## LIBRARY SERVICES FOR ONLINE PATRONS: A MANUAL FOR FACILITATING ACCESS, LEARNING, AND ENGAGEMENT

---

ABC-CLIO This practical and holistic approach to offering library resources and services to online patrons addresses multiple areas of service to online patrons, including reference, instruction, access, and marketing. Academic libraries are wonderful resources for university students and faculty on campus, and public libraries thrive on providing targeted in-person services such as storytime, makerspaces, and adult programming. It can be easy, however, to forget about the large population of students, faculty, and community members who access library resources and use library services remotely. Library Services for Online Patrons reaches out to patrons who are not—or not always—located on campus or who seldom—if ever—visit libraries' physical facilities and who may not be aware of or able to equitably use library services. The authors focus on ways to organize library resources using principles of design and to cater library services to the specific needs of online students, faculty, and community members. They also address how to effectively target marketing to the online population and how to collaborate with campus and community stakeholders who work directly with them. Provides novel services and resources that will save librarians already serving online patrons time and energy Offers a broad, practical perspective to help novice librarians make initial connections with online learners Emphasizes the importance of identifying other institutional players in online education in order to effectively implement and market improvements Enhances understanding of the importance of universal design and how to assess possibilities for improvement in online services

## SCHOLARLY COMMUNICATION IN LIBRARY AND INFORMATION SERVICES

---

### THE IMPACTS OF OPEN ACCESS JOURNALS AND E-JOURNALS ON A CHANGING SCENARIO

Elsevier This book has been written with a view to understand the validity of the perceptions of Open Access (OA) e-journals in the Library and Information Science (LIS) field. Using relevant OA journals this book presents and evaluates journals qualitatively and quantitatively. Over the last three hundred years scholarly journals have been the prime mode of transport in communicating the scholarly research process. However in the last few decades, a changing scenario has been witnessed in their form and format. OA is an innovative idea that attracts a fair amount of support and opposition around the world because it bridges the gap between digitally divided scholars by solving the pricing and permission crises that have imbalanced the scholarly communication process. Some scholars are of the opinion that OA has led to a chaotic environment where anyone can publish anything. Scholarly Communication in Library and Information Services records, in detail, the impact by accessing the journals' web site qualitatively and quantitatively in measuring the important elements such as articles, authors, countries, subjects and cited references. Finally, the book calculates the impact factor using synchronous and asynchronous approaches. First ever study to extensively evaluate LIS Journals' Web site qualitatively by using a newly developed set of criteria LIS OA journals are also evaluated quantitatively Counts citations of LIS OA articles in terms of formal citations by using Google Scholar

#### **PETSC FOR PARTIAL DIFFERENTIAL EQUATIONS: NUMERICAL SOLUTIONS IN C AND PYTHON**

---

SIAM The Portable, Extensible Toolkit for Scientific Computation (PETSc) is an open-source library of advanced data structures and methods for solving linear and nonlinear equations and for managing discretizations. This book uses these modern numerical tools to demonstrate how to solve nonlinear partial differential equations (PDEs) in parallel. It starts from key mathematical concepts, such as Krylov space methods, preconditioning, multigrid, and Newton's method. In PETSc these components are composed at run time into fast solvers. Discretizations are introduced from the beginning, with an emphasis on finite difference and finite element methodologies. The example C programs of the first 12 chapters, listed on the inside front cover, solve (mostly) elliptic and parabolic PDE problems. Discretization leads to large, sparse, and generally nonlinear systems of algebraic equations. For such problems, mathematical solver concepts are explained and illustrated through the examples, with sufficient context to speed further development. PETSc for Partial Differential Equations addresses both discretizations and fast solvers for PDEs, emphasizing practice more than theory. Well-structured examples lead to run-time choices that result in high solver performance and parallel scalability. The last two chapters build on the reader's understanding of fast solver concepts when applying the Firedrake Python finite element solver library. This textbook, the first to cover PETSc programming for nonlinear PDEs, provides an on-ramp for graduate students and researchers to a major area of high-performance computing for science and engineering. It is suitable as a supplement for courses in scientific computing or numerical methods for differential equations. John Wiley & Sons

