Innovative Wastewater Treatment & Resource Recovery Technologies: Impacts on Energy, Economy and Environment

IWA Publishing This book introduces the 3R concept applied to wastewater treatment and resource recovery under a double perspective. Firstly, it deals with innovative technologies leading to: Reducing energy requirements, space and impacts; Reusing water and sludge of sufficient quality; and Recovering resources such as energy, nutrients, metals and chemicals, including biopolymers. Besides targeting effective C,N&P removal, other issues such as organic micropollutants, gases and odours emissions are considered. Most of the technologies analysed have been tested at pilot- or at full-scale. Tools and methods for their Economic, Environmental, Legal and Social impact assessment are described. The 3R concept is also applied to Innovative Processes design, considering different levels of innovation: Retrofitting, where novel units are included in more conventional processes; Re-Thinking, which implies a substantial flowsheet modification; and Re-Imagining, with completely new conceptions. Tools are presented for Modelling,

Optimising and Selecting the most suitable plant layout for each particular scenario from a holistic technical, economic and environmental point of view.

FRANCAIS 1ERE LA LECTURE METHODIQUE.

La lecture méthodique. Bac français. 2. Perfectionnement. Définitions, méthode, exercices, mots-clés, corrigés. Une démarche rigoureuse et progressive en huit cahiers d'apprentissage pour vous préparer, dès la seconde, aux épreuves de français du bac. Vous trouverez dans ce volume : - la définition de l'épreuve du BAC - les critères d'évaluation - l'identification des difficultés de l'exercice - une stratégie pour les résoudre - des batteries d'exercices progressifs - des corrigés

Coping with Global Environmental Change, Disasters and Security

Threats, Challenges, Vulnerabilities and Risks

Springer Science & Business Media Coping with Global Environmental Change, Disasters and Security - Threats, Challenges, Vulnerabilities and Risks reviews conceptual debates and case studies focusing on disasters and security threats, challenges, vulnerabilities and risks in Europe, the Mediterranean and other regions. It discusses social science concepts of vulnerability and risks, global, regional and national security challenges, global warming, floods, desertification and drought as environmental security challenges, water and food security challenges and vulnerabilities, vulnerability mapping of environmental security challenges and risks, contributions of remote sensing to the recognition of security risks, mainstreaming early warning of conflicts and hazards and provides conceptual and policy conclusions.

Remembering Sofya Kovalevskaya

Springer Science & Business Media Sofia Kovalevskaya was a brilliant and determined young Russian woman of the 19th century who wanted to become a mathematician and who succeeded, in often difficult circumstances, in becoming arguably the first woman to have a professional university career in the way we understand it today. This memoir, written by a mathematician who specialises in symplectic geometry and integrable systems, is a personal exploration of the life, the writings and the mathematical achievements of a remarkable woman. It emphasises the originality of Kovalevskaya's work and assesses her legacy and reputation as a mathematician and scientist. Her ideas are explained in a way that is accessible to a general audience, with diagrams, marginal notes and commentary to help explain the mathematical concepts and provide context. This fascinating book, which also examines Kovalevskaya's love of literature, will be of interest to historians looking for a treatment of the mathematics, and those doing feminist or gender studies.

Microbiological Safety and Quality Aspects of Fermented Dairy Products

Frontiers Media SA

A Life Course Perspective on Health Trajectories and Transitions

Springer This open access book examines health trajectories and health transitions at different stages of the life course, including childhood, adulthood and later life. It provides findings that assess the role of biological and social transitions on health status over time. The essays examine a wide range of health issues, including the consequences of military service on body mass index, childhood obesity and cardiovascular health, socio-economic inequalities in preventive health care use, depression and anxiety during the child rearing period, health trajectories and transitions

in people with cystic fibrosis and oral health over the life course. The book addresses theoretical, empirical and methodological issues as well as examines different national contexts, which help to identify factors of vulnerability and potential resources that support resilience available for specific groups and/or populations. Health reflects the ability of individuals to adapt to their social environment. This book analyzes health as a dynamic experience. It examines how different aspects of individual health unfold over time as a result of aging but also in relation to changing socioeconomic conditions. It also offers readers potential insights into public policies that affect the health status of a population.

