PEDIATRIC NEUROPSYCHOLOGY

THE STEIN FAMILY FELLOW AND DREXEL UNIVERSITY SYMPOSIUM

Psychology Press The Stein Fellow and Drexel University Pediatric Neuropsychology Symposium was held in collaboration with the Philadelphia Neuropsychology Society in November 2010. Pediatric Neuropsychology is a rapidly growing and dynamic subspecialty dealing with the normal and abnormal development of the human brain where new assessments and interventions and new professional issues are emerging. The Drexel Symposium brought together leading scientists and clinicians whose research, scholarship, and clinical practice are informing and shaping the evolution of the field. The goal of the Special Issue is to illustrate some of those research, clinical, and professional directions including advocacy and training that are specific to the developing subspecialty of Pediatric Neuropsychology.

BUILDING DREXEL

THE UNIVERSITY AND ITS CITY 1891-2016

Temple University Press Published in conjunction with Drexel University's 125th anniversary, *Building Drexel* chronicles the founding of the university by Anthony J. Drexel through to the present day. The editors and contributors create a prismatic discussion of the university and its evolution. Richly illustrated chapters cover the architectural history of notable Drexel buildings; the role of Drexel in Philadelphia's modern history; its Greek life; sports—particularly Drexel's history in the Big 5; and each of the university's schools and colleges. There is a history of the medical college and law school, plus the creation of new schools such as those of biomedical engineering, science and health systems. *Building Drexel* also documents the civil rights history of Drexel and its urban planning history in relation to the racially diverse Powelton Village and Mantua neighborhoods it borders. This commemorative volume shows the development of the university both in the city and in the world. Contributors include: Lloyd Ackert, Cordelia Frances Biddle, Paula Marantz Cohen, Donna Marie De Carolis, Roger Dennis, Gloria Donnelly, Kevin D. Egan, Alissa Falcone, David Fenske, John A. Fry, Stephen F. Gambescia, Marla J. Gold, Charles Haas, Kathy Harvatt, Daniel Johnson, Jeannine Keefer, Larry Keiser, Michael Kelley, Jason Ludwig, Jonson Miller, Julie Mostov, Danuta A. Nitecki, Anthony M. Noce, Steven J. Peitzman, David Raizman, Tiago Saraiva, Amy E. Slaton, Nathaniel Stanton, Virginia Theerman, Laura Valenti, James Wolfinger, Eric A. Zillmer, and the editors.

NAKFI'S 15 YEARS IGNITING INNOVATION AT THE INTERSECTIONS OF DISCIPLINES

National Academies Press This publication represents the culmination of the National Academies Keck Futures Initiative (NAKFI), a program of the National Academy of Sciences, the National Academy of Engineering, and the National Academy of Medicine supported by a 15-year, \$40 million grant from the W. M. Keck Foundation to advance the future of science through interdisciplinary research. From 2003 to 2017, more than 2,000 researchers and other professionals across disciplines and sectors attended an annual "think-tank" style conference to contemplate real-world challenges. Seed grants awarded to conference participants enabled further pursuit of bold, new research and ideas generated at the conference.

