EXCEL FOR CHEMISTS

A COMPREHENSIVE GUIDE

John Wiley & Sons Reviews from the First Edition: "Excel® for Chemists should be part of any academic library offering courses and programs in chemistry. There is no other book on the market that deals so thoroughly with the application of Excel for analyzing chemical data. Highly recommended, for upper-division undergraduates through professionals." -Choice "I highly recommend this book; treat yourself to it; assign it to a class; give it as a gift." -The Nucleus Chemists across all subdisciplines use Excel to record data in tabular form, but few have learned to take full advantage of the scientific calculating power within this program. Excel is capable of helping chemists process, analyze, and present scientific data, from the relatively simple to the highly complex. Excel® for Chemists, Second Edition has been revised and updated, not only to take into account the changes that were made in Excel, but also to incorporate an abundance of new examples. Arranged in a user-friendly format, this book contains illustrations and examples of chemical applications, useful "Howto" boxes outlining how to accomplish complex tasks in Excel, and step-by-step instructions for programming Excel to automate repetitive data-processing tasks. In addition, tips are provided to speed, simplify, and improve your use of Excel. Included is a CD-ROM, usable in either Macintosh or IBM/Windows environments with many helpful spreadsheet templates, macros, and other tools. Entirely new chapters contained in this Second Edition feature: Array formulas covered in depth in a separate chapter, along with a comprehensive review of using arrays in VBA How to create a worksheet with controls, such as option buttons, check boxes, or a list box An extensive list of shortcut keys-over 250 for Macintosh or PC-is provided in the appendix Whether as a text for students or as a reference for chemical professionals in industry, academia, or government, Excel® for Chemists, Second Edition provides a valuable resource for using Excel to manage various chemical calculations.

AUTOMATE THE BORING STUFF WITH PYTHON, 2ND EDITION

PRACTICAL PROGRAMMING FOR TOTAL BEGINNERS

No Starch Press The second edition of this best-selling Python book (over 500,000 copies sold!) uses Python 3 to teach even the technically uninclined how to write programs that do in minutes what would take hours to do by hand. There is no prior programming experience required and the book is loved by liberal arts majors and geeks alike. If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In this fully revised second edition of the best-selling classic Automate the Boring Stuff with Python, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand--no prior programming experience required. You'll learn the basics of Python and explore Python's rich library of modules for performing specific tasks, like scraping data off websites, reading PDF and Word documents, and automating clicking and typing tasks. The second edition of this international fan favorite includes a brand-new chapter on input validation, as well as tutorials on automating Gmail and Google Sheets, plus tips on automatically updating CSV files. You'll learn how to create programs that effortlessly perform useful feats of automation to:

- Search for text in a file or across multiple files
- Create, update, move, and rename files and folders
- Search the Web and download online content
- Update and format data in Excel spreadsheets of any size
- Split, merge, watermark, and encrypt PDFs
- Send email responses and text notifications
- Fill out online forms

Step-by-step instructions walk you through each program, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in Automate the Boring Stuff with Python, 2nd Edition.