Migration, Urbanity and Cosmopolitanism in a Globalized World

Springer Nature This open access book draws a theoretically productive triangle between urban studies, theories of cosmopolitanism, and migration studies in a global context. It provides a unique, encompassing and situated view on the various relations between cosmopolitanism and urbanity in the contemporary world. Drawing on a variety of cities in Latin America, Europe, Asia, Africa and North America, it overcomes the Eurocentric bias that has marked debate on cosmopolitanism from its inception. The contributions highlight the crucial role of migrants as actors of urban change and targets of urban policies, thus reconciling empirical and normative approaches to cosmopolitanism. By addressing issues such as cosmopolitanism and urban geographies of power, locations and temporalities of subaltern cosmopolites, political meanings and effects of cosmopolitan practices and discourses in urban contexts, it revisits contemporary debates on superdiversity, urban stratification and local incorporation, and assess the role of migration and mobility in globalization and social change.

Frontiers in the Roman World

Proceedings of the Ninth Workshop of the International Network Impact of Empire (Durham, 16-19 April 2009)

BRILL This volume presents the proceedings of the ninth workshop of the international network 'Impact of Empire', which concentrates on the history of the Roman Empire. It focuses on different ways in which Rome created, changed and influenced (perceptions of) frontiers.

Avorter

histoires des luttes et des conditions d'avortement des années 1960 à aujourd'hui

Tahin Party L'histoire des revendications pour le droit à maîtriser sa fécondité permet de mesurer les situations variables sur le plan national et plus spécifiquement à Grenoble. Le fait que l'interruption volontaire de grossesse soit légale ou non n'empêche pas les femmes d'avorter. La question des bonnes conditions sanitaires reste donc primordiale.

The Last Threshold

Neverwinter Saga

Wizards of the Coast In the final book of the #4 New York Times best-selling Neverwinter Saga, Drizzt Do'Urden navigates a winding path littered with secrets and lies. Tangled up in his companion Dahlia's dark secrets, the ties that once held her close to Drizzt threaten to tear as her bonds to his former foe, Artemis Entreri, continue to grow. Meanwhile, in the caverns of Gauntlgrym, the drow Tiago Baenre enlists the help of Bregan D'aerthe in his quest to destroy Drizzt. While making promises they may not keep, the agents of the elite drow mercenary group hide plans of their own. Determined to stand for what's right in the Realms once again, Drizzt forges a new road north—toward Icewind Dale. Will his new companions follow? Can he fight the darkness alone? Either way, he knows now where he's headed—back to the only place that's ever felt like home. Praise for the Neverwinter Saga: "Absolutely profound." —Paul Goat Allen, BarnesandNoble.com "Masterfully written, thrillingly unpredictable, and everything a Drizzt Do'Urden fan could hope for. You'll be hanging on the words till the very end . . . and then begging for more." —GamesFiends.com "Emotional, respectful of its characters, intelligently written and structured, and finally summons a sense of nostalgic sorrow throughout"—Fantasy Book Review on Gauntlgrym, Neverwinter Saga Book I "Full of excitement. Salvatore has mastered the art of showing a beautiful fight scene, and he is at the top of his game in this one. We meet many characters with many different fighting styles, and Salvatore does a great job of distinguishing between them. He manages to take these scenes from so much more than just a fight scene, to an integral part of the story."—The SFF Hub on Gauntlgrym, Neverwinter Saga Book I "A quick read with some very satisfying fight scenes. It's also deeply layered with emotional atmosphere" —California Literary Review on Gauntlgrym, Neverwinter Saga Book I

Lectures on Vanishing Theorems

Birkhäuser Introduction M. Kodaira's vanishing theorem, saying that the inverse of an ample invertible sheaf on a projective complex manifold X has no cohomology below the dimension of X and its generalization, due to Y. Akizuki and S. Nakano, have been proven originally by methods from differential geometry ([39] and [1]). Even if, due to J.P. Serre's GAGA-theorems [56] and base change for field extensions the algebraic analogue was obtained for projective manifolds over a field k of characteristic $p = 0$, for a long time no algebraic proof was known and no generalization to $p > 0$, except for certain lower dimensional manifolds. Worse, counterexamples due to M. Raynaud [52] showed that in characteristic $p > 0$ some additional assumptions were needed. This was the state of the art until P. Deligne and I. Illusie [12] proved the degeneration of the Hodge to de Rham spectral sequence for projective manifolds X defined over a field k of characteristic $p > 0$ and liftable to the second Witt vectors $W_2(k)$. Standard degeneration arguments allow to deduce the degeneration of the Hodge to de Rham spectral sequence in characteristic zero, as well, a result which again could only be obtained by analytic and differential geometric methods beforehand. As a corollary of their methods M. Raynaud (loc. cit.) gave an easy proof of Kodaira vanishing in all characteristics, provided that X lifts to $W_2(k)$.

