The Walls Are Breathing

Mental Illness: A Mother's Perspective

Christian Faith Publishing, Inc. aEURoethe walls are breathing,aEUR her 20-year-old son said. aEUroel know itaEUR(tm)s not real, but thataEUR(tm)s what I see.aEUR So began Julie N. StricklandaEUR(tm)s education on mental illness. She did not know where to start, or who to call. A mechanical engineer, she had earned a master's degree. Research, she could do. Calling people, she could do. But dealing with doctors, insurance, and social security aEUR" all of these were difficult for her. For her son, these were impossible. From struggling to find a doctor who accepted new patients, to struggling to separate symptoms from drug side effects, she learned to advocate for her child. It took two years for him to recover, and another three for both of them to adjust to their aEUroenew normal." The LA Times estimates that one-third of the homeless population suffers from mental illness. While praying about how she could help, God told Strickland to share her story. If at least one person could get help, perhaps that person would stay off the street. If enough people could get help, the homeless population could shrink. Strickland decided to write a book to help others who find themselves in this situation without a road map. Readers can find the resources and advice that took her years to compile in the appendices and on her website (jnstrickland.com). By sharing this information, she hopes that at least one person can find the resources they need. Strickland is not a medical professional. She is not a psychiatrist, psychologist, or therapist. She is a mother who helped her child through a difficult illness. She is telling her story here to help other parents and families. Because few parents know how to react when their child says, "The walls are breathing."

Strategies for Improving Homeless People's Access to Mainstream Benefits and Services

DIANE Publishing In 2000, HUD, in recognition that any solution to homelessness must emphasize housing, targeted its McKinney-Vento Act homeless competitive programs towards housing activities. This policy decision presumed that programs such as Medicaid, TANF and General Assistance could pick up the slack produced by the change. This study examines how 7 communities sought to improve homeless people's access to mainstream services following this shift away from funding services through the Supportive Housing Program. Provides communities with models and strategies that they can use. Highlights the limits of what even the most resourceful of communities can do to enhance service and benefit access by homeless families and individuals.

Pre-Incident Indicators of Terrorist Incidents

The Identification of Behavioral, Geographic and Temporal Patterns of Preparatory Conduct

DIANE Publishing This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

Privacy Lost

How Technology Is Endangering Your Privacy

John Wiley & Sons While other books in the field focus on specific aspects of privacy or how to avoid invasions, David H. Holtzman--a master technologist, internet pioneer, security analyst, and former military codebreaker--presents a comprehensive insider's exposé of the world of invasive technology, who's using it, and how our privacy is at risk. Holtzman starts out by categorizing privacy violations into "The 7 Sins Against Privacy" and then goes on to explain in compelling and easy to understand language exactly how privacy is being eroded in every aspect of our lives. Holtzman vividly reveals actual invasions and the dangers associated with the loss of privacy, and he takes a realistic look at the trade offs between privacy and such vital issues as security, rights, and economic development. Praise for Privacy Lost "Whether we know it or not, we have all become citizens of the Digital Age. As such we need to take responsibility for our conduct, our safety, and our privacy. David Holtzman is deeply knowledgeable about the industry and passionate about the issues. Regardless of your political views, you will come away from this book better equipped to meet the challenges before us all." --Geoffrey A. Moore, author, *Dealing with Darwin: How Great Companies Innovate at Every Phase of Their Evolution* "Holtzman has drafted a blueprint all citizens of this great land ought to read if they desire to understand what privacy truly means, why it is important to both their everyday life as well as to their understanding of what it really means to be free, and what they can do to salvage what little privacy is left them. Privacy Lost needs to be readily available on the desks of all concerned citizens--heavily dog-eared and underlined." --Bob Barr, practicing attorney and former Member of the United States House of Representatives
