GLOBAL ENVIRONMENT OUTLOOK - GEO-6: HEALTHY PLANET, HEALTHY PEOPLE

Cambridge University Press Published to coincide with the Fourth United Nations Environmental Assembly, UN Environment's sixth Global Environment Outlook calls on decision makers to take bold and urgent action to address pressing environmental issues in order to protect the planet and human health. By bringing together hundreds of scientists, peer reviewers and collaborating institutions and partners, the GEO reports build on sound scientific knowledge to provide governments, local authorities, businesses and individual citizens with the information needed to guide societies to a truly sustainable world by 2050. GEO-6 outlines the current state of the environment, illustrates possible future environmental trends and analyses the effectiveness of policies. This flagship report shows how governments can put us on the path to a truly sustainable future - emphasising that urgent and inclusive action is needed to achieve a healthy planet with healthy people. This title is also available as Open Access on Cambridge Core.

BUSINESS PROCESS MANAGEMENT

3RD INTERNATIONAL CONFERENCE, BPM 2005, NANCY, FRANCE, SEPTEMBER 5-8, 2005, PROCEEDINGS

Springer This volume contains the proceedings of the 3rd International Conference on Business Process Management (BPM 2005), organized by LORIA in Nancy, France, September 5–8, 2005. This year, BPM included several innovations with respect to previous editions, most notably the addition of an industrial program and of co-located workshops. This was the logical result of the significant (and still growing) industrial interest in the area and of the broadening of the research communities working on BPM topics. The interest in business process management (and in the BPM conference) was demonstrated by the quantity and quality of the paper submissions. We received over 176 contributions from 31 countries, accepting 25 of them as full papers (20 research papers and 5 industrial papers) while 17 contributions were accepted as short papers. In addition to the regular, industry, and short presentations invited lectures were given by Frank Leymann and Gustavo Alonso. This combination of research papers, industrial papers, keynotes, and workshops, all of very high quality, has shown that BPM has become a mature conference and the main venue for researchers and practitioners in this area. We would like to thank the members of the Program Committee and the reviewers for their efforts in selecting the papers. They helped us compile an excellent scientific program. For the difficult task of selecting the 25 best papers (14% acceptance rate) and 17 short papers each paper was reviewed by at least three reviewers (except some out-of-scope papers).

HANDBOOK OF RESEARCH ON COMPLEX DYNAMIC PROCESS MANAGEMENT: TECHNIQUES FOR ADAPTABILITY IN TURBULENT ENVIRONMENTS

TECHNIQUES FOR ADAPTABILITY IN TURBULENT ENVIRONMENTS

IGI Global Investigates the nature and history of dynamic processes essential to understanding the need for flexibility and adaptability as well as the requirements to improve solutions.

INTEGRATING E-BUSINESS MODELS FOR GOVERNMENT SOLUTIONS: CITIZEN-CENTRIC SERVICE ORIENTED METHODOLOGIES AND PROCESSES

CITIZEN-CENTRIC SERVICE ORIENTED METHODOLOGIES AND PROCESSES

IGI Global "The objective of this book is to examine issues and promote research initiatives in the area of effectiveness in e-government by suggesting integrated e-business models for government solutions, through citizen-centric service oriented methodologies and processes"--Provided by publisher.

INTERNATIONAL BUSINESS

THE CHALLENGES OF GLOBALIZATION, GLOBAL EDITION

For courses in international business. *International Business: The Challenges of Globalization* uses the ever-present and salient subject of culture to present real-world examples and engaging features to bring international business to life and pique student interest. The 9th Edition uses a unique organising framework that helps students to understand how the elements of international business are related and with a focus on employability skills, students understand how the concepts learned in this course will be relevant to their future careers. The material has been thoroughly updated based on ongoing changes in the international business world to ensure that it remains up-to-date with the rapidly changing world.

