## **KEY=EDITION - RACHAEL JACOBS**

---

**Tourism Management Managing Educational Tourism Channel View Publications Increasingly tourists are seeking learning and educational holidays. This interest has led to the provision of tourism product with some form of learning or education as an integral component, including cultural heritage tourism and ecotourism. The growth of offshore education and lifelong learning has stimulated cross-border movement for language learning, school excursions and university student travel. Reflecting this growth in educational tourism types, the author outlines the main forms of educational tourism, their demand and supply characteristics, their impacts and the management issues associated with them, taking a holistic systems-based perspective. The book argues that without adequate research and appropriate management of educational forms of tourism, the potential regional development impacts and personal learning benefits will not be maximised. The book highlights the need for collaboration and networking between both the tourism and education industries to adequately manage the issues surrounding the growth in educational tourism. Handbook of Research on Global Hospitality and Tourism Management IGI Global The tourism industry is a multi-billion dollar enterprise, with more people from all cultures and nationalities choosing to spend their leisure time traveling and visiting new locations. To exploit this burgeoning market, tourism agencies must carefully consider the desires and goals of travelers from around the world. The Handbook of Research on Global Hospitality and Tourism Management contributes to the body of knowledge on travel and tourism by presenting a global view of the hospitality industry, including theoretical research into industry trends as well as case studies from around the world. This**

handbook provides travel agents, owner-operators, and students and researchers in the hospitality industry with the latest research, findings, and developments in the field. Within this handbook of cutting-edge research, readers will find chapters and cases on topics such as travel and tourism in a global economy; local, glocal, and international hospitality; challenges in environmental management; cultural cuisine; and destination management, among others.

**Ecotourism Third Edition Routledge** Focusing on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, this book examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. This revised edition includes: new information on the magnitude of the tourism industry, nature-based tourism and the pros and cons of mass ecotourism revised chapters on development, economics, marketing, policy, ecotourism in practice and biodiversity conservation a section on governance models, ecotourism programmes, operators and guides, interpretation, certification, and ecolodge design a discussion of ecotourism as an ethical or responsible form of tourism approximately 300 new references. It includes case studies and considers the perspectives of many adjacent fields, including geography, economics, business, philosophy, biology, and environmental studies.

**Outdoor Recreation Management Routledge** It is now widely recognized that recreation is as important as work. This revealing book analyzes leisure and outdoor recreation in terms of both their management and their wider importance to society. Specifically, it: clarifies the link between leisure, recreation, tourism and resource management reviews contemporary outdoor recreation management and concepts critically examines approaches to outdoor recreation planning and management in diverse recreational settings considers the future of outdoor recreation and the potential influences of economic, social, political and technological developments. Wide-ranging and topical, it considers such issues as motivation and choice, provision for people with special needs, the impact of outdoor recreation on the environment, and outdoor recreation in both urban and rural contexts. This comprehensively revised second edition has many sections rewritten and expanded to reflect contemporary development in leisure and outdoor recreation management in countries such as Australia, Canada, the UK, the US and New Zealand. With an extensive bibliography of more than 500 references and including further reading sections and review questions, it is an essential student purchase and one of the most comprehensive and international accounts of outdoor recreation management available.

**Accessible Tourism Concepts and Issues Channel View Publications** Inclusion, disability, an ageing population and tourism are increasingly important areas of study due to their implications for both tourism demand and supply. This book therefore sets out to explore and document the current theoretical approaches, foundations and issues in the study of

