Take Control of Your Paperless Office, 3rd Edition alt concepts Digitize your documents while reducing incoming and outgoing paper! Updated 03/21/2017 Join Joe Kissell as he helps you clear the chaos of an office overflowing with paper. With Joe's guidance you can develop a personal clean-up strategy and choose your Mac-compatible tools—a scanner and the software you need to perform OCR (optical character recognition)—plus devices and services for storing your digitized documents and tools to categorize, locate, and view your digital document collections. Once you have your gear in hand, Joe shows you how to convert your paper documents to digitized files and gives you ideas for how to organize your office workflow, explaining how to develop day-to-day techniques that reduce the amount of time you spend pressing buttons, launching software, and managing documents. Bonus! The book also comes with downloadable “folder action” AppleScripts that simplify the process of OCR-ing PDFs in Adobe Acrobat, ABBYY FineReader Express, PDFpen/PDFpenPro, and Readiris. Save or move a PDF in the appropriate folder, and the script does the rest! You'll master these paper-reducing skills:

- Scanning or photographing documents you find while out and about—business cards, receipts, menus, flyers, and more—so you keep only digitized versions. Joe discusses a variety of mobile scanning options, with an emphasis on using a camera-equipped iOS device, but with mention of a few options for Android smartphones.
- Creating a digitized image of your signature so you can sign and share documents digitally, rather than printing them for the sole purpose of signing them with a pen.
- Setting up your computer to send and receive faxes so you can avoid using a physical fax machine with paper input and output. Joe describes online fax services and using a fax modem (note that fax modem support is not available in macOS 10.12 Sierra). Joe also discusses standard techniques for reducing paper—paperless billing, online bank statements, reducing unwanted catalogs and junk mail, and more, as well as less common practices, such as paperless postal mail services and check depositing services. You'll find answers to numerous questions, including:

- What is a searchable PDF, and why is it key to a paperless office?
- What differentiates document scanners from other types of scanners?
- What's a book scanner?
- What if I need a mobile, portable scanner?
- What does TWAIN stand for, and should my scanner support it?
- Why do I need OCR software, and what features should I look for?
- What scanners and OCR products does Joe recommend?
- How can I automate my workflow for scanning documents?
- How should I name and file my digitized documents?
- What paper documents should I keep in physical form?
- How do I use common tools to add a signature to a PDF?
- How can I access my digital documents remotely?
- How should I back up my important digital documents?

The series is aimed at providing insight into why efforts to keep forests standing, such as initiatives like Reducing Emissions from Deforestation and Forest Degradation (REDD+), are still so far from altering development trajectories. It underlines the importance of understanding the politics of multilevel governance in forest, land and climate policy and practice, and identifies potential ways forward.

The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.

THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."