WORLD WILDLIFE CRIME REPORT 2020

TRAFFICKING IN PROTECTED SPECIES

UN The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

ECOSYSTEM SERVICES COME TO TOWN

GREENING CITIES BY WORKING WITH NATURE

John Wiley & Sons The need to find new approaches to the development of cities is becoming increasingly urgent in this age of continuing population growth, demographic transition, climate change, fossil fuel peak and biodiversity losses. Restoring ecosystem services and promoting biodiversity is essential to sustainable development - even in the built environment. *Ecosystem Services come to Town: greening cities by working with nature* demonstrates how to make urban environments greener. It starts by explaining how, by mimicking nature and deliberately creating habitats to provide ecosystem services, cities can become more efficient and more pleasant

to live in. The history of cities and city planning is covered with the impacts of industrial urban development described, as well as the contemporary concerns of biodiversity loss, peak oil and climate change. The later sections offer solutions to the challenges of sustainable urban development by describing and explaining a whole range of approaches and interventions, beginning at the regional scale with strategic green infrastructure, looking at districts and precincts, with trees, parks and rain gardens and ending with single buildings, including with green roofs and living walls. Technical enough to be valuable to practitioners but still readable and inspirational, this guide demonstrates to town planners, urban designers, architects, engineers, landscape architects how to make cities more liveable.

THE SOLUTION REVOLUTION

HOW BUSINESS, GOVERNMENT, AND SOCIAL ENTERPRISES ARE TEAMING UP TO SOLVE SOCIETY'S TOUGHEST PROBLEMS

Harvard Business Press Government Alone Can't Solve Society's Biggest Problems World hunger. Climate change. Crumbling infrastructure. It's clear that in today's era of fiscal constraints and political gridlock, we can no longer turn to government alone to tackle these and other towering social problems. What's required is a new, more collaborative and productive economic system. The Solution Revolution brings hope—revealing just such a burgeoning new economy where players from across the spectrum of business, government, philanthropy, and social enterprise converge to solve big problems and create public value. By erasing public-private sector boundaries, the solution economy is unlocking trillions of dollars in social benefit and commercial value. Where tough societal problems persist, new problem solvers are crowdfunding, ridesharing, app-developing, or impact-investing to design innovative new solutions for seemingly intractable problems. Providing low-cost health care, fighting poverty, creating renewable energy, and preventing obesity are just a few of the tough challenges that also represent tremendous opportunities for those at the vanguard of this movement. They create markets for social good and trade solutions instead of dollars to fill the gap between what government can provide and what citizens need. So what drives the solution economy? Who are these new players and how are their roles changing? How can we grow the movement? And how can we participate? Deloitte's William D. Eggers and Paul Macmillan answer these questions and more, and they introduce us to the people and organizations driving the revolution—from edgy social enterprises growing at a clip of 15 percent a year, to megafoundations, to Fortune 500 companies delivering social good on the path to profit. Recyclebank, RelayRides, and LivingGoods are just a few of the innovative organizations you'll read about in this book. Government cannot handle alone the huge challenges facing our global society—and it shouldn't. We need a different economic paradigm that can flexibly draw on resources, combine efforts, and create value, while improving the lives of citizens. The Solution Revolution shows the

way.

DEVELOPMENT CHALLENGES, SOUTH-SOUTH SOLUTIONS: JULY 2013 ISSUE

E-NEWSLETTER OF THE UNITED NATIONS OFFICE FOR SOUTH-SOUTH COOPERATION

DSConsulting Development Challenges, South-South Solutions is the monthly e-newsletter of the United Nations Office for South-South Cooperation in UNDP (www.southerninnovator.org). It has been published every month since 2006. Its sister publication, Southern Innovator magazine, has been published since 2011. ISSN 2227-3905 Stories by David South UN Office for South-South Cooperation Contact the Office to receive a copy of the new global magazine Southern Innovator. Issues 1, 2, 3, 4 and 5 are out now and are about innovators in mobile phones and information technology, youth and entrepreneurship, agribusiness and food security, cities and urbanization and waste and recycling. Why not consider sponsoring or advertising in an issue of Southern Innovator? Or work with us on an insert or supplement of interest to our readers? Follow @SouthSouth1.

UP FOR DEBATE

U.S. FOREIGN POLICY OPTIONS TOWARDS THE GREATER HORN OF AFRICA

Picket Fence Memories Up For Debate provides eight policy recommendations for US Foreign Policy towards the Greater Horn of Africa in the areas of economic development, human rights protection and public health. What is unique about this volume is that all the authors are college students who debated this topic during the 2007 academic year. Ranging from issues of wildlife trafficking, malaria, food aid and economic subsidies, each chapter presents the reader with the pressing problems facing the Greater Horn of Africa, a realistic policy proposal, and reasons why that proposal has a propensity to solve the issue. This book will give you a rich understanding of the relationship between US policy and the Greater Horn of Africa informing you of the pressing problems and possible solutions the US can adopt to address the dire needs in the Greater Horn of Africa.