The Miracle Morning

What's being widely regarded as "one of the most life changing books ever written" may be the simplest approach to achieving everything you've ever wanted, and faster than you ever thought possible. What if you could wake up tomorrow and any-or EVERY-area of your life was beginning to transform? What would you change? The Miracle Morning is already transforming the lives of tens of thousands of people around the world by showing them how to wake up each day with more ENERGY, MOTIVATION, and FOCUS to take your life to the next level. It's been right here in front of us all along, but this book has finally brought it to life. Are you ready? The next chapter of YOUR life-the most extraordinary life you've ever imagined-is about to begin. It's time to WAKE UP to your full potential...

Doing Focus Groups

SAGE A concise, practical introduction to planning and organizing successful focus groups, exploring the advantages and limitations of this method.

Hippocratic Recipes

Oral and Written Transmission of Pharmacological Knowledge in Fifth- And Fourth-Century Greece

BRILL Drawing on philological studies, social history and anthropology, this book offers the first extended study of the recipes included in the Hippocratic Corpus. It examines the links between oral and written traditions in the transmission of ancient pharmacological knowledge.

The Materiality of Magic

Brill Fink In the last two decades we have had many books and proceedings of conferences on the history, formulas and incantations of magic in antiquity, both in East and West, but this is the first book of its kind that focuses on the material aspects of magic, such as gems, rings, drawings, grimoires, amulets and figurines. In recent years scholars have focused not only on the discourse and practices of magic in antiquity, but also on its practitioners, literary stereotypes and historical shifts. Much less attention, however, has been paid to the material that was used by the magicians for their curses and incantations. Yet there is no magic without materiality. The practice of magic required a specialist expertise that knew how to handle material such as lead, gold, stones, papyrus, figurines or voodoo dolls. That is why we present new insights on the materiality of magic by studying both the materials used for magic as well as the books in which the expertise was preserved.--Publisher.

Enciclopedia Internacional de Pseud·'nimos

Nombres verdaderos. Parte I

Walter de Gruyter This Encyclopedia is the first to compile pseudonyms from all over the world, from all ages and occupations in a single work: some 500,000 pseudonyms of roughly 270,000 people are deciphered here. Besides pseudonyms in the narrower sense, initials, nick names, order names, birth and married names etc. are included. The volumes 1 to 9 list persons by their real names in alphabetical order. To make the unequivocal identification of a person easier, year and place of birth and death are provided where available, as are profession, nationality, the pseudonym under which the person was known, and finally, the sources used. The names of professions given in the source material have been translated into English especially for this encyclopaedia. In the second part, covering the volumes 10 to 16, the pseudonyms are listed alphabetically and the real names provided. Approx. 500,000 pseudonyms of about 270,000 persons First encyclopedia including pseudonyms from all over the world, all times and all occupations Essential research tool for anyone wishing to identify persons and names for his research within one single work

Paradoxes of Gender

Yale University Press In this pathbreaking book, a well-known feminist and sociologist--who is also the Founding Editor of *Gender & Society*--challenges our most basic assumptions about gender. Judith Lorber views gender as wholly a product of socialization subject to human agency, organization, and interpretation. In her new paradigm, gender is an institution comparable to the economy, the family, and religion in its significance and consequences. Drawing on many schools of feminist scholarship and on research from anthropology, history, sociology, social psychology, sociolinguistics, and cultural studies, Lorber explores different paradoxes of gender: --why we speak of only two "opposite sexes" when there is such a variety of sexual behaviors and relationships; --why transvestites, transsexuals, and hermaphrodites do not affect the conceptualization of two genders and two sexes in Western societies; --why most of our cultural images of women are the way men see them and not the way women see themselves; --why all women in modern society are expected to have children and be the primary caretaker; --why domestic work is almost always the sole responsibility of wives, even when they earn more than half the family income; --why there are so few women in positions of authority, when women can be found in substantial numbers in many occupations and professions; -- why women have not benefited from major social revolutions. Lorber argues that the whole point of the gender system today is to maintain structured gender inequality--to produce a subordinate class (women) that can be exploited as workers, sexual partners, childbearers, and emotional nurturers. Calling into question the inevitability and necessity of gender, she envisions a society structured for equality, where no gender, racial ethnic, or social class group is allowed to monopolize economic, educational, and cultural resources or the positions of power.