accessible tourism. In drawing together the contributions to this volume the editors have applied broader social constructionist approaches to understanding the accessible tourism phenomena. Accessible tourism, as with any area of academic study is an evolving field of academic research and industry practice. As with other areas of tourism, the field is multidisciplinary, and is influenced by various disciplines including geography, disability studies, economics, public policy, psychology and marketing. Outdoor Recreation Management Psychology Press "Outdoor Recreation Management" analyzes leisure and outdoor recreation in terms of both their management and their wider importance in society. Specifically, the book helps to clarify the link between leisure, recreation, tourism and resource management. Tourism and Development Concepts and Issues Channel View Publications This text explores the role of tourism as a potential contributor to socio-economic development in destination areas. Establishing a link between tourism studies and development studies, it considers what is meant by development, the processes through which development may be achieved and, in particular, a number of fundamental issues related to the use of tourism as a development agent. In so doing, it challenges conventional thinking about the relationship between tourism and development. The Encyclopedia of Sustainable Tourism CABI Tourism is the world's fastest growing industry, and impacts globally upon ecology, economies, peoples, cultures and the built environment. Development, therefore, must be sustainable and sympathetic in order to preserve the environment and culture it exploits. Despite sustainable tourism being an area of considerable recent interest, there has been no synthesis of the diverse considerations of sustainable tourism, and the language and terms particular to this subject. An important resource for researchers of tourism, this reference work defines and explains terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems. Tourist Attractions From Object to Narrative Channel View Publications Tourist attractions constitute the metaphorical 'heart' of tourism. This book aims to both deconstruct and construct what tourist attractions are, how we perceive them and how we can enhance our understanding of what attracts us as tourists. The volume reaches beyond current ideas about the ways tourist attractions are created, shaped and packaged. It focuses on the importance and subjective nature of identity, memory, narrative and performance in the tourist experience to find new ways of analysing and managing tourist attractions. The book will appeal to researchers and students in tourism and destination management and heritage and indigenous tourism. Chinese Outbound Tourism 2.0 CRC Press Booming Mainland Chinese outbound travel is one of the most exciting phenomena in the world tourism industry's recent history. From 2000 to 2010, Chinese outbound travel increased at a compounded annual rate of 18.5 percent, and it is forecasted that by 2020 China will generate approximately 100 million outbound trips a year, making China the fourth largest source of outbound travel in the

world. The new Chinese tourists are more confident, technologically savvy, value conscious, and ready to explore unfamiliar territory. For tourism marketers and researchers who are getting ready to or just celebrated their initial "west-meets-east" moments, the new Chinese tourists are showing up at their doors and presenting new challenges for marketing and service. In this book, leading authors from around the world share their most cutting-edge findings and thoughts on the Chinese outbound travel market. The book reflects on the paths of the Chinese outbound travel development, reports new trends and issues, and provides new insights and recommendations. For practitioners around the world (e.g., destination policymakers and marketers, travel and tourism service providers, owners, and managers), this book provides hands-on guidance on understanding tourists from Mainland China. For tourism scholars, educators, and students, this book provides basic yet essential knowledge on the Chinese outbound travel market and tourist behavior and points out important future directions. Most tourism programs today have an international component in their curriculum, usually including a global tourism class. This book serves as an excellent supplemental reading for students in these classes. Tourism Management Wiley Tourism is increasingly widespread and complex, and sophisticated and adaptive management is therefore required to realise its full potential as a positive and sustainable economic, ecological, social and cultural force. This textbook gives students an introductory exposure to tourism that provides a foundation for further informed engagement with the sector, first in the remainder of their tertiary studies and then in their capacity as managers. This fourth edition has been updated with recent industry and research developments and retains the thoroughness of content and application that had been established in the previous editions. The twelve chapters in this book have been carefully arranged so that together they constitute a logical and sequential introductory tourism management subject that can be delivered over the course of a normal university semester. Ecotourism Routledge Ecotourism continues to be embraced as the antithesis of mass tourism because of its promise of achieving sustainability through conservation mindedness, community development, education and learning, and the promotion of nature based activities that were sensitive to both ecological and social systems. The extent to which this promise has been realised is open to debate. Focusing on an array of economic, social and ecological inconsistencies that continue to plague ecotourism in theory and practice, the volume examines ecotourism in reference to other related forms of tourism, impacts, conservation, sustainability, education and interpretation, policy and governance, and the ethical imperative of ecotourism as these apply to the world's greenest form of tourism. Ecotourism is a growing field attracting increasing attention from students and academics. Fennell provides an authoritative and comprehensive review of the most important issues that continue to both plague ecotourism and make it one of the most dynamic sectors in the tourism industry. It covers a

