct in office to Members of Parliament in England and Wales, Horder explains how political corruption might be dealt with in future, and how politicians could be held accountable for their actions so that they are deterred from betraying the public's trust. Use of the criminal law should not be the sole or even the main way to remedy all corruption in politics. Nevertheless, for too long the offence of misconduct in a public office has had an ambiguous status in the political realm. If we are to preserve the good health of government it must be seen as a constitutional fundamental. A charge of misconduct provides a way in which corrupt conduct on the part of legislators can be punished with an appropriate label, holding them to account for the misuse of power by reference to the standards of ordinary people. When other - civil law or regulatory - means prove insufficient, it should be possible for ordinary members of a jury, and not for Parliamentarians or other officials, to decide whether, for example, the expenditure of public money on legislators' private income and benefits amounts to a criminal abuse of the public's trust. This book offers an authoritative and accessible account of a 'bottom-up' (jury standards-led), as opposed to a 'top-down' (officials applying their own standards), approach to the role of the criminal law in constitutional contexts. **Understanding Sport Organizations Applications for Sport Managers** *Human Kinetics* The classic groundbreaking text for understanding organizational theory in the sport industry is back in an extensively revised new edition. With an added emphasis on organizational behavior and practical applications of the theory, *Understanding Sport Organizations: Applications for Sport Managers, Third Edition*, provides a logical progression to understanding the many components of and processes in sport organizations. Readers will gain a strong theoretical foundation while learning how it applies within the context of the ever-changing field of sport management. In this third edition, new chapters incorporate critical concepts that sport managers in the current era must be familiar with: Different policy types and the responses of sport organizations to policy Perspectives of marketing of sport and marketing through sport Control in sport organizations Sex and gender in sport organizations Volunteer management in sport Dimensions and assessment of governance in sport organizations Mental health difficulties and management strategies within sport environments Applying statistical analysis to support analytic decision making in sport Corporate social responsibility Procurement and sport organizations To facilitate comprehension and application, each chapter opens with a list of key concepts and a real-world, contemporary scenario to demonstrate the relevance of theory and behavior in the sport industry. Time Out sidebars offer accounts from actual sport organization situations or from research findings to further illustrate issues being discussed. Chapter summaries and review questions are provided to stimulate discussion about the central issues from each chapter. Key Issues for Sport Managers boxes highlight how chapter content is applied at the level of sport manager, and

closing Case for Analysis examples allow readers to directly apply information from each chapter. Real-world examples throughout the text provide opportunities for additional exploration and application of relevant concepts. Every chapter references key articles that build on the foundational framework presented and includes suggestions for further reading within general management and sport management literature. This thorough presentation of subject matter will guide readers to a greater and more practical understanding of core issues. Synthesizing modern conceptual and empirical research from many fields of management into a practical, engaging look at the sport management field. *Understanding Sport Organizations: Applications for Sport Managers, Third Edition*, is an invaluable resource for students and current practitioners alike. **Blurry Boundaries of Public and Private International Law Towards Convergence Or Divergent Still?** *Springer Nature* This book examines interactions and discusses intersectionality between public international law and private international law. With contributions from scholars from USA, Canada, Australia, India and EU, this book brings out truly international perspectives on the topic. The contributions are arranged in four themes: Public international law and private international law: historical and theoretical considerations of the boundary; Harmonisation of private international law by public international law instruments: evaluation of process, problems, and effectiveness; Case studies of intersectionality between public international law and private international law; Future trends in the relationship between public international law and private international law. The ultimate aim of this book is to analyse whether these two legal disciplines become convergent or they are still divergent as usual. With wide coverage spanning across these four themes, the book has takeaways for a wide readership. For scholars and researchers in the fields of public international law and private international law, this book sparks further thoughts and debates in both disciplines and highlight areas for continuing research. For practitioners, this book offers fresh insights and perspectives on contemporaneous issues of significance. This book is also be a great resource for students at both undergraduate and postgraduate levels taking subjects such as public international law or private international law or some related disciplines such as international sale of goods, international trade law or international investment