Applied Computing

Second Asian Applied Computing Conference, AACC 2004, Kathmandu, Nepal, October 29-31, 2004. Proceedings

Springer The focus of the Asian Applied Computing Conference (AACC) is primarily to bring the research in computer science closer to practical applications. The conference is aimed primarily at topics that have immediate practical benefits. By hosting the conference in the developing nations in Asia we aim to provide a forum for engaging both the academic and the commercial sectors in that region. The first conference "Information Technology Prospects and Challenges" was held in May 2003 in Kathmandu, Nepal. This year the conference name was changed to "Asian Applied Computing Conference" to reflect both the regional- and the application-oriented nature of the conference. AACC is planned to be a themed conference with a primary focus on a small set of topics although other relevant applied topics will be considered. The theme in AACC 2004 was on the following topics: systems and architectures, mobile and ubiquitous computing, soft computing, man machine interfaces, and innovative applications for the developing world. AACC 2004 attracted 184 paper submissions from around the world, making the reviewing and the selection process tough and time consuming. The selected papers covered a wide range of topics: genetic algorithms and soft computing; scheduling, - timization and constraints solving; neural networks and support vector machines; natural language processing and information retrieval; speech and signal processing; networks and mobile computing; parallel, grid and high-performance computing; innovative - plications for the developing world; cryptography and security; and machine learning. Papers were primarily judged on originality, presentation, relevance and quality of work. Papers that had clearly demonstrated results were given preference.

Challenges and Opportunities in Global Approaches to Education

IGI Global In order to develop student competencies in K-12 and Higher Education environments, evidence-based tools and concepts are essential in ensuring the development of student skills and proficiencies. Evidence-based pedagogical practices leading to student learning preferences culturally and internationally are essential to educational success. **Challenges and Opportunities in Global Approaches to Education** is an essential research publication that provides evidence-based tools and concepts to develop student competencies in the K-20 environment. Chapters in the monograph cover topics in a theoretical context such as how technology, online learning, and culture inform evidence-based development of student competencies. This book is essential for curriculum teachers, designers, instructional designers, administrators, professionals, researchers, academicians, and students concerned with the management of expertise, knowledge, information, and organizational development in different types of educational communities and environments.

Higher Education Student Financial Aid

Compare and Contrast State Managed Higher Education Student Financial Aid in Canada and the America with the Ngo-Managed Grameen Bank Higher Education Financial Aid Services in Bangladesh

iUniverse The research finds the majority of the higher education student financial aid programs are managed by the states or private agencies or foundations in the world. Their financial aid policies are continuously changing and improving to adopt contemporary situations and changing time. Likewise, the GB higher education student loan policy improvement can be done by continuously reviewing the system, which is necessary for GB to strengthen its higher education student loan program in Bangladesh.

Hope Over Fate

Fazle Hasan Abed and the Science of Ending Global Poverty

Rowman & Littlefield Nicholas Kristof of The New York Times called him "one of the unsung heroes of modern times." Fazle Hasan Abed was a mild-mannered accountant who may be the most influential man most people have never even heard of. As the founder of BRAC, his work had a profound impact on the lives of millions. A former finance executive with almost no experience in relief aid, he founded BRAC, originally the Bangladesh Rehabilitation Assistance Committee, in 1972, aiming to help a few thousand war refugees. A half

century later, BRAC is by many measures the largest nongovernmental organization in the world—and by many accounts, the most effective anti-poverty program ever. BRAC seems to stand apart from countless failed development ventures. Its scale is massive, with 100,000 employees reaching more than 100 million people in Asia and Africa. In Bangladesh, where it began, Abed's work gave rise to "some of the biggest gains in the basic condition of people's lives ever seen anywhere," according to *The Economist*. His methods changed the way global policymakers think about poverty. By the time of his death at eighty-three in December 2019, he was revered in international development circles. Yet among the wider public he remained largely unknown. His story has never been told—until now. Abed avoided the limelight. He thought his own story was of little consequence compared to the millions of women who rose from poverty with BRAC's help, bending the arc of history through their own tenacity and grit. The challenges he faced often seemed insurmountable. Abed's personal life was a tapestry of love and grief—a lover's suicide, a wife who died in his arms. He was a taciturn man with a short temper that erupted on rare occasions. Many of his ventures failed, but Abed persevered. This book is also the biography of an idea—the idea that hope itself has the power to overcome poverty. "For too long, people thought poverty was something ordained by a higher power, as immutable as the sun and the moon," Abed wrote in 2018. His life's mission was to put that myth to rest. This is the story of a man who lived a life of complexity, blemishes and all, driven by the conviction that in the dominion of human lives, hope will ultimately triumph over fate.