comprehensive range of themes and geographical regions. Building on the success of prior editions, Ecotourism has been revised throughout to incorporate recent research and benefits from the introduction of real-life case studies and summaries of recent literature. An essential reference for those interested in Ecotourism, the book is accessible to students but retains the depth required for use by researchers and practitioners in the field. New chapters on the theory and application of animal ethics; community development in sustainable tourism; and education and learning in the field have added further value to an already very comprehensive volume. This book will be of interest to students across a range of disciplines including geography, economics, business, ethics, biology, and environmental studies. Ecotourism Programme Planning CABI Tourism is the world's largest industry. In the past decade it is the natural-resource-based sector that has experienced the greatest growth. In particular, adventure, cultural and ecotourism (ACE tourism): for example, skiing, white-water rafting, whale watching, festivals and fairs. This book provides an in-depth overview of the different operations of ACE tourism. It draws on theory from recreation and leisure studies, tourism, marketing, and environmental management to demonstrate the importance of effective program planning. This is especially significant as industry competition becomes more intense in this growth sector. ECOTOURISM AND RURAL COMMUNITY DEVELOPMENT (Penerbit UMK) Penerbit UMK This book introduces a wide range of topics related to ecotourism, rural tourism and rural community development within Malaysia and outside of Malaysia. Among the topics include research paradigm in ecotourism research, ecotourism impacts to the local community development, ecotourism challenges and its solutions, tourist satisfaction towards ecotourism services, and others. The discussed topics in this book have been theoretically and empirically validated by the authors and provide a meaningful discussion within the ecotourism and rural community development areas. This book is timely to recognise ecotourism contributions towards rural community development issues within the selected countries done by the authors. This book is suitable for college and university students, academicians, government and private agencies, policy makers, NGOs and the general public who are interested in ecotourism and rural community development issues in developed and developing countries. Moreover, this book may be considered as a reference to those invested in ecotourism ventures as well as studies related to the ecotourism and rural community development. Ecotourism and Community Intervention: Emerging Research and Opportunities Emerging Research and Opportunities IGI Global Throughout the world, local, natural wonders are being overrun by hordes of destination seekers intent on capturing nature's majesty. Though the flood of tourists brings economic stability to these regions, the environmental and local community concerns must be taken into consideration. Ecotourism and Community Intervention: Emerging Research and Opportunities examines community intervention strategies and their causal relationship with destination sustainability

and destination quality. The book calls for more proactive measures to enhance destination sustainability through ecotourism initiatives in destinations across the globe. The content within this publication examines global business, mass tourism, and resource management. It is designed for conservationists, environmentalists, tour developers, travel agents, policymakers, administrators, managers, and university students. Garden Tourism CABI Garden visitation has been a tourism motivator for many years and can now be enjoyed in many different forms. Private garden visiting, historical garden tourism, urban gardens, and a myriad of festivals, shows and events all allow the green-fingered enthusiast to appreciate the natural world. This book traces the history of garden visitation and examines tourist motivations to visit gardens. Useful for garden managers and tourism students as well as casual readers, it also examines management and marketing of gardens for tourism purposes, before concluding with a detailed look at the form and tourism-based role of gardens in the future. Handbook of Global Environmental Policy and Administration CRC Press Presenting case studies involving Rwanda, Nepal, Australia, Japan, and Mexico, including "real-time" policy and administrative questions, this versatile reference/text provides a wide perspective on national and international environmental problems and policies, featuring discussions with a regional emphasis as well as global significance. Pooling the work of over 60 international contributors in disciplines ranging from anthropology to political science, the Handbook of Global Environmental Policy and Administration illustrates how environmental concerns are incorporated into administrative functions and policy processes. Responsible Tourism Concepts, Theory and Practice CABI Tourism is one of the world's biggest industries. This book discusses responsible tourism as a whole, including the politics, policy and planning behind it, and the major subject sub-topics, such as poverty reduction, the environment, transport, governance, wildlife tours and heritage. It is suitable for university libraries and policy makers. Tourism Management Dynamics Trends, Management and Tools Routledge "Provides the reader with a comprehensive insight of the changes in the external business environment, and equips them with new managerial techniques and tools in order to adapt and profit from these changes into the future." --Cover. Tourism Destination Development Turns and Tactics Routledge Although blurred and heavily contested, the concept of 'tourist destination' still deserves careful attention. Despite its unstable characteristics, 'destination' is a central and meaningful term in play among all parties in the field of tourism, including tourists, tourism operators, and politicians, as well as students and tourism scholars. This anthology draws on different approaches and discourses of tourism destination development, while focusing on how they are shaped and reshaped and how they should be read and rehearsed. The book reveals dominant as well as alternative approaches to the field. The authors demonstrate how tourism destinations are commercial, but socially embedded; how they are both material and territorial, but at the same time