The Abel Prize 2013-2017

Springer The book presents the winners of the Abel Prize in mathematics for the period 2013-17: Pierre Deligne (2013); Yakov G. Sinai (2014); John Nash Jr. and Louis Nirenberg (2015); Sir Andrew Wiles (2016); and Yves Meyer (2017). The profiles feature autobiographical information as well as a scholarly description of each mathematician's work. In addition, each profile contains a Curriculum Vitae, a complete bibliography, and the full citation from the prize committee. The book also includes photos for the period 2003-2017 showing many of the additional activities connected with the Abel Prize. As an added feature, video interviews with the Laureates as well as videos from the

prize ceremony are provided at an accompanying website (<http://extras.springer.com/>). This book follows on *The Abel Prize: 2003-2007. The First Five Years* (Springer, 2010) and *The Abel Prize 2008-2012* (Springer 2014), which profile the work of the previous Abel Prize winners.

The Armenians in the Medieval Islamic World

The Arab Period in ArmnyahSeventh to Eleventh Centuries

Transaction Publishers In this first of a massive three-volume work, Seta B. Dadoyan studies the Armenian experience in the medieval Islamic world and takes the reader through hitherto undiscovered paradigmatic cases of interaction with other populations in the region. Being an Armenian, Dadoyan argues, means having an ethnic ancestry laden with narratives drawn from the vast historic Armenian habitat. Contradictory trends went into the making of Armenian history, yet most narratives fail to reflect this rich texture. Linking Armenian-Islamic history is one way of dealing with the problem. Dadoyan's concern is also to outline revolutionary elements in the making of Armenian ideologies and politics. This extensive work captures the multidimensional nature of the Armenian experience in the medieval Islamic world. The author holds that every piece of literature, including historical writing, is an artifact. It is a composition of many elements arranged in certain forms: order, sequence, proportion, detail, intensity, etc. The author has composed and arranged the larger subjects and their sub-themes in such a way as to create an open, dynamic continuity to Armenian history that is intellectually intriguing, aesthetically appealing, and close to lived experiences.

The Simple Past

New York Review of Books The *Simple Past* came out in 1954, and both in France and its author's native Morocco the book caused an explosion of fury. The protagonist, who shares the author's name, Driss, comes from a Moroccan family of means, his father a self-made tea merchant, the most devout of Muslims, quick to be provoked and ready to lash out verbally or physically, continually bent on subduing his timid wife and many children to his iron and ever-righteous

will. He is known, simply, as the Lord, and Driss, who is in high school, is in full revolt against both him and the French colonial authorities, for whom, as much as for his father, he is no one. Driss Chraïbi's classic coming-of-age story is about colonialism, Islam, the subjection of women, and finding, as his novel does, a voice that is as cutting and coruscating as it is original and free.

The Night of the Gods

An Inquiry Into Cosmic and Cosmogonic Mythology and Symbolism

Women, Gender, Religion

A Reader

Springer This up-to-date and forward-looking collection of essays on gender and religion fills a crucial gap. Interdisciplinary and multi-traditional, this volume highlights the contributions that different disciplinary approaches make to feminist/gender studies and religion. Designed for the classroom, the Reader simultaneously assesses the state of the field and raises questions for further inquiry and investigation.

Literature and Intoxication

Writing, Politics and the Experience of Excess

Springer This collection traces the intersection between writing and intoxication, from the literary to the theoretical, exploring a diversity of experiences of excess. Comprising a variety of perspectives, this book offers unique insights into how politics and literature have been shaped by states of intoxication.