Bangladesh

From A Nation To A State

Westview Press In 1996, Bangladesh celebrates its 25th anniversary. When the country became independent from Pakistan in 1971, it proclaimed itself a parliamentary democracy with four goals—democracy, secularism, socialism, and nationalism. This comprehensive introduction to Bangladesh's history, polity, economy, and society reassesses its successes and failures in reaching these goals after a quarter century of nationhood. Craig Baxter traces the development of national identity in the region, first as part of India and then of Pakistan, and the slow evolution toward statehood. He also explores the formative periods of Hindu, Buddhist, Muslim, and British government that preceded Pakistani rule and subsequent independence. Anyone wishing to understand this poor, populous, but ambitious young nation will find this book an invaluable reference.

I is for Influence

The new science of persuasion

Pan Macmillan 'How to influence people without getting them drunk or flirting: brilliant' Venetia Thompson, bestselling author of *Gross Misconduct* • How exactly can we use our body language to win friends and influence people? • When can £1 be more persuasive than £50? • Why does giving customers more choice make them less likely to make a purchase? Some people seem naturally more influential and persuasive. In fact they are simply using rules and techniques that anyone can harness. Psychologist Rob Yeung explores the latest research to expose myths and uncover the real truths about the art of influence and persuasion. *I is for Influence* not only reveals the secrets behind effortlessly winning trust and support; it will allow you to learn proven techniques for getting that promotion, winning that business contract or even finding your perfect match. By the bestselling author of *Confidence* and *The Extra One Per Cent* (Macmillan, 2010). 'This book provides readers with the latest science on persuasion. A must read' Professor Cary L. Cooper, CBE, Professor of Psychology

A Novel

Harper As she plans a party for her son and daughter, Rehana Haque's life will be transformed forever in a story of one family caught in the middle of the 1971 Bangladesh war of independence, as they face changes and decisions that will have a profound impact on their lives forever.

Anthropology Newsletter

The Stork and the Plow

The Equity Answer to the Human Dilemma

Yale University Press In this provocative book, the authors look at the interaction between population and food supply and offer a powerful and radical strategy for balancing human numbers with nutritional needs. Their proposals include improving the status of women, reducing racism and religious prejudice, reforming the agricultural system, and shrinking the growing gap between rich and poor. "This ambitious, enlightened handbook is a cornucopia of strategies and ideas for concerned citizens and policymakers."--Publishers Weekly "Give equal education and power to women throughout the world, argue the authors: when that happens, birth rates fall and food supplies go up."--San Francisco Chronicle (Best Bets of 1995) "[The book] can help us understand the past and possible future of the meals most Westerners take for granted."--Bill McKibben, New York Review of Books "A well-reasoned account of how poverty forces unsustainable use of natural resources . . . a careful and balanced treatment of developments in agriculture . . . that may help food production to stay ahead of population growth."--Basia Zaba, Nature "This generation faces a set of challenges unprecedented in their scope and severity and in the shortness of time left to resolve them. . . . The Stork and the Plow sets these out thoughtfully [and] accurately. . . . We can all hope this urgent message is carefully heeded."--Henry W. Kendall, Nobel laureate and Julius A. Stratton Professor of Physics, MIT "A wonderful piece of work."--Partha Dasgupta, American Scientist

Mathematics for Economics

Student's Solutions Manual

MIT Press This text offers a presentation of the mathematics required to tackle problems in economic analysis. After a review of the fundamentals of sets, numbers, and functions, it covers limits and continuity, the calculus of functions of one variable, linear algebra, multivariate calculus, and dynamics.