law to advance their knowledge and understanding of the disciplines. **Governance by Numbers The Making of a Legal Model of Allegiance** *Hart Publishing* The West's cherished dream of social harmony by numbers is today disrupting all our familiar legal frameworks - the state, democracy and law itself. Its scientific vision shaped both Taylorism and Soviet Planning, and today, with 'globalisation', it is flourishing in the form of governance by numbers. Shunning the goal of governing by just laws, and empowered by the information and communication technologies, governance champions a new normative ideal of attaining measurable objectives. Programmes supplant legislation, and governance displaces government. However, management by objectives revives forms of law typical of economic vassalage. When a person is no longer protected by a law applying equally to all, the only solution is to pledge allegiance to someone stronger than oneself. Rule by law had already secured the principle of impersonal power, but in taking this principle to extremes, governance by numbers has paradoxically spawned a world ruled by ties of allegiance. **EU External Relations and Systems of Governance The CFSP, Euro-Mediterranean Partnership and Migration** *Routledge* This book takes a fresh look at the external relations of the European Union (EU) and in particular the Common Foreign and Security Policy (CFSP). Rather than focusing exclusively on the competence aspects of the institutions and actors, the book makes the case that the CFSP can be understood as a system of governance, which produces effects beyond the traditional tools associated with foreign policy. The theoretical approach draws on insights from new institutionalism, constructivism and the institutional theory of law and emphasises how the institutionalised forms of cooperation in the external sphere contribute to a social reality in which the 'added value' of the CFSP can be seen. Paul James Cardwell takes the Euro-Mediterranean Partnership (EuroMed) as a case study. Not initially a CFSP project, EuroMed has become the frame for EU foreign policy in the region as an emerging system of governance in which the EU institutions play a central role. Having recently been relaunched as the Barcelona Process: Union for the Mediterranean, it is a topical subject. With the increasing importance of migration on the EU's agenda, the book looks at the relationship between migration, EuroMed and the CFSP and argues that the legal effects of the CFSP can be felt beyond the Treaty-based instruments. EU External Relations and Systems of Governance will be of interest to students and scholars of Law, Politics and European studies researching in the dynamic fields of EU external relations and foreign policy, as well as policy-makers and non-governmental organisations striving to better understand how the EU and its systems of governance operate. **Success and Failure in Public Governance A Comparative Analysis** *Edward Elgar Publishing* Why do some policies succeed so well while others, in the same sector or country, fail dramatically? The aim of this book is to answer this question and provide systematic research on the nature, sources and consequences of policy failure. The expert contributors analyse and evaluate the success and failure of four policy areas (Steel, Health Care, Finance, HIV and the Blood Supply) in six European countries, namely France, Germany, the Netherlands, the UK, Spain and Sweden. The book is therefore able to compare success and failure across countries as well as policy areas, enabling a test of a variety of theoretical assumptions about policy making and government. **Criminal Law-Making Theory and Practice** *Springer Nature* This book intends to contribute to the consolidation of the new approach to lawmaking that has taken place in the last 20 years in legal philosophy and legal theory, spreading to other legal fields, especially criminal law. This new legislation science focusing on criminal problems has triggered a growing interest in the field, a dynamic which has led to a long-needed convergence of disciplines such as administrative law, criminal law, criminology, political science, sociology and, of course, legal philosophy to contribute to a more rational decision-making process for the construct of criminal laws. With the intention to continue on with the building of a solid "Criminal Legislation Science", this work presents scholars, lawmakers and students various emblematic approaches to enrich the discussion about different and promising tools and theoretical frameworks. **Debating Legal Pluralism and Constitutionalism New Trajectories for Legal Theory in the Global Age** *Springer Nature* The book gathers the general report and the national reports presented at the XXth General Congress of the IACL, in Fukuoka (Japan), on the topic "Debating legal pluralism and constitutionalism: new trajectories for legal theory in the global age". Discussing the major contemporary changes occurring in and problems faced by domestic legal systems in the global age, the book describes how and to what extent these trends affect domestic legal orderings and practices, and challenges the traditional theoretical lenses that are offered to tackle them: constitutionalism and pluralism. Combining comparative law and comparative legal doctrine, and drawing on the national contributions, the general report concludes that most of the classic tools offered by legal doctrine are not appropriate to address most of today's practical and theoretical global legal challenges, and as such, the book also offers new intellectual tools for the global age. **International and Foreign Legal Research A Coursebook. Second Edition** *Martinus Nijhoff Publishers* International and Foreign Legal Research: A Coursebook, second