Three Essays and Three Revolutions

Strategic Book Publishing **If you have ever wondered why American Catholics and American Protestants in the mainline denominations in 2011 believe and worship in very similar ways; why Democrats and Republicans accept the necessity of governmental intervention to secure the "safety net" of services citizens may need to access at various times in their lives; and why average American workers in their pivotal role as producers and consumers of goods and services "own" the nation's economy; Three Essays and Three Revolutions is the book for you. Author Francis Goskowski argues that Martin Luther, Jean-Jacques Rousseau, and Karl Marx, three "Founding Fathers" of the modern world, are responsible for the "big ideas" that have shaped current thinking in religion, politics, and economics. By closely examining one important work of each thinker, the author shows how the revolutionary concepts Luther, Rousseau, and Marx advanced, provoked fierce opposition within the prevailing order, but ultimately gained acceptance in all circles, evidenced by the fundamental agreement on religious liberty, civic equality, and economic justice apparent throughout the Western world today. This eloquently written, thought-provoking, and sensibly priced collection of essays...is timely and long overdue. Three Essays and Three Revolutions is the sort of wonderful book of which any aspiring writer might wish to claim authorship. I am sure that it will be wisely read, thoughtfully debated, and much treasured in the years ahead. - John Quentin Feller, Ph.D., K.H.S., former professor of history and historical consultant to the late Cardinal Lawrence J. Shehan and retired Cardinal William H. Keeler, 12th and 14th Archbishops of Baltimore respectively.**

Reason and Revolution

Routledge This classic book is Marcuse's masterful interpretation of Hegel's philosophy and the influence it has had on European political thought from the French Revolution to the present day. Marcuse brilliantly illuminates the implications of Hegel's ideas with later developments in European thought, particularly with Marxist theory.

Social Media in Industrial China

UCL Press Life outside the mobile phone is unbearable.' Lily, 19, factory worker. Described as the biggest migration in human history, an estimated 250 million Chinese people have left their villages in recent decades to live and work in urban areas. Xinyuan Wang spent 15 months living among a community of these migrants in a small factory town in southeast China to track their use of social media. It was here she witnessed a second migration taking place: a movement from offline to online. As Wang argues, this is not simply a convenient analogy but represents the convergence of two phenomena as profound and consequential as each other, where the online world now provides a home for the migrant workers who feel otherwise 'homeless'. Wang's fascinating study explores the full range of preconceptions commonly held about Chinese people - their relationship with education, with family, with politics, with 'home' - and argues why, for this vast population, it is time to reassess what we think we know about contemporary China and the evolving role of social media.

The Scientific Revolution

University of Chicago Press "There was no such thing as the Scientific Revolution, and this is a book about it." With this provocative and apparently paradoxical claim, Steven Shapin begins his bold, vibrant exploration of the origins of the modern scientific worldview, now updated with a new bibliographic essay featuring the latest scholarship. "An excellent book."—Anthony Gottlieb, *New York Times Book Review* "Timely and highly readable. . . . A book which every scientist curious about our predecessors should read."—Trevor Pinch, *New Scientist* "Shapin's account is informed, nuanced, and articulated with clarity. . . . This is not to attack or devalue science but to reveal its richness as the human endeavor that it most surely is. . . . Shapin's book is an impressive achievement."—David C. Lindberg, *Science* "It's hard to believe that there could be a more accessible, informed or concise account. . . . The Scientific Revolution should be a set text in all the disciplines. And in all the indisciplines, too."—Adam Phillips, *London Review of Books*

How the World Changed Social Media

UCL Press **How the World Changed Social Media** is the first book in **Why We Post**, a book series that investigates the findings of anthropologists who each spent 15 months living in communities across the world. This book offers a comparative analysis summarising the results of the research and explores the impact of social media on politics and gender, education and commerce. What is the result of the increased emphasis on visual communication? Are we becoming more individual or more social? Why is public social media so conservative? Why does equality online fail to shift inequality offline? How did memes become the moral police of the internet? Supported by an introduction to the project's academic framework and theoretical terms that help to account for the findings, the book argues that the only way to appreciate and understand something as intimate and ubiquitous as social media is to be immersed in the lives of the people who post. Only then can we discover how people all around the world have already transformed social media in such unexpected ways and assess the consequences