#### **DATA MINING: CONCEPTS AND TECHNIQUES**

---

Elsevier Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

#### **DSM-5® HANDBOOK ON THE CULTURAL FORMULATION INTERVIEW**

---

American Psychiatric Pub The Cultural Formulation Interview (CFI) is a product of the arduous process that resulted in publication of the DSM-5, and only one book—DSM-5 Handbook of the Cultural Formulation Interview—provides clinicians with the background and guidance they need to implement the CFI. The Handbook teaches the reader how to conduct a cultural assessment using the CFI, which consists of three types of semistructured interviews. Although the CFI was not designed to be the sole basis for making a clinical diagnosis, it can be used in research and clinical settings to enhance clinical understanding and decision making. The volume presents techniques to help providers situate their work within the context of a patient's culture to enhance communication—not only with those of different cultures but across all clinical encounters. Especially instructive are the supplemental videos that demonstrate application of the CFI components through the use of clinical vignettes. Clinicians will, of course, find the DSM-5® Handbook of the Cultural Formulation Interview indispensable, but administrators, policy makers, advocates, and other practitioners who work collaboratively to engage patients in the mental health care process will also value its clarity and comprehensiveness.

#### **INNOVATION AND EMPLOYMENT IN SERVICES**

---

---

#### **THE CASE OF KNOWLEDGE INTENSIVE BUSINESS SERVICES IN SWEDEN**

---

Linköping University Electronic Press This is a study of innovation in Knowledge Intensive Business Services (KIBS) and the impact innovation has on employment. The thesis relies on theories within the fields of "innovation in services", in particular KIBS, and "innovation and employment", taking as its point of departure the taxonomy of product and process innovation. The thesis is based on a discussion of innovation in services with a focus on how innovation in services may be understood and delineated. A long discussion is dedicated to the taxonomy of product and process innovation and the extent to which these concepts may be applicable to innovation in services. The thesis also scrutinises the concept of KIBS and how this can be defined. It further discusses features commonly associated with KIBS firms. The thesis is also rooted in the broader issue of innovation as a creator and destroyer of employment and makes a contribution in applying these issues to service sectors. The empirical part of the thesis builds on a database compiled for the research project, comprised of 967 Swedish KIBS firms. The database covers issues of innovation, employment and characteristics of the firm. The findings indicate that innovation was common in Swedish KIBS firms and that innovations often had an impact on employment. However, the thesis did not detect a straightforward relation between type of innovation (technological process innovation, organisational process innovation, goods product innovation and service product innovation) and the impact on employment. Explanations other than type of innovation have to be considered to analyse the impact of innovation on employment. The thesis further suggests that although innovation in KIBS is common, innovation itself is difficult to conceptualise and delineate.

#### **A CODE OF PRACTICE**

---

This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Kluwer Law International B.V. Insurance related to outer space activities has been around since the 1960s, but has become vastly more significant with the increased commercial use of satellites. This book focuses on the legal aspects of space insurance in the contractual context, analysing space risk as well as the insurance terms used on the market. It offers the first in-depth coverage, both practical and theoretical, of space insurance from an international law perspective. Attending throughout to the important and problematic distinction between the space segment (upstream) and ground segment (downstream) in space law, this book deals comprehensively with such issues and topics as the following: - the main hazards relating to space activities; - the impact of new space technologies on the level of risk and insurance; - the differing types of risks attributable to various entities in the context of insurable interest; - aspects of the space risk allocation regimes and risk assessment; - the impact of the five 'space treaties' - the Outer Space Treaty, the Liability Convention, the Rescue Agreement, the Registration Convention and the Moon Agreement - on the subject and scope of insurance coverage; - the advent of suborbital flight, commercial human space flight and space tourism in the context of emerging insurance risks; - the problem of space debris; - contractual aspects of space activities affecting the space insurance risks; - basic notions such as 'outer space', 'space object' in the context of space activities and related insurance coverage; - basic insurance principles and their operation in the space insurance; and - the adjustment of losses and the settlement of disputes in space insurance. The author emphasises the need to understand the various insurance risks facing particular types of commercial space activities, including pre-launch, launch, transportation, spaceflight, satellite communications, satellite navigation, satellite remote sensing and space station operation. Satellites are increasingly a vital part of many daily activities of contemporary society and the Earth's orbit is becoming ever more crowded, heightening the risks of collision, damage and claims. This thoroughly researched book will therefore be extremely useful to lawyers, policymakers and academics tasked with defining the scope of insurance coverage that accurately mirrors technological, contractual and legal reality. Its practical aspect will be of extraordinary value to insurance lawyers, underwriters and brokers.