ADVANCES IN DATABASES AND INFORMATION SYSTEMS

9TH EAST EUROPEAN CONFERENCE, ADBIS 2005, TALLINN, ESTONIA, SEPTEMBER 12-15, 2005, PROCEEDINGS

Springer The 9th East-European Conference on Advances in Databases and Information Systems was held on September 12-15, 2005, in Tallinn, Estonia. It was organized in a cooperation between the Institute of Cybernetics at Tallinn University of Technology, the

Department of Computer Engineering of Tallinn University of Technology, and the Moscow chapter of ACM SIGMOD. The main objective of the ADBIS series of conferences is to provide a forum for the dissemination of excellent research accomplishments and to promote interaction and collaboration between the Database and Information Systems research communities from Central and East European countries and the rest of the world. The ADBIS conferences provide an international platform for the presentation of research on database theory, the development of advanced DBMS technologies, and their advanced applications in particular in information systems. The 2005 conference continued the ADBIS conferences held in St. Petersburg (1997), Poznan (1998), Maribor (1999), Prague (2000), Vilnius (2001), Bratislava (2002), Dresden (2003), and Budapest (2004). The conference consisted of regular sessions with technical contributions reviewed and selected by an international Program Committee, as well as of invited talks and tutorials given by leading scientists. For the first time the ADBIS conferences had a satellite event, a workshop on data mining and knowledge discovery. The ADMKD 2005 workshop, with its own international Program Committee as well as proceedings, served as a forum to encourage researchers and practitioners to discuss and investigate data mining research and implementation issues, and to share experience in developing and deploying data mining systems.

RECORDS AND INFORMATION MANAGEMENT, SECOND EDITION

American Library Association As Information Management put it, "On the strength of its currency and coverage alone, Franks' book is poised to take over as the recommended go-to reference for both students and RIM professionals for many years to come." The new second edition cements this work's status as an up-to-date classic, its content updated and expanded to address emerging technologies, most notably blockchain, and evolving standards and practices. Inside, Franks presents complete coverage of the records and information lifecycle model, encompassing paper, electronic (databases, office suites, email), and new media records (blogs, chat messages, and software as a service). Informed by an advisory board of experts in the field and with contributions by noted authorities, the text addresses such key topics as the origins and development of records and information; the discipline of information governance and developing a strategic records management plan; creation/capture and classification; retention strategies, inactive records management, archives, and long-term preservation; access, storage, and retrieval; electronic records and electronic records management systems; the latest on rapidly evolving technologies such as web records, social media, and mobile devices; vital records, disaster preparedness and recovery, and business continuity; monitoring, auditing, and risk management; and education and training. This book's authoritative blend of theory and practice makes it a matchless resource for everyone in the archives and records management field. Instructor/trainer extras include a set of ready-to-go, customizable PowerPoint slides to accompany the text. Examination copies are available for instructors who are interested in adopting this title for course use.

BLOCKCHAIN, FINTECH, AND ISLAMIC FINANCE

BUILDING THE FUTURE IN THE NEW ISLAMIC DIGITAL ECONOMY

Walter de Gruyter GmbH & Co KG Following the success of the first edition that brought attention to the digital revolution in Islamic financial services, comes this revised and updated second edition of Blockchain, Fintech and Islamic Finance. The authors reiterate the potential of digital disruption to shrink the role and relevance of today's banks, while simultaneously creating better, faster, cheaper services that will be an essential part of everyday life. Digital transformation will also offer the ability to create new ways to better comply to Islamic values in order to rebuild trust and confidence in the current financial system. In this new edition, they explore current concepts of decentralized finance (DeFi), distributed intelligence, stablecoins, and the integration of AI, blockchain, data analytics and IoT devices for a holistic solution to ensure technology adoption in a prudent and sustainable manner. The book discusses crucial innovation, structural and institutional developments for financial technologies including two fast-growing trends that merge and complement each other: tokenization, where all illiquid assets in the world, from private equity to real estate and luxury goods, become liquid and can be traded more efficiently, and second, the rise of a new tokenized economy where inevitably new rules and ways to enforce them will develop to fully unleash their capabilities. These complementary and oft-correlated trends will complete the decentralization of finance and will influence the way future financial services will be implemented. This book provides insights into the shift in processes, as well as the challenges that need to be overcome for practical applications for AI and blockchain and how to approach such innovations. It also covers new technological risks that are the consequence of utilizing frontier technologies such as AI, blockchain and IoT. Industry leaders, Islamic finance professionals, along with students and academics in the fields of Islamic finance and economics will benefit immensely from this book.