HANDBOOK OF FORENSIC ASSESSMENT

PSYCHOLOGICAL AND PSYCHIATRIC PERSPECTIVES

John Wiley & Sons The first handbook to explore forensic assessment from psychiatric and psychological perspectives "The editors have assembled a magnificent collaboration between psychiatrists and psychologists to bring forth critical knowledge and insight to the core competency of forensic assessment. This handbook is essential reading and a comprehensive resource for both newly minted and seasoned forensic practitioners." —Robert I. Simon, MD, Director, Program in Psychiatry and Law, Georgetown University School of Medicine "This long-awaited resource blows the dust off traditional standards, shakes the cobwebs out of our old ways of thinking, and shows the practical steps in producing work that will make sense to juries and withstand the most skillful cross-examination. . . . [T]here is no better resource." —Kenneth S. Pope, PhD, ABPP, Diplomate in Clinical Psychology; coauthor, *Ethics in Psychotherapy and Counseling, Fourth Edition* "From preparation to collection to interpretation to communication of the results, this excellent, comprehensive treasure shows how to conduct forensic assessments. Each splendid evidence-based chapter is presented from the collaboration between psychologists and psychiatrists. It is a must-have resource for forensic experts as well as general practitioners or anyone wishing to understand standard of care in forensic assessment." —Melba Vasquez, PhD, ABPP, 2011 American Psychological Association President The practitioner-oriented coverage in the *Handbook of Forensic Assessment* examines: The current state of psychology and psychiatry—including requisite clinical competencies, ethical guidelines, and considerations of multidisciplinary collaboration Various approaches to assessments in criminal and civil matters The principles of effective preparation, data collection, and interpretation, as well as communication for each special situation Topics including competence to stand trial, sexual offender evaluations, addictions, child abuse, and education Overarching practice issues, such as practice development, retention, compensation, consultation, and forensic treatment Includes sample reports that demonstrate the integrative potential of both psychology and psychiatry Incorporating a wealth of current and multidisciplinary research, the *Handbook of Forensic Assessment* is destined to become every mental health professional's most valuable one-stop reference for their forensic work.

THE FUTURE OF NURSING

LEADING CHANGE, ADVANCING HEALTH

National Academies Press *The Future of Nursing* explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

MICROBIOROBOTICS

BIOLOGICALLY INSPIRED MICROSCALE ROBOTIC SYSTEMS

William Andrew Microbiorobotics is a new engineering discipline that inherently involves a multidisciplinary approach (mechanical engineering, cellular biology, mathematical modeling, control systems, synthetic biology, etc). Building robotics system in the micro scale is an engineering task that has resulted in many important applications, ranging from micromanufacturing techniques to cellular manipulation. However, it is also a very challenging engineering task. One of the reasons is because many engineering ideas and principles that are used in larger scales do not scale well to the micro-scale. For example, locomotion principles in a fluid do not function in the same way, and the use of rotational motors is impractical because of the difficulty of building of the required components. Microrobotics is an area that is acknowledged to have massive potential in applications from medicine to manufacturing. This book introduces an inter-disciplinary readership to the toolkit that micro-organisms offer to micro-engineering The design of robots, sensors and actuators faces a range of technology challenges at the micro-scale. This book shows how biological techniques and materials can be used to meet these challenges World-class multi-disciplinary editors and contributors leverage insights from engineering, mathematical modeling and the life sciences - creating a novel toolkit for microrobotics

THE FINANCIAL CRISIS INQUIRY REPORT

THE FINAL REPORT OF THE NATIONAL COMMISSION ON THE CAUSES OF THE FINANCIAL AND ECONOMIC CRISIS IN THE UNITED STATES INCLUDING DISSENTING VIEWS

Cosimo, Inc. *The Financial Crisis Inquiry Report*, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government." News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film *In Debt We Trust* warned of the economic meltdown in 2006. He has since written three books on the subject including *Plunder: Investigating Our Economic Calamity* (Cosimo Books, 2008), and *The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail* (Disinfo Books, 2011), a companion to his latest film *Plunder The Crime Of Our Time*. BETTER LIVING WITH DEMENTIA

IMPLICATIONS FOR INDIVIDUALS, FAMILIES, COMMUNITIES, AND SOCIETIES

Academic Press *Better Living With Dementia: Implications for Individuals, Families, Communities, and Societies* highlights evidence-based best practices for improving the lives of patients with dementia. It presents the local and global challenges of these patients, also coupling foundational knowledge with specific strategies to overcome these challenges. The book examines the trajectory of the disease, offers stage-appropriate practices and strategies to improve quality of life, provides theoretical and practical frameworks that inform on ways to support and care for individuals living with dementia, includes evidence-based recommendations for research, and details global examples of care approaches that work. Weaves research evidence and theories with practical know-how. Identifies support strategies for home, community, and health care settings. Provides stage-appropriate strategies relative to dementia severity. Summarizes dementia pathology, diagnosis, and progression. Considers the changing needs of both the individual with dementia and family and formal caregivers. Offers evidence-informed recommendations for research, practice, policy, and how to make things better at home, in the community, in healthcare and service settings, and through national policies. Provides local and global exemplars of what works. Provides case vignettes to illustrate key points with real examples. Contains brief conversations with national and international experts.