Brands

Meaning and Value in Media Culture

Routledge Drawing on rich empirical material, this revealing book builds up a critical theory, arguing that brands have become an important tool for transforming everyday life into economic value. When branding lifestyles or value complexes onto their products, companies assume that consumers desire products for their ability to give meaning to their lives. Yet, brands also have a key function within managerial strategy. Examining the history of audience and market research, marketing thought and advertising strategy; the first part of this book traces the historical development of branding, whilst the second part evaluates new media, contemporary management and overall media economics to present the first systematic theory of brands: the brand as a key institution in information capitalism. It includes chapters on: consumption marketing brand management online branding the brand as informational capital. Richly illustrated with case studies from market research, advertising, shop displays, mobile phones, the internet and virtual companies, this outstanding book is essential reading for students and researchers of the sociology of media, cultural studies, advertising and consumer studies and marketing.

Convergence Culture

Where Old and New Media Collide

NYU Press “What the future fortunes of [Gramsci’s] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this.” —Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world’s greatest cultural critics. Antonio A. Santucci is perhaps the world’s preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci’s masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as “civil society” and “hegemony” are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci’s purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci’s writings, is absorb Gramsci’s methods. These can be summed up as the suspicion of “grand explanatory schemes,” the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: “Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and under many aspects within the capillaries of society.” The rigor of Santucci’s examination of Gramsci’s life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

Urban Education

A Comprehensive Guide for Educators, Parents, and Teachers

R & L Education **Maintaining that urban teaching and learning is characterized by numerous contradictions, this book proposes that there is a wide range of social, cultural, psychological, and pedagogical knowledge that urban educators must possess in order to engage in effective and transformative practice. It is necessary for teachers in urban schools to be scholar-practitioners, as opposed to bureaucrats who only follow rather than analyze, understand, and create. Ten major sections cover the myriad issues of urban education as it exists today: context of urban education, race and ethnicity, social justice, teaching and pedagogy, power and urban education, language issues, cultural issues of urban schools as seen in the media, research in city schools, aesthetics and the proximity of cultural institutions, and education policy. Sixty one essays written by specialists in teacher education; public policy; sociology; psychology; applied linguistics; forestry; urban studies; school administration; cultural studies; evaluation; and linguistics, provide a blueprint for scholars, teachers, parents, urban politicians, school administrators, policy professionals, and others seeking to understand the situation of urban schools across America today.**

Nineteen Eighty-Four

epubli "Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Feminist Futures of Spatial Practice Materialism, Activism, Dialogues, Pedagogies, Projections

Architecture and the arts have long been on the forefront of socio-spatial struggles, in which equality, access, representation and expression are at stake in our cities, communities and everyday lives. Feminist spatial practices contribute substantially to new forms of activism, expanding dialogues, engaging materialisms, transforming pedagogies, and projecting alternatives. 'Feminist Futures of Spatial Practice' traces practical tools and theoretical dimensions, as well as temporalities, emergence, histories, events, durations ? and futures ? of feminist practices. 0Authors include international practitioners, researchers, and educators, from architecture, the arts, art history, curating, cultural heritage studies, environmental sciences, futures studies, film, visual communication, design and design theory, queer, intersectional and gender studies, political sciences, sociology, and urban planning. Established as well as emerging voices write critically from within their institutions, professions, and their activist, political and personal practices.

