Creating final masters requires specialized aural skills and a similarly advanced understanding of the software in order to fine-tune the product with respect to these goals. **Mixing and Mastering in the Box** addresses the practical and technological necessities of these two final steps without neglecting the creative process that is integral to the creation of high-quality recordings. **Savage** focuses primarily on creating mixes and masters in the Digital Audio Workstation (DAW), or "in the box," currently a popular platform in the field of sound engineering due to the creative advantages and advanced technological capabilities it offers to its users.