Third World Women and the Politics of Feminism

Indiana University Press "The essays are provocative and enhance knowledge of Third World women's issues. Highly recommended..." —Choice "... the book challenges assumptions and pushes historic and geographical boundaries that must be altered if women of all colors are to win the struggles thrust upon us by the 'new world order' of the 1990s." —New Directions for Women "This surely is a book for anyone trying to comprehend the ways sexism fuels racism in a post-colonial, post-Cold War world that remains dangerous for most women." —Cynthia H. Enloe "... provocative analyses of the simultaneous oppressions of race, class, gender and sexuality... a powerful collection." —Gloria Anzaldúa "... propels third world feminist perspectives from the periphery to the cutting edge of feminist theory in the 1990s." —Aihwa Ong "... a carefully presented wealth of much-needed information." —Audre Lorde "... it is a significant book." —The Bloomsbury Review "... excellent... The nondoctrinaire approach to the Third World and to feminism in general is refreshing and compelling." —World Literature Today "... an excellent collection of essays examining 'Third World' feminism." —The Year's Work in Critical and Cultural Theory These essays document the debates, conflicts, and contradictions among those engaged in developing third world feminist theory and politics. Contributors: Evelyne Accad, M. Jacqui Alexander, Carmen Barroso, Cristina Bruschini, Rey Chow, Juanita Diaz-Cotto, Angela Gilliam, Faye V. Harrison, Cheryl Johnson-Odim, Chandra Talpade Mohanty, Ann Russo, Barbara Smith, Nayereh Tohidi, Lourdes Torres, Cheryl L. West, & Nellie Wong.

Global Aspects of Complex Geometry

Springer Science & Business Media This collection of surveys present an overview of recent developments in Complex Geometry. Topics range from curve and surface theory through special varieties in higher dimensions, moduli theory,

Kähler geometry, and group actions to Hodge theory and characteristic p -geometry. Written by established experts this book will be a must for mathematicians working in Complex Geometry

Beilinson's Conjectures on Special Values of L-Functions

Academic Press Beilinson's Conjectures on Special Values of L-Functions deals with Alexander Beilinson's conjectures on special values of L-functions. Topics covered range from Pierre Deligne's conjecture on critical values of L-functions to the Deligne-Beilinson cohomology, along with the Beilinson conjecture for algebraic number fields and Riemann-Roch theorem. Beilinson's regulators are also compared with those of Émile Borel. Comprised of 10 chapters, this volume begins with an introduction to the Beilinson conjectures and the theory of Chern classes from higher k -theory. The "simplest" example of an L-function is presented, the Riemann zeta function. The discussion then turns to Deligne's conjecture on critical values of L-functions and its connection to Beilinson's version. Subsequent chapters focus on the Deligne-Beilinson cohomology; \mathbb{Z} -rings and Adams operations in algebraic k -theory; Beilinson conjectures for elliptic curves with complex multiplication; and Beilinson's theorem on modular curves. The book concludes by reviewing the definition and properties of Deligne homology, as well as Hodge-D-conjecture. This monograph should be of considerable interest to researchers and graduate students who want to gain a better understanding of Beilinson's conjectures on special values of L-functions.

Mobilities, Literature, Culture

Springer Nature This is the first book dedicated to literary and cultural scholars' engagement with mobilities scholarship. As such, the volume both advances new theoretical approaches to the study of culture and furthers the recent "humanities turn" in mobilities studies. The book's scholarship is deeply informed by cultural geography's vision of a mobilised reconceptualisation of space and place, but also by the contribution of literary scholars in articulating questions of travel, technologies of transport, (post)colonialism and migration through a close engagement with textual materials. A comprehensive introduction maps pre-histories and emerging directions of this exciting interdisciplinary endeavor while taking up the theoretical and methodological challenges of the burgeoning subfield. Contributions range across geographical and disciplinary boundaries to address questions of embodied subjectivities, mobility and the nation, geopolitics of migration, and mobilities futures.

Individuals and Materials in the Greco-Roman Cults of Isis

Agents, Images, and Practices

BRILL In Individuals and Materials in the Greco-Roman Cults of Isis Valentino Gasparini and Richard Veymiers present 26 studies with a focus on the individuals and groups which animated the diffusion and reception of the cults of Isis and other Egyptian gods throughout the Hellenistic and Roman worlds.

Mesial Temporal Lobe Epilepsies

John Libbey Eurotext This work is the result of a recently held International Epilepsy Colloquium on the mesial temporal lobe epilepsies (MTLE) which covered all aspects of this specific group of syndromes (or constellations), from animal model to treatment strategies. Written by international experts from different fields, it aims to provide professionals from neuroscientists to clinical neurologists, neurosurgeons and neuropaedia-tricians dealing with mesial temporal lobe epilepsy, with a concise overview on the current body of knowledge and on emerging concepts and findings.