NATURE'S CONTRIBUTIONS TO PEOPLE: ON THE RELATION BETWEEN VALUATIONS AND ACTIONS

Frontiers Media SA

BLOOD OF THE TIGER

A STORY OF CONSPIRACY, GREED, AND THE BATTLE TO SAVE A MAGNIFICENT SPECIES

Beacon Press *Blood of the Tiger* takes readers on a wild ride to save one of the world's rarest animals from a band of Chinese billionaires. Many people think wild tigers are on the road to recovery, but they are in greater danger than ever—from a menace few experts saw coming. There may be only three thousand wild tigers left in the entire world. More shocking is the fact that twice that many—some six thousand—have been bred on farms, not for traditional medicine but to supply a luxury-goods industry that secretly sells tiger-bone wine, tiger-skin décor, and exotic cuisine enjoyed by China's elite. Two decades ago, international wildlife investigator J. A. Mills went undercover to expose bear farming in China and discovered the plot to turn tigers into nothing more than livestock. Thus begins the story of a personal crusade in which Mills mobilizes international forces to awaken the world to a conspiracy so pervasive that it threatens every last tiger in the wild. In this memoir of triumph, heartbreak, and geopolitical intrigue, Mills and a host of heroic comrades try to thwart a Chinese cadre's plan to launch billion-dollar industries banking on the extinction of not just wild tigers but also elephants and rhinos. Her journey takes her across Asia, into the jungles of India and Nepal, to Russia and Africa, traveling by means from elephant back to presidential motorcade, in the company of man-eaters, movie stars, and world leaders. She also journeys to the US where we meet people like Carole Baskin of Big Cat Rescue, who work tirelessly to end cub petting and ban private ownership and breeding of tigers and other big cats. She finds reason for hope in the increasing number of Chinese who do not want the blood of the last wild tigers to stain their beloved culture and motherland. Set against the backdrop of China's ascendance to world dominance, *Blood of the Tiger* tells of a global fight to rein in the forces of greed on behalf of one of the world's most treasured and endangered animals.

SMART HEALTHCARE ANALYTICS IN IOT ENABLED ENVIRONMENT

Springer Nature This book addresses various aspects of how smart healthcare can be used to detect and analyze diseases, the underlying methodologies, and related security concerns. Healthcare is a multidisciplinary field that involves a range of factors like the financial system, social factors, health technologies, and organizational structures that affect the healthcare provided to individuals, families, institutions, organizations, and populations. The goals of healthcare services include patient safety, timeliness, effectiveness, efficiency, and equity. Smart healthcare consists of m-health, e-health, electronic resource management, smart and intelligent home services, and medical devices. The Internet of Things (IoT) is a system comprising real-world things that interact and communicate with each other via networking technologies. The wide range of potential applications of IoT includes healthcare services. IoT-enabled

healthcare technologies are suitable for remote health monitoring, including rehabilitation, assisted ambient living, etc. In turn, healthcare analytics can be applied to the data gathered from different areas to improve healthcare at minimum expense.

BEST PRACTICE GUIDELINES FOR THE PREVENTION AND MITIGATION OF CONFLICT BETWEEN HUMANS AND GREAT APES

IUCN Executive summary: One of the challenges facing great ape conservation is the rising level of interaction between humans and great apes, and the resulting conflicts that emerge. As human populations continue to grow and human development makes deeper incursions into forest habitats, such conflicts will become more widespread and prevalent in the natural ranges of great apes, especially considering that the majority of great apes live outside protected areas. It is essential that we develop a comprehensive understanding of existing and potential conflict situations, and their current or future impacts on both great apes and humans. This will require the integration of quantitative and qualitative data on multiple aspects of human and great ape behaviour and ecology, along with a good understanding of local people's perceptions of the situation. Such knowledge can then be used to develop effective, locally-adapted, management strategies to prevent or mitigate human-great ape conflicts, whilst respecting both conservation objectives and socio-cultural-economic contexts. These guidelines outline a sequence of logical steps that should be considered prior to any form of human-great ape conflict intervention, and propose possible counter-measures to be used in the management of human-great ape conflicts.