Critical Terms for Media Studies

University of Chicago Press **Communications, philosophy, film and video, digital culture: media studies** straddles an astounding array of fields and disciplines and produces a vocabulary that is in equal parts rigorous and intuitive. **Critical Terms for Media Studies** defines, and at times, redefines, what this new and hybrid area aims to do, illuminating the key concepts behind its liveliest debates and most dynamic topics. Part of a larger conversation that engages culture, technology, and politics, this exciting collection of essays explores our most critical language for dealing with the qualities and modes of contemporary media. Edited by two outstanding scholars in the field, W. J. T. Mitchell and Mark B. N. Hansen, the volume features works by a team of distinguished contributors. These essays, commissioned expressly for this volume, are organized into three

interrelated groups: “Aesthetics” engages with terms that describe sensory experiences and judgments, “Technology” offers entry into a broad array of technological concepts, and “Society” opens up language describing the systems that allow a medium to function. A compelling reference work for the twenty-first century and the media that form our experience within it, *Critical Terms for Media Studies* will engage and deepen any reader’s knowledge of one of our most important new fields.

Counterrevolution and Revolt

Beacon Press In this book Herbert Marcuse makes clear that capitalism is now reorganizing itself to meet the threat of a revolution that, if realized, would be the most radical of revolutions: the first truly world-historical revolution. Capitalism's counterrevolution, however, is largely preventive, and in the Western world altogether preventive. Yet capitalism is producing its own grave-diggers, and Marcuse suggests that their faces may be very different from those of the wretched of the earth. The future revolution will be characterized by its enlarged scope, for not only the economic and political structure, not only class relations, but also humanity's relation to nature (both human and external nature) tend toward radical transformation. For the author, the "liberation of nature" is the connecting thread between the economic-political and the cultural revolution, between "changing the world" and personal emancipation.

Anthropology of Landscape

The Extraordinary in the Ordinary

UCL Press *An Anthropology of Landscape* tells the fascinating story of a heathland landscape in south-west England and the way different individuals and groups engage with it. Based on a long-term anthropological study, the book emphasises four individual themes: embodied identities, the landscape as a sensuous material form that is acted upon and in turn acts on people, the landscape as contested, and its

relation to emotion. The landscape is discussed in relation to these themes as both 'taskscape' and 'leisurescape', and from the perspective of different user groups. First, those who manage the landscape and use it for work: conservationists, environmentalists, archaeologists, the Royal Marines, and quarrying interests. Second, those who use it in their leisure time: cyclists and horse riders, model aircraft flyers, walkers, people who fish there, and artists who are inspired by it. The book makes an innovative contribution to landscape studies and will appeal to all those interested in nature conservation, historic preservation, the politics of nature, the politics of identity, and an anthropology of Britain.

Taking Power

On the Origins of Third World Revolutions

Cambridge University Press **Taking Power analyzes the causes behind some three dozen revolutions in the Third World between 1910 and the present. It advances a theory that seeks to integrate the political, economic, and cultural factors that brought these revolutions about, and links structural theorizing with original ideas on culture and agency. It attempts to explain why so few revolutions have succeeded, while so many have failed. The book is divided into chapters that treat particular sets of revolutions including the great social revolutions of Mexico 1910, China 1949, Cuba 1959, Iran 1979, and Nicaragua 1979, the anticolonial revolutions in Algeria, Vietnam, Angola, Mozambique, and Zimbabwe from the 1940s to the 1970s, and the failed revolutionary attempts in El Salvador, Peru, and elsewhere. It closes with speculation about the future of revolutions in an age of globalization, with special attention to Chiapas, the post-September 11 world, and the global justice movement.**

The Emancipated Spectator

Verso Books **The theorists of art and film commonly depict the modern audience as aesthetically and politically passive. In response, both artists and thinkers have sought to transform the spectator into an active agent and the spectacle into a communal performance. In this follow-up to the acclaimed *The Future of the Image*, Rancière takes a radically different approach to this attempted emancipation. First asking exactly what we mean by political art or the politics of art, he goes on to look at what the tradition of critical art, and the desire to insert art into life, has achieved. Has the militant critique of the consumption of images and commodities become, ironically, a sad affirmation of its omnipotence?**