PROCEEDINGS OF THE TWELFTH INTERNATIONAL CONFERENCE ON MANAGEMENT SCIENCE AND ENGINEERING MANAGEMENT

Springer This proceedings book is divided in 2 Volumes and 8 Parts. Part I is dedicated to Decision Support System, which is about the information system that supports business or organizational decision-making activities; Part II is on Computing Methodology, which is always used to provide the most effective algorithm for numerical solutions of various modeling problems; Part III presents Information Technology, which is the application of computers to store, study, retrieve, transmit and manipulate data, or information in the context of a business or other enterprise; Part IV is dedicated to Data Analysis, which is a process of inspecting, cleansing, transforming, and modeling data with the goal of discovering useful information, suggesting conclusions, and supporting decision-making; Part V presents papers on Operational Management, which is about the plan, organization, implementation and control of the operation process; Part VI is on Project Management, which is about the initiating, planning, executing, controlling, and closing the work of a team to achieve specific goals and meet specific success criteria at the specified time in the field of engineering; Part VII presents Green Supply Chain, which is about the management of the flow of goods and services based on the concept of "low-carbon"; Part VIII is focused on Industry Strategy Management, which refers to the decision-making and management art of an industry or organization in a long-term and long-term development direction, objectives, tasks and policies, as well as resource allocation.

THE SURVEY

FACE/ON

FACE TRANSPLANTS AND THE ETHICS OF THE OTHER

University of Chicago Press Are our identities attached to our faces? If so, what happens when the face connected to the self is gone forever—or replaced? In *Face/On*, Sharrona Pearl investigates the stakes for changing the face—and the changing stakes for the face—in both contemporary society and the sciences. The first comprehensive cultural study of face transplant surgery, *Face/On* reveals our true relationships to faces and facelessness, explains the significance we place on facial manipulation, and decodes how we understand loss, reconstruction, and transplantation of the face. To achieve this, Pearl draws on a vast array of sources: bioethical and medical reports, newspaper and television coverage, performances by pop culture icons, hospital records, personal interviews, films, and military files. She argues that we are on the cusp of a new ethics, in an opportune moment for reframing essentialist ideas about appearance in favor of a more expansive form of interpersonal interaction. Accessibly written and respectfully illustrated, *Face/On* offers a new perspective on face transplant surgery as a way to consider the self and its representation as constantly present and evolving. Highly interdisciplinary, this study will appeal to anyone wishing to know more about critical interventions into recent medicine, makeover culture, and the beauty industry.

OBSTACLE COURSE

THE EVERYDAY STRUGGLE TO GET AN ABORTION IN AMERICA

Univ of California Press It seems unthinkable that citizens of one of the most powerful nations in the world must risk their lives and livelihoods in the search for access to necessary health care. And yet it is no surprise that in many places throughout the United States, getting an abortion can be a monumental challenge. Anti-choice politicians and activists have worked tirelessly to impose needless restrictions on this straightforward medical procedure that, at best, delay it and, at worst, create medical risks and deny women their constitutionally protected right to choose. *Obstacle Course* tells the story of abortion in America, capturing a disturbing reality of insurmountable barriers people face when trying to exercise their legal rights to medical services. Authors David S. Cohen and Carole Joffe lay bare the often arduous and unnecessarily burdensome process of terminating a pregnancy: the sabotaged decision-making, clinics in remote locations, insurance bans, harassing protesters, forced ultrasounds and dishonest medical information, arbitrary waiting periods, and unjustified procedure limitations. Based on patients' stories as well as interviews with abortion providers and allies from every state in the country, *Obstacle Course* reveals the unstoppable determination required of women in the pursuit of reproductive autonomy as well as the incredible commitment of abortion providers. Without the efforts of an unheralded army of medical professionals, clinic administrators, counselors, activists, and volunteers, what is a legal right would be meaningless for the almost one million people per year who get abortions. There is a better way--treating abortion like any other form of health care--but the United States is a long way from that ideal.