BUSINESS ETHICS

A MANUAL FOR MANAGING A RESPONSIBLE BUSINESS ENTERPRISE IN EMERGING MARKET ECONOMIES

U.S. Government Printing Office Description This official Government manual provides a practical guide to assist owners and managers in meeting emerging global standards and expectations for an effective business ethics program. The manual is intended to be a practical resource for owners and managers, and endeavors to provide a comprehensive framework for designing and implementing business ethics programs by addressing such issues as what it means to be a responsible business, how to approach

responsible business conduct as a strategy, which structures and systems help management foster reasonable expectations among enterprise stakeholders as well as guide employees and agents to meet them, how to communicate with stakeholders about enterprise standards, expectations, and performance—and secure stakeholders' feedback, how to align management practices with core enterprise beliefs through a business ethics program, and how to evaluate performance under a business ethics program and learn from it.

ISSE 2005 — SECURING ELECTRONIC BUSINESS PROCESSES

HIGHLIGHTS OF THE INFORMATION SECURITY SOLUTIONS EUROPE 2005 CONFERENCE

Springer Science & Business Media This book presents the most interesting talks given at ISSE 2005 - the forum for the interdisciplinary discussion of how to adequately secure electronic business processes. The topics include: Corporate Governance and why security implies to control the enterprise - Risk Management and how to quantify security threats - Secure Computing and how it will change the way we trust computers - Digital Rights Management and the protection of corporate information. Adequate information security is one of the basic requirements of all electronic business processes. It is crucial for effective solutions that the possibilities offered by security technology can be integrated with the commercial requirements of the applications. The reader may expect state-of-the-art: best papers of the Conference ISSE 2005.

NETWORKING 2005 NETWORKING TECHNOLOGIES, SERVICES, AND PROTOCOLS; PERFORMANCE OF COMPUTER AND COMMUNICATION NETWORKS; MOBILE AND WIRELESS COMMUNICATIONS SYSTEMS

4TH INTERNATIONAL IFIP-TC6 NETWORKING CONFERENCE, WATERLOO, CANADA, MAY 2-6, 2005, PROCEEDINGS

Springer Science & Business Media This book constitutes the refereed proceedings of the 4th International IFIP-TC6 Networking Conference, NETWORKING 2005, held in Waterloo, Canada in May 2005. The 105 revised full papers and 36 posters were carefully reviewed and selected from 430 submissions. The papers are organized in topical sections on peer-to-peer networks, Internet protocols, wireless security, network security, wireless performance, network service support, network modeling and simulation, wireless LAN, optical networks, Internet performance and Web applications, ad-hoc networks, adaptive networks, radio resource management, Internet routing, queuing models, monitoring, network management, sensor networks, overlay multicast, QoS, wireless scheduling, multicast traffic management and engineering, mobility management, bandwidth management, DCMA, and wireless

resource management.

RESEARCH HANDBOOK ON GLOBAL GOVERNANCE, BUSINESS AND HUMAN RIGHTS

Edward Elgar Publishing This essential Research Handbook provides a comprehensive and critical assessment of the global governance instruments related to business and human rights from an interdisciplinary perspective. Contributions from a diverse range of leading international scholars offer an overview of the existing literature and rapidly-evolving research discipline, as well as identifying key trends and outlining an ambitious future research agenda.

THE FUTURE OF THE LAW OF THE SEA

BRIDGING GAPS BETWEEN NATIONAL, INDIVIDUAL AND COMMON INTERESTS

Springer This book is open access under a CC BY-NC 4.0 license. It explores the diverse phenomena which are challenging the international law of the sea today, using the unique perspective of a simultaneous analysis of the national, individual and common interests at stake. This perspective, which all the contributors bear in mind when treating their own topic, also constitutes a useful element in the effort to bring today's legal complexity and fragmentation to a homogenous vision of the sustainable use of the marine environment and of its resources, and also of the international and national response to maritime crimes. The volume analyzes the relevant legal frameworks and recent developments, focusing on the competing interests which have influenced State jurisdiction and other regulatory processes. An analysis of the competing interests and their developments allows us to identify actors and relevant legal and institutional contexts, retracing how and when these elements have changed over time.

