## The Secret of Skeleton Island

The Three Investigators are assisted by a Greek youth as they search for clues to a mysterious thief on an island once inhabited by pirates.

## Seeing Like a State

## How Certain Schemes to Improve the Human Condition Have Failed

Yale University Press “One of the most profound and illuminating studies of this century to have been published in recent decades.”—John Gray, New York Times Book Review Hailed as “a magisterial critique of top-down social planning” by the New York Times, this essential work analyzes disasters from Russia to Tanzania to uncover why states so often fail—sometimes catastrophically—in grand efforts to engineer their society or their environment, and uncovers the conditions common to all such planning disasters. “Beautifully written, this book calls into sharp relief the nature of the world we now inhabit.”—New Yorker “A tour de force.”— Charles Tilly, Columbia University

## The Three Investigators in The Mystery of the Kidnapped Whale

Random House Books for Young Readers The three investigators, attempting to rescue a beached whale, end up searching for sunken treasure.

# The Mystery of the Silver Spider

Turtleback Three young detectives travel abroad to solve a mystery involving a silver spider and a political plot that endangers the life of a young prince.

# Life from Scratch

# Family Traditions That Start with You

HarperCollins From the television host, actress, and mother of three, a fabulous collection of season-by-season recipes, holiday hacks, birthday rituals, and date night ideas for creating wonderful family celebrations and cherished memories. Television personality Vanessa Lachey is a dedicated mom of three, a supportive wife to singer Nick Lachey, and someone who freely shares her “perfectly imperfect” home and family life. But like many people, Vanessa didn’t come from a family whose traditions were passed down from generation to generation. Her mom left when she was nine, and when she began her own family, Vanessa had to rely on her own imagination to create celebrations and milestone markers that would become annual rituals. In Life from Scratch, Vanessa shares personal stories, ideas, delicious recipes, and parenting tips you can use to make your own celebrations unique and unforgettable. Inside you’ll discover the simple gift-giving custom Vanessa shares with her best girlfriends each year; the date-night tradition that she and Nick swear by; and her fool-proof recipe for “authentic” Chicken Adobo she serves to family and friends. A fun, uplifting yearlong guide that celebrates families that color outside the lines, Life from Scratch will inspire people to make each season, and each special moment, their own.

# Everyday Stalinism

# Ordinary Life in Extraordinary Times: Soviet Russia in the

## 1930s

Oxford University Press Focusing on urban areas in the 1930s, this college professor illuminates the ways that Soviet city-dwellers coped with this world, examining such diverse activities as shopping, landing a job, and other acts.

## Illness and Inhumanity in Stalin's Gulag

Yale University Press A new and chilling study of lethal human exploitation in the Soviet forced labor camps, one of the pillars of Stalinist terror In a shocking new study of life and death in Stalin's Gulag, historian Golfo Alexopoulos suggests that Soviet forced labor camps were driven by brutal exploitation and often administered as death camps. The first study to examine the Gulag penal system through the lens of health, medicine, and human exploitation, this extraordinary work draws from previously inaccessible archives to offer a chilling new view of one of the pillars of Stalinist terror.

## Mastering Mountain Bike Skills

Human Kinetics If you want to ride like a pro, you should learn from a pro! In Mastering Mountain Bike Skills, Third Edition, world-champion racer Brian Lopes and renowned riding coach Lee McCormack share their elite perspectives, real-life race stories, and their own successful techniques to help riders of all styles and levels build confidence and experience the full exhilaration of the sport. Mastering Mountain Bike Skills is the best-selling guide for all mountain biking disciplines, including enduro, pump track racing, dual slalom, downhill, cross-country, fatbiking, and 24-hour races. It absolutely captures the sport and offers everything you need to maximize performance and excitement on the trail. Learn how to select the proper bike and customize it for your unique riding style. Develop a solid skills base so you can execute techniques with more power and precision. Master the essential techniques to help you carve every corner, nail every jump, and conquer every obstacle in your path. Last, but not least, prepare yourself to handle every type of weather and trail condition that the mountain biking world throws at you. Whether you're a recreational rider looking to rock the trails with friends, are a seasoned enthusiast, or are aspiring to be a top pro, Mastering Mountain Bike Skills will improve your ride and dust the competition. Don't just survive the trail—own the trail, and enjoy the thrill of doing it.