HANDBOOK OF PORTFOLIO CONSTRUCTION

CONTEMPORARY APPLICATIONS OF MARKOWITZ TECHNIQUES

Springer Science & Business Media Portfolio construction is fundamental to the investment management process. In the 1950s, Harry Markowitz demonstrated the benefits of efficient diversification by formulating a mathematical program for generating the "efficient frontier" to summarize optimal trade-offs between expected return and risk. The Markowitz framework continues to be used as a basis for both practical portfolio construction and emerging research in financial economics. Such concepts as the Capital Asset Pricing Model (CAPM) and the Arbitrage Pricing Theory (APT), for example, provide the foundation for setting benchmarks, for predicting returns and risk, and for performance measurement. This volume showcases original essays by some of today's most prominent academics and practitioners in the field on the contemporary application of Markowitz techniques. Covering a wide spectrum of topics, including portfolio selection, data mining tests, and multi-factor risk models, the book presents a comprehensive approach to portfolio construction tools, models, frameworks, and analyses, with both practical and theoretical implications.

ABOUT FACES

PHYSIOGNOMY IN NINETEENTH-CENTURY BRITAIN

Harvard University Press When nineteenth-century Londoners looked at each other, what did they see, and how did they want to be seen? Sharrona Pearl reveals the way that physiognomy, the study of facial features and their relationship to character, shaped the way that people understood one another and presented themselves. Physiognomy was initially a practice used to get information about others, but soon became a way to self-consciously give information--on stage, in print, in images, in research, and especially on the street. Moving through a wide range of media, Pearl shows how physiognomical notions rested on instinct and honed a kind of shared subjectivity. She looks at the stakes for framing physiognomy--a practice with a long history--as a science in the nineteenth century. By showing how physiognomy gave people permission to judge others, Pearl holds up a mirror both to Victorian times and our own.

SCHOOL MENTAL HEALTH

Cambridge University Press "This book related to fundamental recognitions that 1) children, adolescents, and families usually make no or very poor connections to specialty mental health (see Atkins et al. 1998; Catron, Harris, & Weiss, 1999), 2) schools are where children and youth are, and 3) many advantages accrue when education, mental health, and other youth-serving systems join together to better meet the mental health needs of students, in ways that reflect reducing and removing barriers to learning (Andis et al., 2002; Weist, 1997). National and global networks are increasingly recognizing the centrality of the SMH agenda as reflected in increasing funding, growing training opportunities, key policy initiatives, and an advancing research base that involves localities, states, regions and countries pursuing common themes"--

Springer Nature The open access volume LNCS 11739 constitutes the proceedings of the 9th International Workshop on Socio-Technical Aspects in Security, STAST 2019, held in Luxembourg, in September 2019. The total of 9 full papers together with 1 short paper was carefully reviewed and selected from 28 submissions. The papers were organized in topical sections named as follows: Methods for Socio-Technical Systems focused on instruments, frameworks and re ections on research methodology and also System Security considered security analyses and attacks on security systems. Finally, Privacy Control incorporated works on privacy protection and control as well as human factors in relation to these topics.

FEELING MEDICINE

HOW THE PELVIC EXAM SHAPES MEDICAL TRAINING

NYU Press The emotional and social components of teaching medical students to be good doctors The pelvic exam is considered a fundamental procedure for medical students to learn; it is also often the one of the first times where medical students are required to touch a real human being in a professional manner. In *Feeling Medicine*, Kelly Underman gives us a look inside these gynecological teaching programs, showing how they embody the tension between scientific thought and human emotion in medical education. Drawing on interviews with medical students, faculty, and the people who use their own bodies to teach this exam, Underman offers the first in-depth examination of this essential, but seldom discussed, aspect of medical education. Through studying, teaching, and learning about the pelvic exam, she contrasts the technical and emotional dimensions of learning to be a physician. Ultimately, *Feeling Medicine* explores what it means to be a good doctor in the twenty-first century, particularly in an era of corporatized healthcare.