socially constructed; how production of touristic brands and images are vital, but contested. Such tensions are unfolded through paradigmatic discussions and a series of case studies from the northern hemisphere. The chapters in the book investigate how destination development is catalysed through theming, how changing environments lead to reorientations, and how destinations are political. Altogether, the book provides experts and students with an up-to-date theoretical and empirical insight into tourist destinations. Sustainable Ecotourism Destination Development in Malaysia: An Integrated Approach Inaugural Lecture Series 8 Universiti Malaysia Sabah Press This lecture aims to share new perspectives on sustainable ecotourism destination through an integrated approach. It suggests several pertinent factors that ought to be considered to improve and strengthen the sustainability of ecotourism destinations. An alternative, sustainable ecotourism destination framework is offered by incorporating sustainable and experiential dimensions, the concept of co-creation and the six phases of ecotourism destination development in the sustainable development criteria. In particular, the lecture points out the importance of ecotourism experiential dimensions and destination development phases as important components which have been neglected in sustainable ecotourism destination management. Simply put, the development process or phase at the destination significantly influences the sustainability dimensions and the quality of experiences. The quality of experiences and conditions of the destination will in return have a significant impact on the level of development and growth. Handbook of Research on Urban Governance and Management in the Developing World IGI Global With the emphasis on market-led development initiatives, sustainable urbanization is a challenge, especially in growing nations. Regional administrative efforts are crucial for cities to meet the planned city operations and specific targets and objectives. The Handbook of Research on Urban Governance and Management in the Developing World is a research publication that explores contemporary issues in regional political and administrative practices and key challenges in implementing these strategies in growing nations. Featuring coverage on a wide range of topics such as urban and regional economics, supply chain management, and environmental concerns, this book is geared toward city development planners, policy makers, researchers, academics, and students seeking current and relevant research on the regional bureaucracy and its practices and how they affect growing nations. Indigenous Tourism Routledge In a world characterized by an encroaching homogeneity induced by the growth of multi-national corporations and globalization, the causes of difference accrue new levels of importance. This is as true of tourism as in many other spheres of life - and one cause of differentiation for tourism promotion is the culture of Indigenous Peoples. This offers opportunities for cultural renaissance, income generation and enhanced political empowerment, but equally there are possible costs of creating commodities out of aspects of life that previously possessed spiritual meaning. This book examines these issues from

many different perspectives; from those of product design and enhancement; of the aspirations of various minority groupings; and the patterns of displacements that occur - displacements that are not simply spatial but also social and cultural. How can these changes be managed? Case studies and analysis is offered, derived from many parts of the globe including North America, Asia and Australasia. The contributors themselves have, in many instances, worked closely with groups and organizations of Indigenous Peoples and attempt to give voice to their concerns. The book is divided into various themes, each with a separate introduction and commentary. The themes are Visitor Experiences, Who manages Indigenous Cultural Tourism Product, Events and Artifacts, Conceptualisation and Aspiration. In a short final section the silences are noted - each silence representing a potential challenge for future research to build upon the notions and lessons reported in the book. The book is edited by Professor Chris Ryan from New Zealand, and Michelle Aicken of Horwath Asia Pacific. International Handbook on Ecotourism Edward Elgar Publishing Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourism's fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be. The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers. Mass Tourism in a Small World CABI This new book reviews all aspects of the phenomenon of mass tourism. It covers theoretical perspectives (including political economy, ethics, sustainability and environmentalism), the historical context, and the current challenges to domestic, intra-