# Post-Imperium

## A Eurasian Story

Brookings Institution Press The war in Georgia. Tensions with Ukraine and other nearby countries. Moscow's bid to consolidate its "zone of privileged interests" among the Commonwealth of Independent States. These volatile situations all raise questions about the nature of and prospects for Russia's relations with its neighbors. In this book, Carnegie scholar Dmitri Trenin argues that Moscow needs to drop the notion of creating an exclusive power center out of the post-Soviet space. Like other former European empires, Russia will need to reinvent itself as a global player and as part of a wider community. Trenin's vision of Russia is an open Euro-Pacific country that is savvy in its use of soft power and fully reconciled with its former borderlands and dependents. He acknowledges that this scenario may sound too optimistic but warns that the alternative is not a new version of the historic empire but instead is the ultimate marginalization of Russia.

## Breaking the Ice: The Role of Civil Society and Media in Turkey-Armenia Relations

GPoT Almost three years have passed since the Protocols on Turkey-Armenia relations were signed in October 2009. With their failure to be ratified less than a year later, Turkey-Armenia relations have once again seemingly fallen off of the Turkish government, media and public's agenda. Three years from now on April 24, Armenians will commemorate the 100th anniversary of the mass massacres and deportations of Armenians that took place in the Ottoman Empire between 1915 and 1917. Without a new initiative to re-start the rapprochement process, it seems like the next time the Armenia issue will be on Turkey's agenda in a significant way will be during this commemoration. In short, official relations are "frozen" at present and perhaps for the near future. Yet GPoT Center's extensive experience in "second-track" diplomacy and conflict resolution projects in various countries gives it a long-term view that lends it hope about future prospects for Turkey- Armenia relations. Particularly in Armenia, GPoT has enacted and continues to enact numerous exchange programs, roundtable discussions and research projects with its Armenian partners that bring together stakeholders from both countries to create and foster dialogue.

## Reassessing Lukashenka

## Belarus in Cultural and Geopolitical Context

Springer What are the factors of Lukashenka's longevity at the helm of power? This question is addressed in the context of Belarusian history and identity, not as an outcome of a form of government deceitfully imposed on an allegedly benighted people whom better positioned and informed outsiders seek to enlighten and liberate.

## The Search for Europe

## Contrasting Approaches

La fabrica The eighth volume in the annual series sponsored by BBVA as part of its OpenMind initiative devoted to disseminating knowledge on key issues of our time, The Search for Europe analyses the present and future of the old continent and its integration project, which is certainly the most ambitious political and economic integration project ever attempted in history, and a benchmark for similar processes in other regions.

## The Mystery of the Smashing Glass

Random House Books for Young Readers Three young detectives try to trap an invisible vandal who has been breaking car windows all over town.

## Alfred Hitchcock and the Three Investigators in The

# Mystery of the Invisible Dog

## Based on Characters Created by Robert Arthur

Random House Books for Young Readers The Three Investigators are hounded by supernatural forces as they attempt to recover a stolen sculpture of a legendary wolf-dog.

# Alfred Hitchcock and the Three Investigators in The Mystery of the Magic Circle

Random House Books for Young Readers Three young sleuths uncover a coven of witches when they search for the missing memoirs of a movie star.

## The Fifth Child

Vintage Doris Lessing's contemporary gothic horror story—centered on the birth of a baby who seems less than human—probes society's unwillingness to recognize its own brutality. Harriet and David Lovatt, parents of four children, have created an idyll of domestic bliss in defiance of the social trends of late 1960s England. While around them crime and unrest surge, the Lovatts are certain that their old-fashioned contentment can protect them from the world outside—until the birth of their fifth baby. Gruesomely goblin-like in appearance, insatiably hungry, abnormally strong and violent, Ben has nothing innocent or infant-like about him. As he grows older and more terrifying, Harriet finds she cannot love him, David cannot bring himself to touch him, and their four older children are afraid of him. Understanding that he will never be accepted anywhere, Harriet and David are torn between their instincts as parents and their shocked reaction to this fierce and unlovable child whose existence shatters their belief in a benign world.

