Proceedings of the Unified International Technical Conference on Refractories, November 8-11, 2005, Orlando, Florida, USA, 9th Biennial Worldwide Congress on Refractories

Wiley-American Ceramic Society This collection of over 200 papers from the 9th Biennial Worldwide Congress on Refractories is broad-ranging and diverse in perspective. Topics include steelmaking refractories, castable technology, global refractories education and technology and industrial applications. Numerous papers are from representatives from major international steel companies.

PRACTICAL COURSE IN PHYSICS

The standard of the book is maintained keeping the level of First Year B.Sc. course in terms of the steps required for performing the experiments. However the format of procedures to perform the experiment, observation tables, theory, viva-voce questionnaires etc. are provided wherever it is necessary for deep understanding. Utmost care has been taken to explain the steps for performing practicals with illustrative figures and circuit diagrams used where absolutely required.

ENGINEERING MECHANICS

STATICS AND DYNAMICS

PHI Learning Pvt. Ltd. This compact and easy-to-read text provides a clear analysis of the principles of equilibrium of rigid bodies in statics and dynamics when they are subjected to external mechanical loads. The book also introduces the readers to the effects of force or displacements so as to give an overall picture of the behaviour of an engineering system. Divided into two parts-statics and dynamics-the book has a structured format, with a gradual development of the subject from simple concepts to advanced topics so that the beginning undergraduate is able to comprehend the subject with ease. Example problems are chosen from engineering practice and all the steps involved in the solution of a problem are explained in detail. The book also covers advanced topics such as the use of virtual work principle for finite element analysis; introduction of Castigliano's theorem for elementary indeterminate analysis; use of Lagrange's equations for obtaining equilibrium relations for multibody system; principles of gyroscopic motion and their applications; and the response of structures due to ground motion and its use in earthquake engineering. The book has plenty of exercise problems-which are arranged in a graded level of difficulty-, worked-out examples and numerous diagrams that illustrate the principles discussed. These features along with the clear exposition of principles make the text

suitable for the first year undergraduate students in engineering.

World Congress on Medical Physics and Biomedical Engineering September 7 - 12, 2009 Munich, Germany

Vol. 25/XII General Subjects

Springer Science & Business Media Present Your Research to the World! The World Congress 2009 on Medical Physics and Biomedical Engineering - the triennial scientific meeting of the IUPESM - is the world's leading forum for presenting the results of current scientific work in health-related physics and technologies to an international audience. With more than 2,800 presentations it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009! Medical physics, biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and therapeutics, it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro- and nanosystems, optics and biotechnology, the congress will serve as an inter- and multidisciplinary platform that brings together people from basic research, R&D, industry and medical application to discuss these issues. As a major event for science, medicine and technology the congress provides a comprehensive overview and in-depth, first-hand information on new developments, advanced technologies and current and future applications. With this Final Program we would like to give you an overview of the dimension of the congress and invite you to join us in Munich! Olaf Dössel Congress President Wolfgang C.