THE GREEN BOOK

APPRAISAL AND EVALUATION IN CENTRAL GOVERNMENT : TREASURY GUIDANCE

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

HUMAN INTERFACE AND THE MANAGEMENT OF INFORMATION. INFORMATION IN APPLICATIONS AND SERVICES

20TH INTERNATIONAL CONFERENCE, HIMI 2018, HELD AS PART OF HCI INTERNATIONAL 2018, LAS VEGAS, NV, USA, JULY 15-20, 2018, PROCEEDINGS, PART II

Springer This two-volume set LNCS 10904 and 10905 constitutes the refereed proceedings of the 20th International Conference on Human Interface and the Management of Information, HIMI 2018, held as part of HCI International 2018 in Las Vegas, NV, USA, in July 2018. The total of 1170 papers and 195 posters included in the 30 HCII 2018 proceedings volumes was carefully reviewed and selected from 4373 submissions. The 53 papers presented in this volume were organized in topical sections named: interacting with information; information and learning; information in aviation and transport; intelligent systems; and service management.

MANAGEMENT OF TOURISM ECOSYSTEM SERVICES IN A POST PANDEMIC CONTEXT

GLOBAL PERSPECTIVES

Taylor & Francis Tourism and Ecosystems services are inter-dependant and facing unique challenges. This book explores the challenges faced by destinations regarding the management and restoration of their ecosystem services. Responding to the effects of the Covid-19 pandemic, this book offers unique management solutions based on best practices from Europe, America, Asia, and Africa, Indonesia and island destinations. The management techniques and strategies proposed are adaptive in nature and they are meant to protect and sustain natural and cultural ecosystem services utilized by the tourism industry. Drawing from a rich collection of international case studies, the book adopts a user-friendly pedagogic approach, while seeking to be an essential future reference to scholars, researchers, academics and industry practitioners, destination management organizations and restoration agencies.

ADVANCES IN PRODUCTION MANAGEMENT SYSTEMS. COMPETITIVE MANUFACTURING FOR INNOVATIVE PRODUCTS AND SERVICES

IFIP WG 5.7 INTERNATIONAL CONFERENCE, APMS 2012, RHODES, GREECE, SEPTEMBER 24-26, 2012, REVISED SELECTED PAPERS, PART I

Springer The two volumes IFIP AICT 397 and 398 constitute the thoroughly refereed post-conference proceedings of the International

IFIP WG 5.7 Conference on Advances in Production Management Systems, APMS 2012, held in Rhodes, Greece, in September 2012. The 182 revised full papers were carefully reviewed and selected for inclusion in the two volumes. They are organized in 6 parts: sustainability; design, manufacturing and production management; human factors, learning and innovation; ICT and emerging technologies in production management; product and asset lifecycle management; and services, supply chains and operations.

DIPLOMACY AND NEGOTIATION FOR HUMANITARIAN NGOS

Springer Science & Business Media Diplomacy and Funding for Humanitarian Non-Profits is a practical guide to best practices in diplomacy and negotiation for non-profits (NGOs) who work to convince governments and international institutions to effectively protect humans through disaster assistance, sustainable development and the protection of cultures. The volume proposes a holistic approach to humanitarian assistance by integrating non-traditional and traditional humanitarian partners. Users of the book will be prepared to speak to diplomats and government officials in any setting, including war zones. The book mainly focuses on approaching local and national governments, the United Nations system, the international Red Cross movement and other international organizations. The reader will learn the rules of "diplomatic protocol", and much about the rules and procedures of major international bodies, as well as how to leverage media and knowledge management for planning, establishing, and managing a humanitarian initiative. To provide balance and real world relevance, the guide draws on a compilation of the extensive activities of both authors across a range of development, emergency management, knowledge management, and climate issues in government and in the NGO world, as well as interviews with a broad range of scholars and officials from NGOs, diplomatic missions, the media, the United Nations, the Red Cross, governments and corporations.

GLOBAL ENVIRONMENTAL POLITICS

Routledge For more than twenty years, Global Environmental Politics has provided an up-to-date, accurate, and unbiased introduction to the world's most pressing environmental issues. This new edition continues this tradition while covering critical new developments in the field. Through case studies on key issues such as climate change, toxic chemicals, and biodiversity loss, the authors detail the development of major environmental regimes. With new material on the adoption of global Sustainable Development Goals and the 2030 Agenda for Sustainable Development; the December 2015 Paris Climate Change conference; and recent meetings of major conventions on desertification, biological diversity, and more; the authors present a comprehensive overview of contemporary international environmental politics. Global Environmental Politics is vital reading for any student wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future.