## Writing Resistance

# Revolutionary memoirs of Shlissel'burg Prison, 1884-1906

UCL Press In 1884, the first of 68 prisoners convicted of terrorism and revolutionary activity were transferred to a new maximum security prison at Shlissel'burg Fortress near St Petersburg. The regime of indeterminate sentences in isolation caused severe mental and physical deterioration among the prisoners, over half of whom died. But the survivors fought back to reform the prison and improve the inmates' living conditions. The memoirs many survivors wrote enshrined their story in revolutionary mythology, and acted as an indictment of the Tsarist autocracy's loss of moral authority. Writing Resistance features three of these memoirs, all translated into English for the first time. They show the process of transforming the regime as a collaborative endeavour that resulted in flourishing allotments, workshops and intellectual culture - and in the inmates running many of the prison's everyday functions. Sarah J. Young's introductory essay analyses the Shlissel'burg memoirs' construction of a collective narrative of resilience, resistance and renewal. It uses distant reading techniques to explore the communal values they inscribe, their adoption of a powerful group identity, and emphasis on overcoming the physical and psychological barriers of the prison. The first extended study of Shlissel'burg's revolutionary inmates in English, Writing Resistance uncovers an episode in the history of political imprisonment that bears comparison with the inmates of Robben Island in South Africa's apartheid regime and the Maze Prison in Belfast during the Troubles. It will be of interest to scholars and students of the Russian revolution, carceral history, penal practice and behaviours, and prison and life writing.

## Neuroscientific Basis of Dementia

Birkhäuser In step with our growing lifespan, dementia is becoming a widespread handicap to the health and well-being of individuals and a burden on human society world-wide. The increasing prevalence of this tragic condition has stimulated an explosion of scientific research in the last ten years, which resulted in numerous profound insights and technical innovations. This timely volume presents both an overall and a detailed overview of the current worldwide knowledge about the neuroscientific basis of dementia. Leading

authorities in their fields provide a far-reaching synthesis of all topics in dementia research, including pathogenesis of dementia, neuroimaging of the earliest alterations, potential biological and genetic markers for Alzheimer`s Disease and new therapeutic strategies. Each chapter discusses clinical implications and areas of controversy, highlights the wide range of current and future therapeutic possibilities and indicates promising directions for further research...

## A History of Yugoslavia

Why did Yugoslavia fall apart? Was its violent demise inevitable? Did its population simply fall victim to the lure of nationalism? How did this multinational state survive for so long, and where do we situate the short life of Yugoslavia in the long history of Europe in the twentieth century? A History of Yugoslavia provides a concise, accessible, comprehensive synthesis of the political, cultural, social, and economic life of Yugoslavia--from its nineteenth-century South Slavic origins to the bloody demise of the multinational state of Yugoslavia in the 1990s. Calic takes a fresh and innovative look at the colorful, multifaceted, and complex history of Yugoslavia, emphasizing major social, economic, and intellectual changes from the turn of the twentieth century and the transition to modern industrialized mass society. She traces the origins of ethnic, religious, and cultural divisions, applying the latest social science approaches, and drawing on the breadth of recent state-of-the-art literature, to present a balanced interpretation of events that takes into account the differing perceptions and interests of the actors involved. Uniquely, Calic frames the history of Yugoslavia for readers as an essentially open-ended process, undertaken from a variety of different regional perspectives with varied composite agenda. She shuns traditional, deterministic explanations that notorious Balkan hatreds or any other kind of exceptionalism are to blame for Yugoslavia's demise, and along the way she highlights the agency of twentieth-century modern mass society in the politicization of differences. While analyzing nuanced political and social-economic processes, Calic describes the experiences and emotions of ordinary people in a vivid way. As a result, her groundbreaking work provides scholars and learned readers alike with an accessible, trenchant, and authoritative introduction to Yugoslavia's complex history.

## Collected Works of Velimir Khlebnikov: Letters and

## theoretical writings

Harvard University Press Dubbed by his fellow Futurists the "King of Time," Velimir Khlebnikov (1885-1922) spent his entire brief life searching for a new poetic language to express his convictions about the rhythm of history, the correspondence between human behavior and the "language of the stars." The result was a vast body of poetry and prose that has been called hermetic, incomprehensible, even deranged. Of all this tragic generation of Russian poets (including Blok, Esenin, and Mayakovsky), Khlebnikov has been perhaps the most praised and the more censured. This first volume of the Collected Works, an edition sponsored by the Dia Art Foundation, will do much to establish the counterimage of Khlebnikov as an honest, serious writer. The 117 letters published here for the first time in English reveal an ebullient, humane, impractical, but deliberate working artist. We read of the continuing involvement with his family throughout his vagabond life (pleas to his smartest sister, Vera, to break out of the mold, pleas to his scholarly father not to condemn and to send a warm overcoat); the naive pleasure he took in being applauded by other artists; his insistence that a young girl's simple verses be included in one of the typically outrageous Futurist publications of the time; his jealous fury at the appearance in Moscow of the Italian Futurist Marinetti; a first draft of his famous zoo poem ("O Garden of Animals!"); his seriocomic but ultimately shattering efforts to be released from army service; his inexhaustibly courageous confrontation with his own disease and excruciating poverty; and always his deadly earnest attempt to make sense of numbers, language, suffering, politics, and the exigencies of publication. The theoretical writings presented here are even more important than the letters to an understanding of Khlebnikov's creative output. In the scientific articles written before 1910, we discern foreshadowings of major patterns of later poetic work. In the pan-Slavic proclamations of 1908-1914, we find explicit connections between cultural roots and linguistic ramifications. In the semantic excursions beginning in 1915, we can see Khlebnikov's experiments with consonants, nouns, and definitions spelled out in accessible, if arid, form. The essays of 1916-1922 take us into the future of Planet Earth, visions of universal order and accomplishment that no longer seem so farfetched but indeed resonate for modern readers.