edition by Hoffman and Rumsey, now in a second edition, is designed for classes in foreign and international legal research. Topics covered in the book range from treaty research to chapters on particular subjects of international law. Coverage also includes chapters on researching foreign and comparative law as well as major international organizations, including the UN and the EU. **The Global South and Comparative Constitutional Law** *Oxford University Press, USA* Although the Global South represents 'most of the world' in terms of constitutions and population, it is underrepresented in comparative constitutional discourse. This book fills the gap in this scholarship by tackling the most important aspects of comparative law from the Southern perspective. **The Oxford Handbook of Administrative Justice** *Oxford University Press* The Oxford Handbook of Administrative Justice examines the wide range of scholarship exploring the administrative decisions made by public authorities that affect individual citizens and the mechanisms available for the provision of redress. The Handbook identifies and provides a survey of key transnational themes in administrative justice research, considers theoretical and methodological approaches to administrative justice, and provides a view of the future of administrative justice research. One aspect of administrative justice, namely the study of law and administration, is a core component of law school syllabuses and scholarly research around the world. For many public lawyers, this area of study has been focused heavily on legalistic redress systems (e.g. judicial review). Justice against administrations, however, is delivered through a much broader range of mechanisms than legalistic processes alone: fair initial decision-making procedures, internal review systems, ombuds, administrative tribunals/adjudication, and other institutions play a vital role. Despite their importance to modern governance across the globe (and to the lives of individual citizens), these broader aspects of administrative justice have been left relatively neglected and under-researched, and the Handbook represents a groundbreaking achievement in establishing administrative justice research as a vital and discrete area of study. The Oxford Handbook of Administrative Justice will be an essential resource for legal scholars and social scientists wishing to understand the complexity of this important field. **The Role of Lawyers in Access to Justice Asian and Comparative Perspectives** *Cambridge University Press* Analyses access to justice in Asia and other non-Western jurisdictions, including programmes of mandatory public interest activities. **European Yearbook of Constitutional Law 2021 Constitutional Advice** *Springer Nature* **Public Procurement and the EU Competition Rules** *Bloomsbury Publishing* Public procurement and competition law are both important fields of EU law and policy, intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted, but not closely examined. This work is the most comprehensive attempt to date to explain the many ways in which these fields, often considered independent of one another, interact and overlap in the creation of the internal market. This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement, which consolidate the principle of competition in terms very close to those advanced by the author in the first edition. This second edition builds upon this approach and continues to ask how competition law principles inform and condition public procurement rules, and whether the latter (in their revised form) are adequate to ensure that competition is not distorted. The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective. Proceeding through a careful assessment of the general rules of competition and public procurement, the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement. It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law. **Handbook of Research on Global Challenges for Improving Public Services and Government Operations** *IGI Global* As the field of public administration has been changing due to globalization, government reforms, and increasing governance practices within intergovernmental networks, research and teaching in public administration also adapted itself to these changes. Public policy research and instruction has become transformed and has diffused into other countries with the help of international organizations and other agents of change and transfer. Research in this field is seen as an opportunity for a definitive shift from traditional models of public administration in the sense that policies may be better designed, articulated, and governed through a collaborative approach, while service provision could be enhanced in terms of proximity, representativeness, and innovativeness. The Handbook of Research on Global Challenges for Improving Public Services and Government Operations provides comprehensive approaches to the study of public administration and public policy from a comparative perspective and includes sound theories and concepts for understanding opportunities and challenges governments face when seeking to improve public services and government operations. The book is a compilation of selective high-quality chapters covering cases, experiences, and practical recommendations on topics related to public administration, public policy, social policy, public management, and public affairs. This book is ideal for policymakers, students, and researchers in the field of public administration, public policy, governance, public management, public affairs, citizen engagement, and administrative sciences and management along with practitioners, stakeholders, and academicians interested in the best practices of various countries in public administration and policy.