THE HYDROLOGICS OF DAMS

ENGINEERING OR ECOSYSTEMS?

Zed Books Ltd. *The Hydrologics of Dams* charts the troubled waters of 'heavy engineering' approaches to ecosystem management, exploring the history, benefits and problems of large dams. It then explores diverse ecosystem-based approaches to management of human interactions with the water cycle, concluding that a synthesis of approaches is needed in future. The book also addresses political, economic and legal dimensions of water management. Featuring case studies from China, India and South Africa, this insightful new book argues that there are more appropriate physical and social technologies that can help to sustainably provide access to clean water for all.

STURGEONS AND PADDLEFISH OF NORTH AMERICA

Springer Science & Business Media Modern North American sturgeons and paddlefish are the result of 100 million years of evolution. Once an integral part of aboriginal culture, their numbers were decimated by overfishing and habitat destruction during the past two centuries. This book details the extensive science aimed at helping these remarkable species recover from the brink of extinction, and describes the historical, biological, and ecological importance of North American sturgeon and paddlefish. The text is enhanced by photographs and detailed line drawings. This comprehensive volume will be an invaluable resource for researchers, educators, and consultants, in academic and government settings, who work to further scientific understanding of these fishes. No other single compilation has documented current information in such detail.

INTEGRATED RISK MANAGEMENT FOR LEISURE SERVICES

Human Kinetics *Integrated Risk Management for Leisure Services* provides both students and professionals with a systematic approach to safety. By integrating risk management, accident prevention, and emergency response with information on legal liability, *Integrated Risk Management for Leisure Services* enables leisure service providers to implement strategies to reduce or eliminate bodily injury, property damage, and financial loss. *Integrated Risk Management for Leisure Services* uses a four-phase integrated risk management model. The first three phases focus on negligence, the accident process, and risk management plans to reduce or eliminate injury, damage, or loss. The fourth phase focuses on what to do after an incident occurs to reduce the impact of injury, damage, or loss. *Integrated Risk Management for Leisure* features several unique aspects for students and professionals in the recreation and park field. It covers safety prevention and accident processes in the recreation and parks field. Then it addresses how

to manage the post-incident situation to reduce impacts. Last, the text integrates these two new areas with the traditional areas of legal liability and risk management planning in an effort to provide safer recreation and park programs.

DRAWDOWN

THE MOST COMPREHENSIVE PLAN EVER PROPOSED TO REVERSE GLOBAL WARMING

Penguin UK NEW YORK TIMES BESTSELLER For the first time ever, an international coalition of leading researchers, scientists and policymakers has come together to offer a set of realistic and bold solutions to climate change. All of the techniques described here - some well-known, some you may have never heard of - are economically viable, and communities throughout the world are already enacting them. From revolutionizing how we produce and consume food to educating girls in lower-income countries, these are all solutions which, if deployed collectively on a global scale over the next thirty years, could not just slow the earth's warming, but reach drawdown: the point when greenhouse gasses in the atmosphere peak and begin to decline. So what are we waiting for?

INTRODUCTION TO TOURISM TRANSPORT

CABI Transport is an inherent part of tourism; whether as a functional means of transportation, such as between origin and destination or within the destination; or as a key element of the holiday experience itself, as in cruising or traveling along scenic or historic routes. This book provides the necessary background information to gain a comprehensive understanding of transportation markets, with each of the three modes of transportation - air, ground and marine - explored in detail. Each section includes definitions, the historical development of the market and international institutional frameworks, with case studies, learning objectives and study questions incorporated to facilitate an active learning process.

SPACE SUPPORTING AFRICA

VOLUME 1: A PRIMARY NEEDS APPROACH AND AFRICA'S EMERGING SPACE MIDDLE POWERS

Springer In this book the background and context of Africa's political and socio-economic landscape is presented and unpacked through a primary needs approach which focuses on climate, biodiversity, health, water, education, and space-related capacity building. African theoretical contributions from the International Relations field are discussed, and Africa's new Space Policy and Strategy, along with debates around the establishment of an African Space Agency, are explored. The African International Space Ecosystem is then analyzed, including its dimensions of intra-African space relations and initiatives, African participation in COPUOS,

and international space activities, agreements, and initiatives in Africa. The final part is dedicated to the national space infrastructure and activities of African states.