## Studying Peoples in the People's Democracies II

# Socialist Era Anthropology in South-East Europe

LIT Verlag Münster Bulgaria and Serbia during socialism are outlined from many different points of view in this volume. Beyond local and personal trajectories the authors illuminate more general and comparative questions. Was there anything like a "socialist anthropology", common to all three countries? Did Soviet and/or Marxist influences, in the discipline and in society in general, penetrate so deeply as to form an unavoidable common denominator of anthropological practice? The answers turn out to be complex and subtle. While unifying ideological forces were very strong in the 1950s, diversity increased thereafter. Anthropology was entangled with national ideology in all three countries, but the evidence nonetheless calls for "polyphonic" interpretations.

## A Handbook on Sustainable Urban Mobility and Spatial Planning

### Promoting Active Mobility

United Nations This publication has been designed to assist member States in integrating transport, health, quality of life and environmental objectives into urban and spatial planning policies. It provides many references to case studies, good practices and examples from cities across the Euro-Asian region (and beyond) covering a wide array of thematic areas, including: the future of sustainable urban mobility; spatial planning in function of sustainable urban mobility and accessibility; public transport planning as a cornerstone of sustainable urban mobility; active mobility and how it promotes health and the environment; and the potential of Intelligent Transport Systems in an urban context. The publication puts forward a methodology for sustainable urban transport planning and introduces a concise set of key messages and recommendations as an input to the Fifth High-level Meeting on Transport, Health and Environment which takes place in Vienna from 26-27 November 2020.

# A History of Light and Colour Measurement

## Science in the Shadows

CRC Press 2003 Paul Bunge Prize of the Hans R. Jenemann Foundation for the History of Scientific Instruments Judging the brightness and color of light has long been contentious. Alternately described as impossible and routine, it was beset by problems both technical and social. How trustworthy could such measurements be? Was the best standard of intensity a gas lamp, an incandescent bulb, or a glowing pool of molten metal? And how much did the answers depend on the background of the specialist? A History of Light and Colour Measurement: Science in the Shadows is a history of the hidden workings of physical science—a technical endeavor embedded in a social context. It argues that this "undisciplined" subject, straddling academia, commerce, and regulation, may be typical not only of 20th century science, but of its future. Attracting scientists, engineers, industrialists, and artists, the developing subject produced a new breed of practitioners having mixed provenance. The new measurers of light had to decide the shape not only of their specialism but of their careers: were they to be a part of physics, engineering, or psychology? The physical scientists who dominated the subject into the early 20th century made their central aim the replacement of the problematic human eye with physical detectors of light. For psychologists between the wars, though, describing the complexity of color was more important than quantifying a handful of its dimensions. And after WWII, military designers shaped the subject of radiometry and subsumed photometry and colorimetry within it. Never attaining a professional cachet, these various specialists moved fluidly between science and technology; through government, industry, and administration.

## Top Secret Recipes Unlocked

## All New Home Clones of America's Favorite Brand-Name

## Foods

Penguin #1 bestselling Top Secret Recipes series with more than 4 million books sold! The kitchen clone recipe king is back with a new Top bestselling Top Secret Restaurant Recipes collection—the first book since his bestselling Top Secret Restaurant Recipes 2. ## Ukraine and Russia

### People, Politics, Propaganda and Perspectives

E-IR Edited Collections The dangerous turmoil provoked by the breakdown in Russo-Ukrainian relations in recent years has escalated into a crisis that now afflicts both European and global affairs. Few so far have looked at the crisis from the point of view of Russo-Ukrainian relations, a gap this edited collections seeks to address.