regional and international mass tourism. As tourism and tourist numbers continue to grow around the world, it becomes increasingly important that this subject is studied in depth and best practice applied in real-life situations. Finishing with a speculative chapter identifying potential future trends and challenges, this book forms an essential resource for all researchers and students within tourism studies. **Tourism and Opportunities for Economic Development in Asia IGI Global** The growing market of tourism in Asian countries has caused significant changes to the economy, transportation, and safety for citizens. With the ubiquity of tourism, there is now an increasing need for resources to assist in the challenges that arise. **Tourism and Opportunities for Economic Development in Asia** is a key resource on the priorities, challenges, and strategies in the globalized economy of the Asian tourism market. Highlighting multidisciplinary studies on cultural tourism, gastronomy, and hospitality management, this publication is an ideal reference source for academicians, researchers, politicians, policy makers, and information technology directors actively involved in the tourism industry. **Tourism A Modern Synthesis Routledge Tourism** can be a challenging subject for students because it is both dynamic and susceptible to economic turbulence and shifts in trends. **Tourism: A Modern Synthesis** is an essential textbook for tourism students seeking a clear and comprehensive introduction to their studies that addresses these challenges. The authors apply a business approach to the subject, reflecting developments in the teaching and content of university courses, and the text covers both key principles and contemporary themes and issues at a global scale. Among the new features and topics included in this fifth edition are: **New and fully updated case studies to reflect current trends and emerging markets including Africa and Asia. Up-to-date content on disruptive technologies such as Airbnb, low-cost airlines, the e-travel revolution and future developments. Current debates in sustainable tourism including the anti-tourism movement, plastic use and the Sustainable Development Goals. New content on evolving topics such as future employment, human resource management in tourism and generational marketing. Fully updated statistics and data. A brand-new Companion Website including an instructor's manual, supplementary case studies, weblinks, multiple choice questions and PowerPoint slides. This is the ideal guide to tourism for students across all levels, serving as a point of reference throughout a programme of study. Progressing Tourism Research Channel View Publications Professor Bill Faulkner was the father of tourism research in Australia, having spent 20 years in the field, first within government and then in academe. He was a visionary whose impact on the tourism research field extended well beyond Australia. This work contains a collection of Faulkner's publications grouped thematically under the headings Methods, Events, Destinations and Research Agenda. The sections demonstrate how his thinking evolved over time and influenced the intellectual development of the field itself. An introductory chapter describes Faulkner's life and the contribution that**

he made to the field of tourism research. **Managing Asian Destinations Springer** This book focuses on the planning, marketing, and management of Asian tourism destinations, and evaluates current developments within Southeast-Asia and the wider Asia-Pacific region. As more Asian destinations enter the global tourism arena and more Asian travellers look to explore destinations in Asia and beyond, an understanding of how Asian destinations practice tourism is crucial to the future sustainable development of global tourism. This book provides an invaluable stock of research and knowledge based on the Asian practice and experience in destination planning, marketing, and management, offering insights into the latest development and trends in the region. **Tourist Shopping Villages Forms and Functions Routledge** Shopping is perhaps the most universal of tourist activities. Tourists form a separate retailing segment from the general population and place importance on different products and product attributes, contributing billions of dollars each year for both the private and public sector by which retail areas, townscapes and streetscapes can be revitalised. This volume - based on a two year research program from a team of authors - examines the forms and functions of approximately fifty tourist shopping villages in Australia, New Zealand, the United Kingdom, Ireland, Canada and the United States. It will interest scholars of Tourism, Geography, Business, and Economics, as well as government officials, civic leaders, and individual entrepreneurs and retailers seeking to maximize their returns and local community residents. **Positive Tourism Taylor & Francis** Tourism affects millions of individuals, numerous societies and environments in multiple, nuanced and overlapping ways. While it can be viewed as a frivolous leisure pursuit or simply a large industry, with potentially destructive impacts, it might also be understood in terms of its effects on human fulfilment, the good life and greater well-being. This book calls for positive tourism, principally grounded in theories from positive psychology (the study of what makes life worth living), and the development of a body of knowledge that explains what characterises optimal tourist experiences, what enables host communities to flourish and what encourages workers in tourism to thrive. Through original research studies reported in this international volume we aim to further develop this knowledge. The intersections between ongoing and traditionally inspired applications of psychology in tourism and this new thrust in psychological inquiry promise to refresh and challenge tourism research. This book will appeal to researchers and academics in tourism, leisure, positive psychology, management and related fields as well as graduate students, professionals and policy makers. **Quality Assurance and Certification in Ecotourism CABI** This book explores solutions to the problems of inconsistency and even exploitation of the term ecotourism through examples, case studies, and a discussion of quality control and certification. The first part of the book (chapters 2-8) moves the reader through the spectrum of quality assurance tools, from what are perceived to be the least rigorous and effective (awards of excellence and codes of conduct) to

more formal, credible and effective methods (certification and accreditation), with a brief foray into using indicators to measure and monitor effectiveness. The second part (chapters 9-23) looks at a range of ecotourism stakeholders' perspectives, with an emphasis in one way or another on various industry certification programmes. A concluding chapter explores the challenges and issues for quality in ecotourism. The book has a glossary and a subject index.