EUROPEAN B2C E-COMMERCE IN THE BANKING SECTOR

diplom.de Inhaltsangabe: Introduction: Based on the findings of the correlation analysis described in chapter 7.1, factors of influence and variables statistically not related to financial B2C e-commerce can now be distinguished. While the focus of this part of the analysis lies on factors showing significant correlation coefficients in relation to the research topic, this does not mean that the non-correlated factors are not of importance or somewhat connected. The statistical measurements may not be suitable for this type of analysis, survey results may be misleading or the situation will have changed in the last two years after the investigation. On the other hand, the observed correlations do not necessarily equal a causal relationship and the high complex matter can not be explained by single variables as influence factors. The conducted correlation analysis only serves as an indicator for potential influence factors or accelerators and has to be carefully evaluated. Keeping these considerations in mind, the statistical analysis within the scope of this masters dissertation will support the following conclusions and interpretations. First of all, computer usage and skills as well as internet usage and skills need to be on a high level in a country to facilitate financial B2C e-commerce. Residents of countries with higher levels for the subject of examination will probably already have gained adequate skills, as indicated by a medium strong negative relation to computer courses taken in the last three months and other online activities such as online information search and online banking positively correlated. While online banking is partially included in the variable e_comm representing financial B2C e-commerce through customer s usage of online financial services, this particular result may not be totally conclusive. However, it seems logical that consumers with good computer and internet skills also spending a lot of time with advanced activities on the internet may also engage in financial B2C e-commerce. This assumption narrows down the target group and excludes a certain clientele from online product offers of financial institutions - banks will need to adapt their web portals accordingly, set up initiatives improving computer and web skills of their consumers and meet their consumers on the internet, e.g. with advertising while they are using search engines. Practical evidence supporting these interpretations can be found in several examples of [...]

20TH ISPE INTERNATIONAL CONFERENCE ON CONCURRENT ENGINEERING

PROCEEDINGS

IOS Press As a concept, Concurrent Engineering (CE) initiates processes with the goal of improving product quality, production efficiency and overall customer satisfaction. Services are becoming increasingly important to the economy, with more than 60% of the

GDP in Japan, the USA, Germany and Russia deriving from service-based activities. The definition of a product has evolved from the manufacturing and supplying of goods only, to providing goods with added value, to eventually promoting a complete service business solution, with support from introduction into service and from operations to decommissioning. This book presents the proceedings of the 20th ISPE International Conference on Concurrent Engineering, held in Melbourne, Australia, in September 2013. The conference had as its theme Product and Service Engineering in a Dynamic World, and the papers explore research results, new concepts and insights covering a number of topics, including service engineering, cloud computing and digital manufacturing, knowledge-based engineering and sustainability in concurrent engineering.

REDISCOVERING SUSTAINABILITY

ECONOMICS OF THE FINITE EARTH

Routledge Drawing on historical and current data, this thought-provoking book summarises the pathways to the present predicament and maps out strategies to develop financial and economic systems for a sustainable world. The content is arranged in three parts addressing 'Stylised Market Equilibrium', 'The Real Market Economy', and 'Present Affluence Versus the Future'. In *Rediscovering Sustainability* the authors help bridge the gap in understanding between scientists and the green movement on the one side and many economists on the other. Greens worry about catastrophic climate change and anthropocene mass extinction. Economists express reservations about spending substantial amounts of money on preventing environmental degradation. Aart and Wiebina Heesterman argue that there are inherent limitations in standard economics which cause blind spots in its environmental economics sub-field, as well as issues to do with simple lack of knowledge. In this timely book, the limitations of the neoclassical economics framework are examined. The authors explore the relationship between Keynesian aggregate economics and financial sustainability, as well as that between scale economies, locational economics and the understated cost of fuel for transport. The impact of economic theory on practice is examined. Conventional economic theory and political compromise bear unhelpfully on an energy market constrained by emissions targets. *Rediscovering Sustainability* is an invaluable aid to understanding for those teaching, studying, campaigning, policy-making, or involved with the science or politics of environmental and sustainability issues. It is also a book for those concerned with the application of economic theory in any context.