## DMT: The Spirit Molecule

### A Doctor's Revolutionary Research into the Biology of Near-Death and Mystical Experiences

Simon and Schuster A clinical psychiatrist explores the effects of DMT, one of the most powerful psychedelics known. • A behind-the-scenes look at the cutting edge of psychedelic research. • Provides a unique scientific explanation for the phenomenon of alien

abduction experiences. From 1990 to 1995 Dr. Rick Strassman conducted U.S. Government-approved and funded clinical research at the University of New Mexico in which he injected sixty volunteers with DMT, one of the most powerful psychedelics known. His detailed account of those sessions is an extraordinarily riveting inquiry into the nature of the human mind and the therapeutic potential of psychedelics. DMT, a plant-derived chemical found in the psychedelic Amazon brew, ayahuasca, is also manufactured by the human brain. In Strassman's volunteers, it consistently produced near-death and mystical experiences. Many reported convincing encounters with intelligent nonhuman presences, aliens, angels, and spirits. Nearly all felt that the sessions were among the most profound experiences of their lives. Strassman's research connects DMT with the pineal gland, considered by Hindus to be the site of the seventh chakra and by Rene Descartes to be the seat of the soul. DMT: The Spirit Molecule makes the bold case that DMT, naturally released by the pineal gland, facilitates the soul's movement in and out of the body and is an integral part of the birth and death experiences, as well as the highest states of meditation and even sexual transcendence. Strassman also believes that "alien abduction experiences" are brought on by accidental releases of DMT. If used wisely, DMT could trigger a period of remarkable progress in the scientific exploration of the most mystical regions of the human mind and soul.

## Anthropology, Development and Modernities

### Exploring Discourse, Counter-Tendencies and Violence

Routledge While the diffusion of modernity and the spread of development schemes may bring prosperity, optimism and opportunity for some, for others it has brought poverty, a deterioration in quality of life and has given rise to violence. This collection brings an anthropological perspective to bear on understanding the diverse modernities we face in the contemporary world. It provides a critical review of interpretations of development and modernity, supported by rigorous case studies from regions as diverse as Guatemala, Sri Lanka, West Africa and contemporary Europe. Together, the chapters in this volume demonstrate the crucial importance of looking to ethnography for guidance in shaping development policies. Ethnography can show how people's own agency transforms, recasts and complicates the modernities they experience. The contributors argue that explanations of change framed in terms of the dominant discourses and institutions of modernity are inadequate, and that we give closer attention to discourses, images, beliefs and practices that run counter to these yet play a part in shaping them and giving them meaning. Anthropology, Development and Modernities deals with the realities of people's everyday lives and dilemmas. It is essential reading for students and scholars in anthropology, sociology and development studies. It should also be read by all those actively involved in development work.

## The New Economics

## The Man Without a Face

## The Unlikely Rise of Vladimir Putin

Granta Books When Vladimir Putin, an unimportant, low-level KGB operative, was rushed to power by a group of Oligarchs in 1999, he was a man without a history. Within a few brief years, Putin had dismantled Russia's media, wrested control and wealth from the country's burgeoning business class, and decimated the fragile mechanisms of democracy. Virtually every obstacle to his unbridled control was removed and every opposing voice silenced, with political rivals and critics driven into exile or to the grave. Drawing on information and sources no other writer has tapped, Masha Gessen's fearless account charts Putin's rise from the boy who had scrapped his way through post-war Leningrad schoolyards, to the 'faceless' man who manoeuvred his way into absolute - and absolutely corrupt - power.

## Sixteen Years in Siberia

## The Three Investigators in the Mystery of the Blazing Cliffs

Random House Books for Young Readers The sighting of a UFO leads the Three Investigators to uncover a bizarre confidence game.

# The Pedagogy of Images

## Depicting Communism for Children

University of Toronto Press In the 1920s, with the end of the revolution, the Soviet government began investing resources and energy into creating a new type of book for the first generation of young Soviet readers. In a sense, these early books for children were the ABCs of Soviet modernity; creatively illustrated and intricately designed, they were manuals and primers that helped the young reader enter the field of politics through literature. Children's books provided the basic vocabulary and grammar for understanding new, post-revolutionary realities, but they also taught young readers how to perceive modern events and communist practices. Relying on a process of dual-media rendering, illustrated books presented propaganda as a simple, repeatable narrative or verse, while also casting it in easily recognizable graphic images. A vehicle of ideology, object of affection, and product of labour all in one, the illustrated book for the young Soviet reader emerged as an important cultural phenomenon. Communist in its content, it was often avant-gardist in its form. Spotlighting three thematic threads - communist goals, pedagogy, and propaganda - *The Pedagogy of Images* traces the formation of a mass-modern readership through the creation of the communist-inflected visual and narrative conventions that these early readers were meant to appropriate.