**Managing Religious Tourism** CABI **Managing Religious Tourism** provides a global view of the tools and resources used in demand and supply management, in the context of pilgrimage and religious tourism. With a focus on toolkits and best practices, the book reinforces the quality of service provision and offers a reflection on consumers' perspectives and what drives their purchasing decisions with regards to a variety of destinations. These central themes are complemented by an understanding of management responses to consumer behaviour and mobility, accessibility, individualism and tourism for both sacred and secular purposes. The book also examines the ways in which networks, partnerships and the conceptual stakeholder approach can be employed by religious tourism suppliers working with destination management organisations. The text promotes sustainable development and a triple bottom line focus, with all chapters supporting policy for framing development. Key features include: - Global perspective on tools as well as management approaches and techniques. - Emphasis on sustainability in connecting sacred and secular consumers. - Focus on promoting learning and development within this important tourism sector.

**Sustainable Tourism Futures** Perspectives on Systems, Restructuring and Innovations Routledge A global industry and an important tool for economic development, international tourism is facing an increasingly uncertain future. Global environmental change, including climate change; increasing fuel prices; and growing criticism from environmental and social interest groups are posing substantial challenges to the belief that international tourism can be sustainable at current rates and patterns of growth. This book therefore aims to answer the questions of if and how tourism can be a sustainable industry. The book concludes that sustainable tourism is possible but that it requires fundamental shifts in operations, systems and philosophies. The various contributions identify a number of means by which this can be accomplished but stress that sustainable tourism still has a long way to travel before it can reach its destination.

**Sustainable Tourism** Routledge **Sustainable Tourism** comprehensively examines the theoretical and applied dimensions of contemporary sustainable tourism from a global perspective. Using international case studies and examples, it provides cutting edge coverage of the latest developments in the area, both theoretically and practically. It takes the reader through all aspects of sustainable tourism from the emergence of the paradigm to sustainability issues in all types of tourism and all components of the industry. Divided into 11 chapters it covers\* ?Alternative tourism? (AT), or small-scale tourism and its associated pros and cons \* Sustainable tourism within the conventional ?mass? tourism

sector: the 'green consumer?', transportation, accommodation, attractions and tour operator considering issues and developments in quality control \* Destination sustainability: issues of community empowerment and ideal sustainability models \* Conclusions for the future of sustainable tourism The wide variety of international case studies used include: backpacking in Australia and Spain, Volunteer tourism in the US, Six Continents and Marriott hotels, Disney World, the Grand Prix, the Grand Canyon, mountain gorilla parks in Uganda and many more. Specifically written for courses in the specific topic area of sustainable tourism, this textbook considers the needs of both students and lecturers as follows: \* Ideal for a semester course (or a 42-hour course) \* Global perspective throughout the chapters and in the breadth of illustrative boxed case studies; \* Chapters exceptionally well-integrated through frequent cross-references \* End-of-chapter questions that prompt deeper integrative thinking on the part of the reader. \* Online resources for the lecturer, including PowerPoint presentations and multiple choice exercises

**Environmental Planning in the Caribbean** Ashgate Publishing, Ltd. Illustrated by case studies from both smaller nations, such as Carriacou, Barbados and St Lucia and larger countries, including Cuba, Mexico and Jamaica, this volume brings together leading writers concerned with environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview. They argue that context is central to the practice of environmental planning in this region. Rather than focusing on a deterministic colonial geography and history, this volume proposes that, whilst a wide range of foreign planning influences can be felt in different contexts, environmental planning emerges in specific settings, through the fluid interaction between local and global relations of power. Thus, a number of chapters explore the effects of external discourses upon the region, while others examine discourses on the US-style democracy and on tourism.

**Authenticity & Tourism Materialities, Perceptions, Experiences** Emerald Group Publishing This book brings together contributions from authors who are actively engaged in authenticity research in a tourism context. In so doing, it demonstrates the various trajectories research has taken towards understanding the significance of authenticity.

**General Technical Report PNW-GTR Botanical Survey of Myrtle Island Research Natural Area, Oregon**
