#### THE SUN AND PLANTS

---

*Cavendish Square Publishing, LLC Without the sun, we wouldn't have bountiful harvests, beautiful flowers, or green forests. The relationship between the sun and plants is complex, fascinating, and altogether necessary for life on Earth. Through colorful photographs, easy-to-follow diagrams, fun facts, and standards-based activities, this book gives readers an inside look at photosynthesis, sun plants versus shade plants, seasons, and so much more. The narrative takes young learners on a journey through a day in the life of a plant and helps readers predict how clouds, the sun, and seasonal weather will affect the trees, flowers, crops, and lawns that they encounter in their own lives.*

#### THE IMPROBABLE GLORIES OF THE BEST AMERICAN COMIC BOOKS

---

*Univ of California Press Funnybooks is the story of the most popular American comic books of the 1940s and 1950s, those published under the Dell label. For a time, "Dell Comics Are Good Comics" was more than a slogan—it was a simple statement of fact. Many of the stories written and drawn by people like Carl Barks (Donald Duck, Uncle Scrooge), John Stanley (Little Lulu), and Walt Kelly (Pogo) repay reading and rereading by educated adults even today, decades after they were published as disposable entertainment for children. Such triumphs were improbable, to say the least, because midcentury comics were so widely dismissed as trash by angry parents, indignant librarians, and even many of the people who published them. It was all but miraculous that a few great cartoonists were able to look past that nearly universal scorn and grasp the artistic potential of their medium. With clarity and enthusiasm, Barrier explains what made the best stories in the Dell comic books so special. He deftly turns a complex and detailed history into an expressive narrative sure to appeal to an audience beyond scholars and historians.*

**THINGS NEW AND STRANGE****A SOUTHERNER'S JOURNEY THROUGH THE SMITHSONIAN COLLECTIONS**

*University of Georgia Press Things New and Strange chronicles a research quest undertaken by G. Wayne Clough, the first secretary of the Smithsonian Institution born in the South. Soon after retiring from the Smithsonian, Clough decided to see what the Smithsonian collections could tell him about South Georgia, where he had spent most of his childhood in the 1940s and 1950s. The investigations that followed, which began as something of a quixotic scavenger hunt, expanded as Clough discovered that the collections had many more objects and documents from South Georgia than he had imagined. These objects illustrate important aspects of southern culture and history and also inspire reflections about how South Georgia has changed over time. Clough's discoveries—animal, plant, fossil, and rock specimens, along with cultural artifacts and works of art—not only serve as a springboard for reflections about the region and its history, they also bring Clough's own memories of his boyhood in Douglas, Georgia, back to life. Clough interweaves memories of his own experiences, such as hair-raising escapes from poisonous snakes and selling boiled peanuts for a nickel a bag at the annual auction of the tobacco crop, with anecdotes from family lore, which launches an exploration of his forebears and their place in South Georgia history. In following his engaging and personal narrative, we learn how nonspecialists can use museum archives and how family, community, and natural history are intertwined.*

*Europa Editions* The Pulitzer Prize-winning book critic shares recollections and reviews from his career at the Washington Post. In this book, Jonathan Yardley considers lesser-known works from renowned authors and underappreciated talents, and offers fresh takes on old favorites. Yardley's reviews of sixty titles include fiction by Gabriel García Márquez, John Cheever, and Henry Fielding; the autobiography of Louis Armstrong; essays by Nora Ephron; and Margaret Leech's history of Washington during the Civil War. *Second Reading* is also the memoir of a passionate and lifelong reader told through the books that have meant the most to him. Playing the part of both reviewer and bibliophile, Yardley takes on Steinbeck and Salinger, explores the southern fiction of Shirley Ann Grau and Eudora Welty, looks into a darker side of Roald Dahl, and praises the pulp fiction of William Bradford Huie and the crime novels of John D. MacDonald. Collected from a popular Washington Post column of the same name, *Second Reading* is an incisive and entertaining look at the career and times of an esteemed critic and the venerable books that shaped him. This delightful consideration reminds readers that thoughtful criticism and a lively sense of fun can exist side by side.

---

---

*Read Books Ltd* This is volume V of "The Modern Flower Garden" series, dealing with the Iris. Irises are perennial flowering plants with showy flowers that take their name from the Greek word for a rainbow. This volume contains a classic guide to growing these beautiful flowers, including all the information a Gardner needs to know relating plating, propagating, different varieties, common problems, and much more. Highly recommended for inclusion in gardening collections. Contents include: "The Genus and its Species", "The Bearded Irises", "The Apogon Section", "Oncocyclus, Regelia, Regelio-Cyclus, Pogo-Ctclus and other Irises", "Diseases", "Raising Seedlings, etc. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new introduction on the history of gardening.