From Babel to Dragomans

Interpreting the Middle East

Hachette UK A collection of the most important essays on past and current history by the Western world's foremost Islamic scholar Bernard Lewis has charted the great centuries of Islamic power and civilisation but also, in his recent books **WHAT WENT WRONG?** and **THE CRISIS OF ISLAM**, Islam's calamitous and bitter decline. This book collects together his most interesting and significant essays, papers, reviews and lectures. They range from historical subjects such as religion and politics in Islam and Judaism, the culture and people of Iran, the great mosques of Istanbul, Middle

Eastern food and feasts, the Mughals and the Ottomans, the rise and fall of British power in the Middle East and North Africa, Islam and racism - to current history such as the significance of Saddam Hussein and Osama bin Laden. Includes discussion of the problems of Western historians dealing with the Islamic world.

The World Encyclopedia of Serial Killers, Volume Four

T-Z

WildBlue Press The 4th volume of this comprehensive work features hundreds of serial killers from Sacramento to Soviet Russia—plus numerous unsolved cases. The World Encyclopedia of Serial Killers is the most complete reference guide on the subject, featuring more than 1,600 entries about the lives and crimes of serial killers from around the world. Defined by the FBI as a person who murders three or more people with a hiatus of weeks or months between murders, the serial killer has presented unique and terrifying challenges to have walked among us since the dawn of time—a fact this extensive record makes chillingly clear. The series concludes with Volume Four, T-Z. Entries include the Terminator Anatoly Yuriyovych Onoprienko; Trailside Killer David Joseph Carpenter; Vampire of Sacramento Richard Trenton Chase; and the Voroshilovgrad Maniac Zaven Almazyan; plus the unsolved cases of the Adelaide Child Murders; the Axeman of New Orleans; the Chillicothe Killer; the Dead Women of Juarez; the Korea Frog Boy Murders; and the Volga Maniac.

The Olympics, a History of the Modern Games

University of Illinois Press Traces the history of the modern Olympics from 1896 to 2000, contrasting the ideal of the game with the often politicized reality.

Regulators in Analysis, Geometry and Number Theory

Springer Science & Business Media "This work is an outgrowth of a conference held at the Hebrew University in Jerusalem on Regulators in Analysis, Geometry and Number Theory, and should appeal to a broad audience of graduate students and research mathematicians."--BOOK JACKET.

Encyclopedia of Beat Literature

Infobase Publishing Discusses the literary works and great authors of the Beat Generation.

Ars Electronica 2021

Festival for Art, Technology, and Society

Hatje Cantz Documenting the 42nd iteration of the festival, in hybrid format For only the second time in its 40 years, the Ars Electronica Festival migrated to a hybrid format for its annual proceedings. The theme of this festival was: "how can artistic and scientific research make connections between technology, art and society visible?"

Latin Love Elegy

Bolchazy-Carducci Publishers This book offers a representative selection of the three main exponents of Latin love elegy: Propertius, Tibullus, and Ovid. A few elegiac poems by Catullus are included for purposes of comparison. The book includes a general introduction to the elegy, select bibliography, Latin text of twenty poems, and commentary to introduce each poem, notes, both grammatical and to aid literary analysis.

Antiviral Drug Discovery and Development

Springer Nature This book summarizes state-of-the-art antiviral drug design and discovery approaches starting from natural products to de novo design, and provides a timely update on recently approved antiviral drugs and compounds in advanced clinical development. Special attention is paid to viral infections with a high impact on the world population or highly relevant from the public health perspective (HIV, hepatitis C, influenza virus, etc.). In these chapters, limitations associated with adverse effects and emergence of drug resistance are discussed in detail. In addition to classical antiviral strategies, chapters will be dedicated to discuss the non-classical drug development strategies to block viral infection, for instance, allosteric inhibitors, covalent antiviral agents, or antiviral compounds

targeting protein-protein interactions. Finally, current prospects for producing broad-spectrum antiviral inhibitors will be also addressed. The book is distinctive in providing the most recent update in the rapidly evolving field of antiviral therapeutics. Authoritative reviews are written by international scientists well known for their contributions in their topics of research, which makes this book suitable for researchers not only within the antiviral research community but also attractive to a broad audience in the drug discovery field. This book covers molecular structures and biochemical mechanisms mediating the antiviral effects, while discussing various ligand design strategies, which include traditional medicinal chemistry, computational chemistry, and chemical biology approaches. The book provides a comprehensive review of antiviral drug discovery and development approaches, particularly focusing on current innovations and future trends.
